Air Materiel Command  
Wright-Patterson Air Force Base, Ohio

A.I.  
A

1. In compliance with Flight Service Regulation 200-4, dated 2 November 1948, Subject: "Unidentified Flying Objects," the following report is submitted.
2. On the night of 6 January 1950, two objects were sighted over Kansas City, Kansas, and Olathe, Kansas. They appeared to be motionless over Olathe for ten to fifteen minutes, then moved off very fast.
3. The weather at Kansas City was clear with twelve miles visibility.
4. The incident was witnessed by James F. Grey, 6200 Hadley St., Raytown, Missouri, phone FL 2744; and Robert Van De Vyvere, 5532, Raytown Road, Missouri. Both are employed at Bendix Aviation, Kansas City, Kansas, and the former is a pilot.
5. Photos are not available. Sketches are enroute to Lowry Flight Service and will be forwarded immediately upon receipt.
6. Two objects were sighted, both spherical in shape. They appeared to be the size of old fashioned street lights about two blocks distant. They were a brilliant white, emanating orange and red flashes.
7. They moved from over Kansas City toward Olathe, Kansas, remained motionless from ten to fifteen minutes, then moved off very fast in a southwesterly direction. The estimated altitude was between seven and eight thousand feet. No sound was emitted, nor exhaust trail apparent.
8. This report was given to Fairfax AFB Operations, Kansas City, Kansas, and transmitted to Lowry Flight Service.

1. In compliance with FSR 200-4 dated 2 November 1949, and letter, Headquarters USAF, Subject: "Reporting of Information on 'Flying Discs'", dated 6 February 1948, the following information is submitted.

ESSENTIAL ELEMENTS OF INFORMATION

1. Date of Sighting: 20 September 1949
2. Time of Sighting: 0906E
3. Where Sighted: Thirty North East, Griffiss Air Force Base, Rome, New York

a. Ground

Not applicable

b. Air

- (1) Type aircraft, speed, altitude, direction of flight:

G-45                      160                      10,000                      250 degrees

- (2) Distance and direction from city, town or known landmark:

Thirty North East, Griffiss Air Force Base, Rome, New York

CONFIDENTIAL

Subj: Unidentified Flying Objects

(3) Clock position of object from observer's aircraft:

Four o'clock, approximately thirty miles to the right  
and to the rear

(4) Latitude and longitude: 43°40"N 74°55"W

c. Sea

Not applicable

4. Number of objects: One

a. Formation type: Not applicable

5. Distance of object from observer: Thirty miles

a. Laterally or horizontally: Horizontally

b. Angle of elevation from horizon: Level plane

c. Altitude: 20,000 feet letting down slowly until it dis-  
appeared into the overcast at 7,000 feet

6. Time in sight: Not stated

7. Appearance of object:

a. Color: Silvery or aluminum

b. Shape: Cylindrical

c. Apparent construction: No opinion

d. Size: Undetermined due to distance and speed

8. Direction of flight: 250 degrees

9. Tactics or maneuvers: Slow descent into overcast

10. Evidence of exhaust: Yes (flame)

a. Color of smoke: Orange and white flame

b. Length and width: More than twice the length of the object

    - (1) Possibility of fragments: Not applicable
    - (2) Other physical evidence: Not applicable
  - b. Faded from view: Not applicable
  - c. Disappeared behind obstacle: Not applicable

RELATIVE TO THE OBSERVER

1. Name of observer: Lt Colonel Phillip J. Kuhl, 3716A
2. Air Materiel Command, AF Procurement Field Office, Bedford, Mass.
3. Occupation: USAF
4. Place of business: AF Procurement Field Office, Bedford, Mass.
5. Hobbies: Not applicable
6. Ability to determine: Unknown
7. Reliability of observer: No opinion
8. Notes relative to observer on
  - a. Sightings in general:

The aircraft, AF 7110, was proceeding from Bedford, Mass. to Griffiss Air Force Base, Rome, New York. The flame appeared more than twice the length of the object. The object finally disappeared into the overcast, reported at 7000 feet at the time. The approximate coordinates of the sighted object was 43°40"N 74°55"W. The approximate distance of the object from the observer was thirty miles.

- b. How attention was drawn to objects: Normal pilot surveillance
9. Witnesses:

SUBJECT: Unidentified Flying Objects

TO: Commanding General  
Air Materiel Command  
Wright-Patterson AF Base, Ohio  
ATTENTION: MCIAXO-3

1. In compliance with FS Regulation 200-4 the following reports of sighting of unidentified flying objects are submitted:

a. Location and time of sighting: Over the city of Seattle, Washington, 1845P, 22 August 1949.

b. Weather at the time: Clear, visibility unrestricted.

c. Names, occupations, and addresses of witnesses:

(1) Sgt Jack Faulkner, Controller, 143rd National Guard Aircraft Control and Warning Squadron, 6736 Ellis Avenue, Seattle 8, Washington.

(2) T/Sgt T. D. Mullen, Controller, 143rd National Guard Aircraft Control and Warning Squadron, 6736 Ellis Avenue, Seattle 8, Washington.

(3) Sgt Roger H. Studeman, Controller, 143rd National Guard Aircraft Control and Warning Squadron, 6736 Ellis Avenue, Seattle 8, Washington.

d. Photographs of objects, if available: Photographs of objects are not available.

e. Sketches of object's configuration: Sketches of object's configuration are not available.

Restricted

TCM 452  
SUBJECT: Unidentified Flying Objects

23 August 1949

- f. Object sighted:
- (1) Number: One.
  - (2) Shape: Circular.
  - (3) Size: Estimated seventy-five (75) to one hundred (100) feet in diameter with an estimated depth of ten (10) to fifteen (15) feet.
  - (4) Color: Shiny aluminum. Object reflected the sun's rays.
  - (5) Speed: Estimated five (5) to six (6) hundred miles per hour.
  - (6) Heading: From north to south.
  - (7) Maneuverability: Object did not maneuver.
  - (8) Altitude: Estimated ten (10) thousand feet.
  - (9) Sound: The sound was similar to a jet aircraft.
  - (10) Exhaust trail or not: No exhaust trail was noted.

g. Sgt Studeman first saw the object from his home in the north end of Seattle. He called Sgt Faulkner who was on duty at the 143rd National Guard Aircraft Control and Warning Squadron and reported the object. Sgt Faulkner reported that after receiving the call from Sgt Studeman he stepped outside of the office and he saw apparently the same object reported by Sgt Studeman. T/Sgt Mullen also saw the same object. Sgt Mullen was at his home in the south end of Seattle at the time he saw the object and he reported the information to the CAA Control Tower at Boeing Field, Seattle, Washington, who relayed the information to the McChord Flight Service Center. Both Sgt Faulkner and Sgt Studeman saw other aircraft in the air at the same time the circular object was

TCM 452

23 August 1949

SUBJECT: Unidentified Flying Objects

sighted and reported that it bore no resemblance to any aircraft they had ever seen before.

2. a. Location and time of sighting: Approximately thirty (30) miles west northwest of Seattle-Tacoma Airport, 1920P, 22 August 1949.

b. Weather at the time: Clear, visibility unrestricted.

c. Names, occupations, and addresses of witnesses:

(1) Ben Frieman, ARTC Controller, Seattle Air Route Traffic Control Center, P. O. Box 3224, Seattle 14, Washington.

(2) Howard Watson, Senior ARTC Controller, Seattle Air Route Traffic Control Center, P. O. Box 3224, Seattle 14, Washington.

d. Photographs of objects, if available: Photographs of objects are not available.

e. Sketches of object's configuration: Sketches of object's configuration are not available.

f. Object sighted:

(1) Number: One.

(2) Shape: Similar to an F-84.

(3) Size: Similar to an F-84.

(4) Color: Similar to an F-84.

(5) Speed: Similar to an F-84.

(6) Heading: Object was heading from south to north.

(7) Maneuverability: Object did not maneuver.

Restricted

TCM 452

23 August 1949

SUBJECT: Unidentified Flying Objects

- (8) Altitude: Object was estimated four (4) to five (5) thousand feet.
- (9) Sound: No sound was heard.
- (10) Exhaust trail or not: No exhaust trail was noted.

g. Mr. Frieman, an Air Route Traffic Controller, was on duty at the Seattle Air Route Traffic Control Center at the Seattle-Tacoma Airport and noticed what appeared to be a jet aircraft in the direction of the Olympic Mountains at an estimated distance of twenty (20) to thirty (30) miles away. He brought this to the attention of Mr. Watson who was the senior controller on duty. Since they were aware that no jet units were stationed within this area they notified the McChord Flight Service Center. The dispatcher on duty at the McChord Flight Service Center did not have a flight plan on any jet aircraft or fighter type aircraft in this area and made a check of all the military bases within the area to determine if any jet or fighter type aircraft were flying locally from their bases. A negative report was received. Mr. Frieman and Mr. Watson both reported that they were definite that the object sighted displayed visual characteristics of a jet fighter and that its speed was such to lead them to believe it was a jet aircraft.

16 August 1949

SUBJECT: Unidentified Flying Objects

TO: Commanding General  
Air Materiel Command  
Wright-Patterson AFB, Ohio  
ATTN: MCIAXO-3

1. An unidentified flying object was sighted over Greenville, S. C., at 1930E, 15 August 1949.
2. The 1930E weather for Greenville AF Base was 4000 scattered, 15 miles visibility. Greenville, S. C. Municipal Airport weather at 1930E was 25000 broken, 9000 scattered, 30 miles visibility, with distant thunderstorms in all quadrants.
3. Two witnesses reported the unidentified flying objects. One of the witnesses was not identified and the other was Mr. Harper of Lensing Avenue, Greenville, S. C., who is employed at the Greenville Municipal Airport.
4. No photographs or sketches are available.
5. The unidentified object was described by the witnesses as round, fairly large, grey, moving in a northeasterly direction at an undetermined speed. No sound was heard nor was any exhaust trail visible, its altitude was estimated to be 5000 feet or less. The maneuverability is not known, but it appeared to be moving at a constant speed and altitude.
6. All reports were received via Plan 62 interphone by Maxwell Flight Service Center from Atlanta Air Route Traffic Control Center. The Atlanta ARTC received them from the Greenville Municipal Airport Control Tower.
7. The operations section of the 316th Troop Carrier Wing investigated this incident further and determined that the unidentified object was a Geological Weather Service balloon believed to have been released in Tennessee.

- (5) Speed: Much faster than a B-29.
- (6) Heading: From east to west.
- (7) Maneuverability: Not reported.
- (8) Altitude: Estimated fourteen (14) thousand five (5) hundred feet.
- (9) Sound: Similar to a formation of jet aircraft.
- (10) Exhaust trail or not: Not reported.

g. General remarks: Mr. Miller reported he was in his home and was attracted by a sound similar to a formation of jet aircraft. He went outside his home and the only aircraft in sight was a B-29 heading from east to west. At an estimated one (1) thousand feet above the B-29 Mr. Miller reported he saw a formation of eight (8) dish shaped objects, each larger than a B-29, traveling in the same direction as the B-29 and at a much greater speed. The pilot of the B-29, AF-7742, stated he was at thirteen (13) thousand five (5) hundred feet at the time and had not sighted anything unusual. Mr. Miller stated that he had not been drinking and had good vision.

h. Mr. Miller gave this report to Spokane Radio who forwarded it to Seattle Air Route Traffic Control Center who in turn forwarded the report to the McChord Flight Service Center.

- (4) E. J. Brasford, CAA Tower Operator, Portland Airport, Box 1807, Portland, Oregon. Mr. Brasford has the names and addresses of four other witnesses of this sighting.

d. Photographs of objects, if available: Photographs of objects are not available.

~~SECRET~~

~~SECRET~~

TCM 452

1 August 1949

SUBJECT: Unidentified Flying Objects

Captain Thrush, the pilot of a Northwest Airline Martin 202, reported that while approaching Portland from the east he noticed what appeared to be an aircraft displaying two red lights and one white light. Since this was nonstandard lighting Captain Thrush watched the object very closely. His sighting of this object was at 2110P at an altitude of six (6) thousand feet and he was approximately five (5) miles west of Stevenson, Washington. He reported that the object was behind him and slightly to the left and maintained that same position until Troutdale. When over Troutdale Captain Thrush heard Portland Tower giving instructions to other aircraft to hold over the airport because of an unidentified flying object dropping flares. Upon hearing this information Captain Thrush turned one hundred and eighty (180) degrees and attempted to intercept the flying object displaying the two red lights and one white light that had been following him. He reported that this object then turned to the south-east and appeared to pull away from him quite easily. Captain Thrush reported that his indicated airspeed was two hundred and ten (210) miles per hour while he was trying to intercept the object.

Mr. Penhallegan reported that he saw the object while in the traffic pattern in Troutdale, Oregon. He was flying at an altitude of one (1) thousand three (3) hundred feet indicated and reported that the object appeared to be five (5) hundred to eight (8) hundred feet above him and at an estimated distance of twenty (20) miles to the east.

The only Air Force aircraft in the vicinity at the time was a B-29, AF 7758, who was over Portland at 2130P at an altitude of seven (7) thousand five (5) hundred feet, northbound. The pilot was questioned and stated that he did not drop any flares and did not circle over Portland and did not see anything unusual.

Wright-Patterson AF Base, Ohio  
ATTENTION: MCIA XO-3

1. In accordance with FS Regulation 200-4, subject: Unidentified Flying Objects, dated 2 November 1948, the following report of information received concerning the sighting of unidentified flying objects is submitted:

a. Location and time of sighting: Ten (10) miles northwest of Mountain Home, Idaho, at 1205 MST, 24 July 1949.

b. Weather at the time: As reported by Mountain Home Air Force Base for 1130 PST was scattered clouds at five (5) thousand feet, visibility thirty (30) miles.

c. Names, occupations, and addresses of witnesses: The only individual who reported this sighting was Harry Clark, occupation Airport Manager of Ritchie Field, Nampa, Idaho, address Nampa, Idaho.

d. Photographs of objects if available: Photographs of objects were not available.

e. Sketches of object's configuration: The objects were delta wings with no protrusions. The angle of the apex as reported by Mr. Clark was between thirty (30) and forty-five (45) degrees with the base of the triangle being a slightly curved convex.

f. Objects sighted:

(1) Number: Seven (7) objects were sighted flying in a V formation.

~~SECRET~~

~~SECRET~~

TCM 452

25 July 1949

SUBJECT: Unidentified Flying Objects

- (2) Shape: In addition to the description in paragraph 1e Mr. Clark noted a dark circular structure where the pilot normally sits. The leading edge of this dark circular structure was approximately one-fourth (1/4) the distance from the apex of the delta wing to the rear. This dark circular structure was noted at the time Mr. Clark was below the objects.
- (3) Size: Larger than an F-51.
- (4) Color: Darker than normal aluminum skin and not shiny. Mr. Clark reported the surface seemed to be between a light gray and a dirty white with no markings or diffusion of color.
- (5) Speed: Faster than an F-51 and estimated by Mr. Clark to be at least six (6) hundred miles per hour.
- (6) Heading: Mr. Clark reported that when first sighted the formation was heading approximately three (3) hundred degrees. The formation passed by him and then made a one hundred and eighty (180) degree turn to approximately one hundred and twenty (120) degrees.
- (7) Maneuverability: Mr. Clark reported that no maneuvers were noted other than the one hundred and eighty (180) degree turn. The objects did not appear to bank during the turn. When the objects were first sighted and before the one hundred and eighty (180) degree turn was made, the outer wing surfaces appeared to move slightly.
- (8) Altitude: Mr. Clark reported the formation between eight (8) thousand five (5) hundred and ten (10) thousand feet. When the formation was first sighted Mr. Clark was cruising at ten (10) thousand feet and

~~SECRET~~  
2

~~SECRET~~

TCM 452

SUBJECT: Unidentified Flying Objects

25 July 1949

objects were slightly below and one-fourth (1/4) of a mile to the left of his position. When the formation made the one hundred and eighty (180) degree turn Mr. Clark descended to eight (8) thousand five (5) hundred feet and was below the formation when they came back.

- (9) Sound: No sound was noted from the formation.
- (10) Exhaust trail or not: No exhaust trail was visible.

g. General remarks: Mr. Clark was enroute from Burley, Idaho, to Nampa, Idaho, in a Cub Cruiser when the objects were sighted. When the formation was first sighted they were going in approximately the same direction as Mr. Clark and were approximately one-fourth (1/4) of a mile to his left and below. Mr. Clark was cruising at ten (10) thousand feet at this time. He observed the formation until it made the one hundred and eighty (180) degree turn at which time Mr. Clark descended in his aircraft and made a ninety (90) degree turn to the left in an effort to intercept the formation. He was able to get below the level of the formation at eight (8) thousand five (5) hundred feet at which time he noticed the dark circular bulge on the bottom side of the objects. Because of their speed the flying objects soon became lost from the sight of Mr. Clark who proceeded on to his destination. Mr. Clark is known personally by Captain John S. Batis of this organization who states that in his opinion Mr. Clark is a reliable witness.

SUBJECT: Report of Unidentified Flying Object

TO: Commanding General  
Air Materiel Command  
Wright-Patterson AF Base, Ohio  
ATTN: MCIAXO-3

The following report of an unidentified flying object is submitted in compliance with Flight Service Regulation 200-4. At 2202Z, 19 July 1949 the Wright-Patterson Flight Service Center received the following information from Cincinnati Air Route Traffic Control Center:

At 2140Z, Mr Neinkirchen of 2419 Cleveland Avenue, Columbus, Ohio, phone Jefferson 2956, telephoned Columbus Ohio Municipal Airport Control Tower to report the following information with respect to unidentified flying object.

- a. LOCATION: Over Columbus, Ohio at 2135Z.
- b. WEATHER: Clear sky - visibility 15 miles.
- c. NAME: Mr Neinkirchen, 2419 Cleveland Avenue, Columbus, Ohio, phone Jefferson 2956, photographer by trade - has worked with jet aircraft and engines.
- d. PHOTOGRAPHS: None.
- e. SKETCHES: None
- f. OBJECT SIGHTED:
  - (1) NUMBER: One.
  - (2) SHAPE: Flying wing type, swept back wings, tail but no noticeable nose - similar to present day jet aircraft.
  - (3) SIZE: Seemed too small for one man aircraft.

16 JUN 1949

WGI 350

SUBJECT: Semi-Monthly Intelligence Summary

TO : Commanding General  
Military Air Transport Service  
Washington 25, D.C.

In accordance with provisions of letter, Headquarters, Air Weather Service, subject as above, file A-2, WEA 350.05, the following report is submitted for the period ending 15 June 1949.

1. a. During a test hop of an RB 29, a radar operator from the 514th Reconnaissance Squadron (VLR) Weather made the following observation and report:

*with Guam in 2000 Base, Marianas Islands,*

*took off* On Monday, the 2nd of May, 1949, ~~we took off in aircraft number 45-21824~~ for the purpose of test hopping the ship. Take off was made at approximately 1500K. The radar set was turned on at approximately 1515K and was tuned in. Guam and Rota <sup>Island</sup> were picked up by radar and after about ten (10) minutes of operation some type of interference was noticed on the scope. It came in in the same form as a regular range marker except that the pulses were approximately ten (10) miles apart. They only covered the area covered by Guam plus about five (5) degrees on either side of the island. The scope was on the one hundred (100) mile range.

As the range was reduced the interference grew larger on the scope. On an attached sheet <sup>of paper</sup> there is a sketch of the scope as it appeared with the interference drawn in. I ~~do not~~ <sup>do not</sup> believe that what was picked up on this flight was intentional jamming.

COMMENT

The operator who made the above observation is one of the 514th Reconnaissance Squadrons' most experienced radar operators and is very proficient in the operation of radar equipment. He checked the set after landing and could find no malfunctions.

2 b. On the 8th of June 1949, at a position of 12° 25'N and 140° 20'E, an RB 29 aircraft from the 514th Reconnaissance Squadron made the following sighting:

At 1109Z while flying a heading of 80 degrees, at 18500 ft on a routine Vulture Baker weather reconnaissance mission, a white billowing substance was sighted at an altitude of 30000 to 35000 ft. The sighting was made by two crew members, 1st Lt. Ernest Swanson, weather observer and M/Sgt Walter Rogers engineer. What appeared to be a traveling contrail was

moving from east north east to west south west at an estimated speed of 4200 miles per hour, this speed was determined by means of triangulation, the substance was observed at a relative bearing of approximately 45 degrees to the heading of the aircraft at a distance of 30 miles, substance disappeared from view approximately one minute after first sighting at a relative bearing of approximately 160 degrees. The substance was traveling in a straight line and was definitely white, a three quarter moon made visibility excellent. No sketches or photographs are available.

The above information was sent by radio from the 514th to the Continental Weather Wing, Tinker Air Force Base, Oklahoma.

(Nation reported on) (Main title as per index guide) (Subtitles) (Make separate report for each title)

BRIEF. (Here enter careful summary of report, containing substance succinctly stated; include important facts, names, places, dates, etc.)

POSSIBLE METEOROLOGICAL OR CELESTIAL PHENOMENA.

BRIEF: A manifestation of luminous energy was observed on the night of 8 April 1949 passing over the U.S. Naval Operating Base, Kodiak, Alaska.

NOTE: This information is as of 8 April 1949.

AF 69417

SPECIAL NOTE: Inasmuch as the Intelligence File Index, 1948 Edition, does not contain an index relative to celestial or meteorological phenomena, as related in this report, no Index Guide Number has been incorporated.

ENCLOSURE: (A) Photostatic copy of a drawing made by Paul Herring, indicating course of atmospheric disturbance on 8 April 1949.

1. Deputy U.S. Marshal Paul HERRING, Kodiak, Alaska, reported to the Intelligence Officer on 11 April 1949 that he observed a celestial manifestation crossing the sky above the U.S. Naval Operating Base, Kodiak, Alaska, 8 April 1949 at approximately 2030 hours. According to Mr. HERRING, he saw a flaming greenish-blue object plummet across the sky at an altitude of 2,500 feet at an estimated speed of 1,500 miles per hour. This disturbance, stated Mr. HERRING, was first observed above Anton Larson Bay, (See Enclosure (A)), moving from West to East on a course that approximately paralleled the East-West runways of the U.S. Naval Air Station, Kodiak, Alaska, and was visible for approximately 15 seconds when the flame disappeared in the vicinity of Puffin Island, Chiniak Bay. In the opinion of Mr. HERRING, the object was not a meteor as it was too large and there were no sparks which are generally observed associated with such phenomena. He stated that his first impression was that it was either a jet fighter or that an aircraft was on fire. This opinion was dissipated when he

-----

called the Naval Air Base and learned there were no aircraft of any description in the air in the vicinity of the Naval Air Station.

2. Lieutenant Commander D. SHEPARD, USN, Operations Officer, U.S. Naval Operating Base, Kodiak, Alaska, reported that while standing near the WOB Post Office he had observed "a strange object streaking across the sky, near Old Woman Mountain", on 8 April 1949 at approximately 2040 hours. Lieutenant Commander SHEPARD described the object as a reddish ball of fire approximately two (2) feet in diameter traveling from West to East at an estimated 2,500 feet altitude. "The object was a brilliant color, without a tail, traveling with a flat trajectory of decline between 21 and 20 degrees. It seemed to disintegrate over Chiniak Bay" was Lieutenant Commander SHEPARD's report of his observation. No opinion as to the nature of the object was advanced by Lieutenant Commander SHEPARD.

3. Lawrence B. SHAW, taxicab driver, Arrow Cab, Kodiak, Alaska, stated that he was enroute from the Enlisted Mens Club to the Administration Building on 8 April 1949, when he saw a strange bright blue object streak across the sky at approximately 2035 hours. To SHAW, the object appeared to be about 1-1/2 feet in diameter trailed by a three (3) foot streamer which was "pinkish in shading". This object, stated SHAW, appeared in the sky over Old Woman Mountain traveling on a West to East course at an estimated altitude of 2,500 feet. It was losing altitude at an estimated 25 degrees and, if it continued on it's course, it would have struck Chiniak Bay off Nyman Peninsula. To SHAW, the object appeared to disintegrate as bright particles flew from the object as it passed beyond Nyman Peninsula. SHAW was of the firm opinion that the object he saw was not a meteor or shooting star which he has seen on numerous occasions.

4. Paul KREUGER, Bus Driver, U.S. Naval Operating Base, Kodiak, Alaska, reported that he was driving his bus on 8 April 1949, when at 2045 hours, he observed a strange greenish-blue object flash across the sky from the vicinity of Old Woman Mountain to Nyman Peninsula (West to East direction). KREUGER described the object as being 1-1/2 feet in diameter and approximately 10 feet long. He stated the object was approximately 500 feet high as it passed over hangar #3 of the Air Station and it would have landed in Chiniak Bay off Nyman Peninsula but it faded from his view when it passed over the Peninsula. "It had the appearance of a large greenish tracer shell", stated KREUGER.

5. U.S. Navy Weather Central, U.S. Naval Operating Base, Kodiak, Alaska, reported the weather for 8 April 1949 at 2000 hours as follows:

Ceiling:	3,000 feet, scattered clouds, 3/10 coverage.
Visibility:	15 miles.
Wind:	North-Northwest, 15 knots.
Temperature:	27 degrees.

6. No emission of noise by the object was reported by the observers.

COMMENT:

As the above statements are approximately the same in position, altitude, course and time of the luminous manifestation, it's existence has been evaluated as probable. However, as the shape, size and color of the object have been variously described and as unsuccessful efforts have been made to determine the nature of the phenomena with no further information available, no valuation of the nature of the atmospheric disturbance has been made.

(Nation reported on) (Main title as per index guide) (Subtitles) (Make separate report for each title)

BRIEF. (Here enter careful summary of report, containing substance succinctly stated; include important facts, names, places, dates, etc.)

POSSIBLE METEOROLOGICAL OR CELESTIAL PHENOMENA.

BRIEF: A manifestation of luminous energy was observed on the night of 8 April 1949 passing over the U.S. Naval Operating Base, Kodiak, Alaska.

NOTE: This information is as of 8 April 1949.

SPECIAL NOTE: Inasmuch as the Intelligence File Index, 1948 Edition, does not contain an index relative to celestial or meteorological phenomena, as related in this report, no Index Guide Number has been incorporated.

ENCLOSURE: (A) Photostatic copy of a drawing made by Paul Herring indicating course of atmospheric disturbance on 8 April 1949.

1. Deputy U.S. Marshal Paul HERRING, Kodiak, Alaska, reported to the Intelligence Officer on 11 April 1949 that he observed a celestial manifestation crossing the sky above the U.S. Naval Operating Base, Kodiak, Alaska, 8 April 1949 at approximately 2030 hours. According to Mr. HERRING, he saw a flaming greenish-blue object plummet across the sky at an altitude of 2,500 feet at an estimated speed of 1,600 miles per hour. This disturbance, stated Mr. HERRING, was first observed above Anton Larson Bay, (See Enclosure (A)), moving from West to East on a course that approximately paralleled the East-West runways of the U.S. Naval Air Station, Kodiak, Alaska, and was visible for approximately 15 seconds when the flame disappeared in the vicinity of Puffin Island, Chiniak Bay. In the opinion of Mr. HERRING, the object was not a meteor as it was too large and there were no sparks which are generally observed associated with such phenomena. He stated that his first impression was that it was either a jet fighter or that an aircraft was on fire. This opinion was dissipated when he

Subject: US/ALASKA - Meteorological Phenomena - Luminous Energy  
-----

called the Naval Air Base and learned there were no aircraft of any description in the air in the vicinity of the Naval Air Station.

2. Lieutenant Commander D. SHEPARD, USN, Operations Officer, U.S. Naval Operating Base, Kodiak, Alaska, reported that while standing near the NOB Post Office he had observed "a strange object streaking across the sky, near Old Woman Mountain", on 8 April 1949 at approximately 2040 hours. Lieutenant Commander SHEPARD described the object as a reddish ball of fire approximately two (2) feet in diameter traveling from West to East at an estimated 2,500 feet altitude. "The object was a brilliant color, without a tail, traveling with a flat trajectory of decline between 21 and 20 degrees. It seemed to disintegrate over Chiniak Bay" was Lieutenant Commander SHEPARD's report of his observation. No opinion as to the nature of the object was advanced by Lieutenant Commander SHEPARD.

3. Lawrence B. SHAW, taxicab driver, Arrow Cab, Kodiak, Alaska, stated that he was enroute from the Enlisted Mens Club to the Administration Building on 8 April 1949, when he saw a strange bright blue object streak across the sky at approximately 2035 hours. To SHAW, the object appeared to be about 1-1/2 feet in diameter trailed by a three (3) foot streamer which was "pinkish in shading". This object, stated SHAW, appeared in the sky over Old Woman Mountain traveling on a West to East course at an estimated altitude of 2,500 feet. It was losing altitude at an estimated 25 degrees and, if it continued on it's course, it would have struck Chiniak Bay off Nyman Peninsula. To SHAW, the object appeared to disintegrate as bright particles flew from the object as it passed beyond Nyman Peninsula. SHAW was of the firm opinion that the object he saw was not a meteor or shooting star which he has seen on numerous occasions.

4. Paul KREUGER, Bus Driver, U.S. Naval Operating Base, Kodiak, Alaska, reported that he was driving his bus on 8 April 1949, when at 2045 hours, he observed a strange greenish-blue object flash across the sky from the vicinity of Old Woman Mountain to Nyman Peninsula (West to East direction). KREUGER described the object as being 1-1/2 feet in diameter and approximately 10 feet long. He stated the object was approximately 500 feet high as it passed over hangar #3 of the Air Station and it would have landed in Chiniak Bay off Nyman Peninsula but it faded from his view when it passed over the Peninsula. "It had the appearance of a large greenish tracer shell", stated KREUGER.

5. U.S. Navy Weather Central, U.S. Naval Operating Base, Kodiak, Alaska, reported the weather for 8 April 1949 at 2000 hours as follows:

Ceiling:	3,000 feet, scattered clouds, 3/10 coverage.
Visibility:	15 miles.
Wind:	North-Northwest, 15 knots.
Temperature:	27 degrees.

6. No emission of noise by the object was reported by the observers.

COMMENT:

As the above statements are approximately the same in position, altitude, course and time of the luminous manifestation, it's existence has been evaluated as probable. However, as the shape, size and color of the object have been variously described and as unsuccessful efforts have been made to determine the nature of the phenomena with no further information available, no valuation of the nature of the atmospheric disturbance has been made.

CARSWELL FLIGHT SERVICE CENTER  
Carswell Air Force Base  
Fort Worth, Texas

MDC:lwb

FWH 319.1

14 April 1949

SUBJECT: Report of Unidentified Flying Objects

TO: Commanding General  
Air Materiel Command  
Wright-Patterson AF Base, Ohio  
  
Attention: MCIAXO-3

1. In compliance with FS Regulation 200-4, subject "Unidentified Flying Objects" dated 2 November 1948, in reference to letter, Headquarters, USAF, subject: "Reporting of Information on 'Flying Discs,'" dated 6 February 1948, the following report is submitted.

2. An unidentified flying object was seen over Fort Worth, Texas, on 13 April 1949, at approximately 21050, by 1st Lt Robert A. Francis, who called it to the attention of Captain Stanley Borowski. Both officers are assigned to the Carswell Flight Service Center, Carswell Air Force Base, Fort Worth, Texas.

3. Subject officers had just returned from a local flight and were standing by their aircraft on the flight line. The weather at time object was sighted reported by Carswell Air Force Base was clear and visibility of eight miles. No photographs are available. Object was round and in the shape of a ball, very silver in color. It was traveling at a tremendous rate of speed, estimated to be over 1000 miles per hour, altitude was very hard to judge and cannot be estimated correctly; however, object seemed to be clearly visible. Lieutenant Francis saw the object appear on the horizon in the north northwest direction, it seemed to fly horizontally in the direction of south southeast. It did not appear to burn out, but suddenly disappeared. No sound was heard. The exhaust trail seemed to be approximately three times the size of the object and also was silver in color. The exhaust consisted of silver streaks and star shaped figures. The object definitely did not appear to be a jet or meteor. Its speed was far in excess of any jet speed witnessed by officers. The entire sighting took place in a matter of a few seconds. A check of the Carswell Flight Service flight following racks showed no jet aircraft flying in this area at time object was sighted.

Report from Crystal 1, Fort Chimo, Quebec, states that on 19 Feb 1949 at about 1840 hours, a sound appearing to be slow running aircraft engines was heard from a general southwesterly direction from the Base at a very high altitude. The sound remained within hearing distance for about 15 to 20 minutes, during which no objects or lights were observed. Check has been made to establish the fact that there were no Canadian or USAF planes from Goose Bay in the vicinity at that time. Written report will follow.

MARCH FLIGHT SERVICE CENTER  
March Air Force Base, California

DMZ 360.112

1 March 1949

SUBJECT: Information of Unidentified Flying Object.

TO: Commanding General,  
Air Materiel Command,  
Wright Patterson Air Force Base, Ohio.  
ATTENTION: MUIAXO-3.

1. In accordance with letter, Headquarters, USAF, subject: "Reporting of Information on 'Flying Discs'," dated 6 February 1948 and Flight Service Regulation 200-4, the following information of unidentified flying object is forwarded as received by March Flight Service Center from Air Route Traffic Control, Los Angeles.

a. 1st Lt. John T. Smith, pilot of Air Force 7346, T-11 on a round robin flight from Fresno Air Terminal, California to Los Angeles and return, reported that he was circled by a jet propelled blimp while over Sandberg Pass, about 40 miles south of Bakersfield, California at 2030 P, 28 February 1949. The speed of the object was estimated at 500 MPH, flying at an altitude of nine thousand feet. The object then disappeared on a heading of 180°.

b. Weather reported for Sandberg Pass at 2030 P was twenty thousand feet thin scattered clouds, visibility 10 miles, temperature 36, dew point 34, wind south 7, altimeter 3007. Remarks to the sequence weather were: Visibility west 1 mile, fog ceiling and visibility variable due to scattered stratus drifting over station. Conditions radically changing.

c. No other information of object's size, shape, speed, or color, is available.

RALPH A. REEVE,  
Lt. Colonel, USAF,  
Commanding.

MEMORANDUM

TO: THE SECRETARY OF THE AIR FORCE

FROM: THE CHIEF OF STAFF, AIR FORCE

1. This memorandum is submitted for your information regarding the proposed changes in the structure of the Air Force Staff, effective 1 July 1953. The proposed changes are based on the recommendations of the Joint Chiefs of Staff and the Air Force Staff Study Group.

2. The proposed changes are as follows: (a) The Chief of Staff, Air Force, will continue to be the principal advisor to the Secretary of the Air Force. (b) The Deputy Chief of Staff, Air Force, will be appointed by the Secretary of the Air Force. (c) The Air Force Staff will be reorganized into three major functional areas: (1) Operations, (2) Support, and (3) Administration.

3. The proposed changes are being implemented on a phased basis. The first phase will be completed by 1 July 1953. The second phase will be completed by 1 July 1954. The third phase will be completed by 1 July 1955.

4. The proposed changes are being implemented in accordance with the recommendations of the Joint Chiefs of Staff and the Air Force Staff Study Group.

HEADQUARTERS 6TH WEATHER SQUADRON  
Albrook Air Force Base  
Canal Zone

17 February 1949

322

SUBJECT: Unidentified Aerial Objects Vicinity of San Andres Islands,  
Caribbean Sea

TO: Commanding General  
Military Air Transport Service  
Washington 25, D. C.  
ATTENTION: AC/S, A-2

1. In accordance with Restricted letter, Headquarters, 2108th Air Weather Group, subject: Report on Information on "Flying Discs", dated 24 March 1948, the following report is submitted.
2. At 2030 hours on 8 February 1949, Captain McBride of the S. S. Antigua, A United Fruit vessel, berthed at Cristobal pier area, Canal Zone, was interviewed by Intelligence personnel, Caribbean Air Command, concerning three aerial objects sighted by officers of his ship on voyage to Canal Zone from New Orleans, Louisiana.
3. Captain McBride stated that the first object, which appeared to be a disc, was sighted at 1630 on 6 February 1949 at 12 degrees 30 minutes north latitude, 81 degrees 10 minutes west latitude, in the close vicinity of the San Andres Islands. The S. S. Antigua's course was 152 degrees at 16 knots. When sighted, the object was at an altitude of 60 degrees from the horizon as determined by the ship's sextant in the direction of 120 degrees. As it passes directly over the ship, several officers described it as a round, silver-colored sphere. Although McBride had difficulty in determining its height, he estimated the diameter as 12 to 14 inches. As it passed overhead, bearing 310 degrees, it changed color from silver to yellow to red and went out of sight in the dusk at an altitude of 22 degrees. The wind at the time was estimated at force four, approximately 29.
4. At 1700 on the same date two more objects were sighted, one off the port bow at an altitude between 50 and 60 degrees, and the other off the starboard bow bearing 201 degrees at an altitude of 47 degrees. Both disappeared abeam in the dusk. None showed any luminosity or motivating power.
5. The circumstances described suggest a possibility that these objects are some type of weather balloons. A study made by this headquarters of the prevailing winds at all altitudes during the period 4-6 February 1949 virtually eliminate any possibility of a radiosonde instrument being the object sighted. The only release point which might have

RESTRICTED

RESTRICTED

resulted in a balloon being in the area of the San Andres Islands is that located at Managua, Nicaragua. However, since no objects were seen to be attached to the discs, it seems improbable that a radiosonde train might have been involved. There is a possibility that a balloon broke free prior to release and subsequently developed a leak which caused it to drift into the area of the sighting. However, none of these possibilities account for the sighting of three objects within a thirty minute period.

6. On 7 February 1949 two Russian 300-ton sloops (Omar and Blesk) arrived at Colon, Republic of Panama, from St. Thomas, Virgin Islands, enroute to Valdivostok via Honolulu, Hawaii. The backtrack computation of wind and course and point of sighting lend a possibility that the objects were in free flight after release from these ships which followed a direct course from St Thomas to Colon. These two vessels are presently awaiting repairs at Colon. Two other vessels of the same type are presently in St Thomas undergoing repairs. Any further developments will be reported promptly.

7. The above report has already been submitted to Headquarters Air Materiel Command and Headquarters United States Air Force by the Caribbean Air Command.

SUBJECT: Report of Sighting of Unidentified Phenomenon

TO : Commanding General  
Far East Air Forces  
APO 925  
ATTN: AC/S, A-2

1. In accordance with the provisions of letter, Headquarters, United States Air Force, subject: "Reporting of Information on 'Flying Discs'", 26 February 1948, the following information is forwarded:

a. Inclosures 1, 2 and 3 are reports received by the Japanese Central Meteorological Observatory in Tokyo. The observations indicated in these reports were taken by Japanese Weather personnel at the respective stations.

b. Inclosure 4 indicates the location of the stations which observed the object and it's probable path and point of explosion or disappearance.

c. Inclosures 5 and 6 are surface synoptic charts showing the weather existing over Japan at 0600Z and 1200Z on 25 January, which times are approximately four and one half ( $4\frac{1}{2}$ ) hours before and one and one half ( $1\frac{1}{2}$ ) hours after the unidentified object was sighted.

c. No information has been received other than that reported by the Japanese.

REPORT ON AN ABNORMAL PHENOMENON

Jan. 28, 1949.  
GMO., Tokyo

A telegram was received from the Fukushima Weather Station

(37°45'N, 140°28'E) stating as follows:

At about 7.30 p.m., a glow pale in colour was seen flying from northwest toward southeast, which fell with a roar like thunder. The spot of descent seems to be Nakagori Village, Tamura County to the east of Koriyama (37°24'N, 140°23'E). Probably, it was a meteor. The detailed state is now under investigation.

Incl 1<sup>2</sup>

ADDITIONAL REPORT ON THE GLOW PHENOMENON ON 25TH

Jan. 27th, 1949.  
GMO., Tokyo

In addition to the previous report on the glow from the Takayama Weather Station, we have received reports also from the other stations on the same phenomenon, stating as follows:

1. Iida Weather Station.

Last night, we have observed in this district a phenomenon, probably be a fall of meteor. The following is the report for it.

At Iida, at 19h 46m 30s, a pale glow was observed in the direction of Northeast at an altitude of  $35^{\circ}$  above the horizon, which moved almost horizontally through north toward west and then disappeared. This glow was as great as one and a half of the moon in diameter with considerable brightness. At about 19h 50m, a heavy sound was heard and doors trembled. This phenomenon have been observed in many places in the district of this station, of which report will be made after investigation.

2. Suwa Weather Station.

At 19h 50m on 25th, a pale glow like meteor with a sound was observed at Suwa. This glow appeared in a distance of a few degree to the north-north-east of Betelguese in the Orion Constellation and moved almost to southeast, attaining its maximum brightness at an altitude of about  $60^{\circ}$  above horizon. It shined with palish white colour, the intensity of which was such that objects on the ground near the observer were clearly discernible for a moment illuminated by it. Thereafter, it became yellowish in colour, then yellowish red passing a point in the southwest and at an altitude of about  $40^{\circ}$ , and finally disappeared. The time elapsed for the above was 3 or 4 seconds. About 1 minute thereafter, a sound resembling to a distant thunder was heard, which continued for about 15 seconds.

3. Nagano Weather Station.

At about 19h 50m on January 25th, a phenomenon, probably be a meteor, with a sound like that of explosion was observed in many places near this station. According to the observation taken by Yasuo Miyamoto, a member of this station, a glow appeared in the direction of east-south-east and at a point of medium altitude above horizon, which moved sending out palish white light toward a point in the direction of west-south-west, where it disappeared below the horizon. This glow continued about 5 minutes. About 3 minutes thereafter, a sound like that of explosion was heard in the direction of west-south-west.

REPORT OF AN ABNORMAL PHENOMENON

Jan. 26, 1949.  
CMO., Tokyo.

A telegram was received from the Takayama Weather Station (36°09'N, 137°15'E) stating as follows:

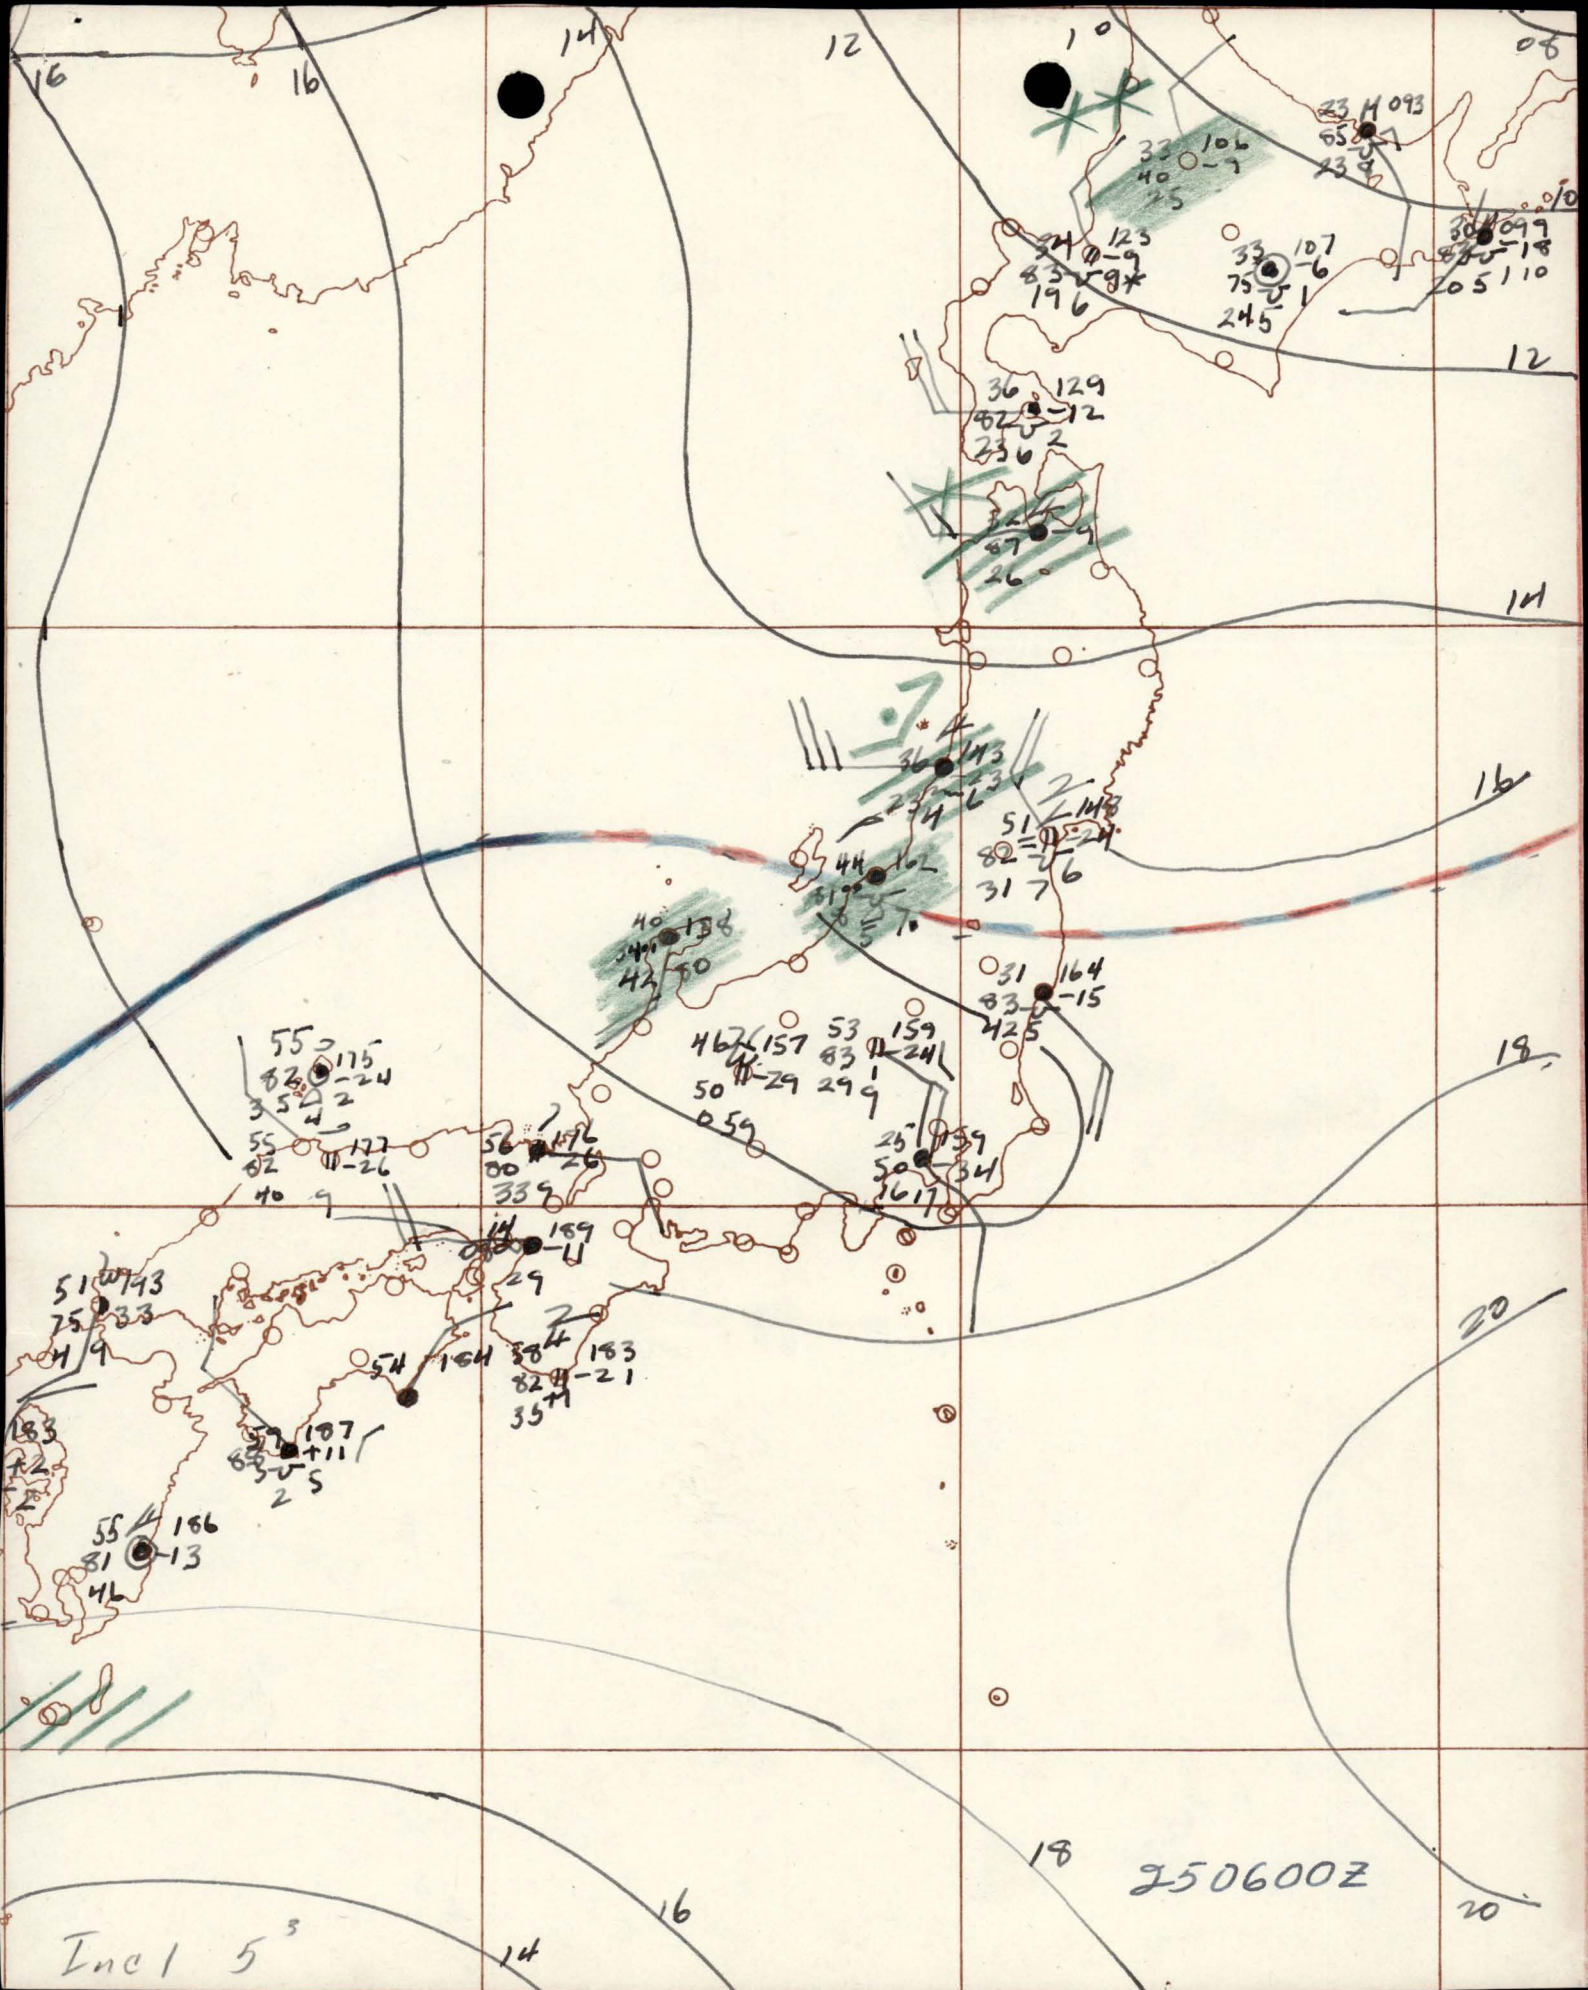

At about 7.40 p.m. on 25th, a remarkable glow was experienced to the southeast of this station. This glow moved southwestwards and then disappeared followed by a sound like thunder after a few minutes. This sound was rather loud in the vicinity of Osaka Town near this station. According to a report from Miya Village, the glow appeared there almost overhead and, a few minutes later, a sound resembling to thunder was heard from the south. Summing up the reports by eye-witnesses, this phenomenon might be the explosion of a meteor.

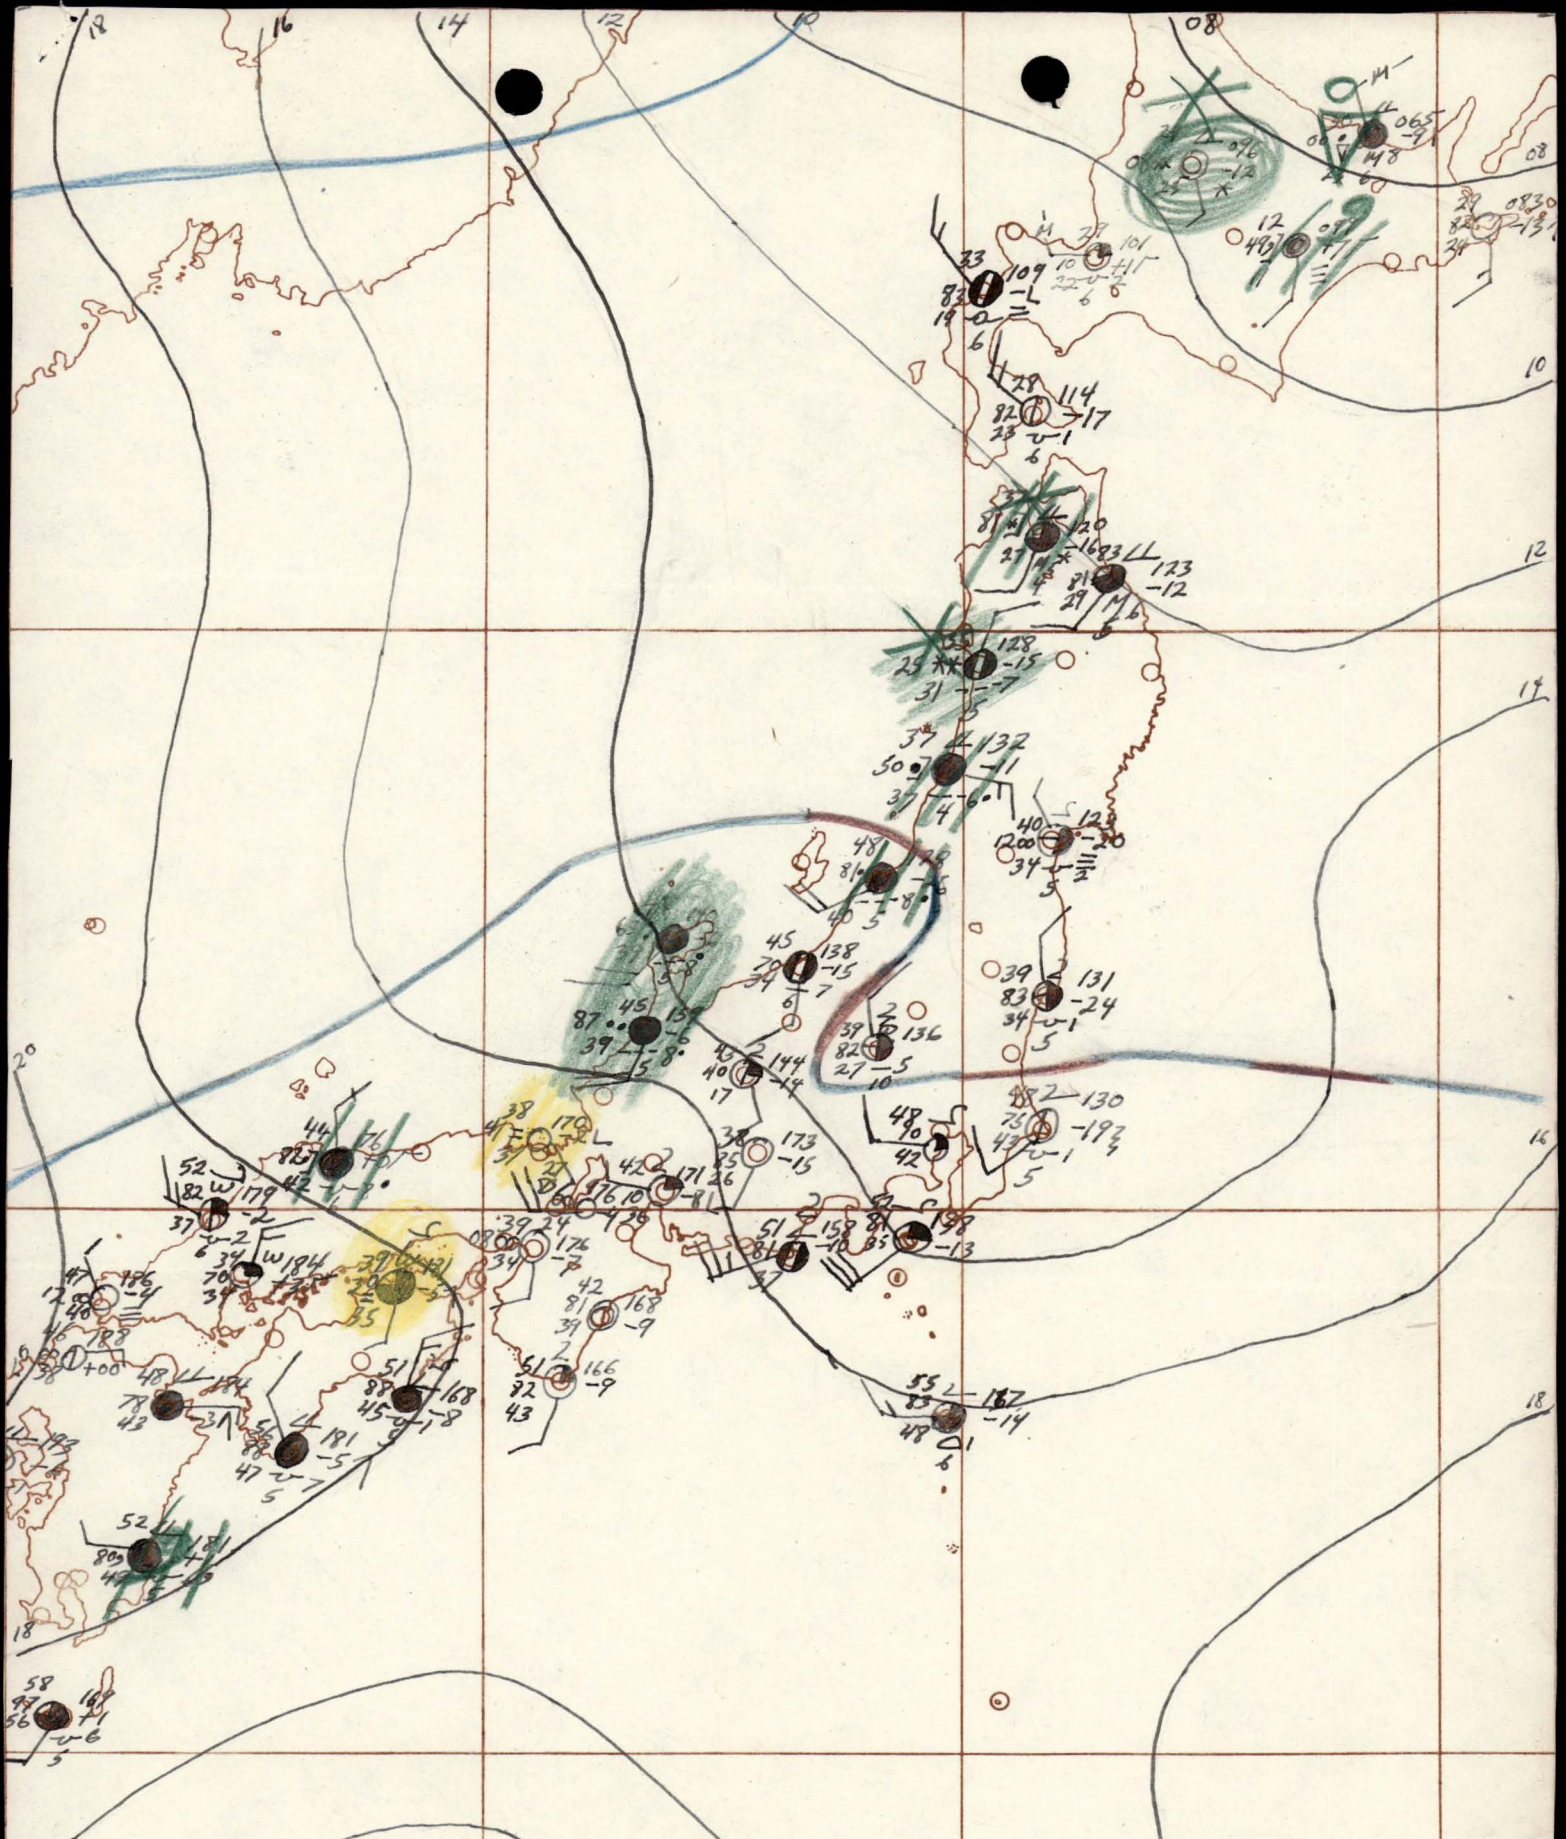

Also at Gifu, a glow was seen to the north-north-east at about the same instance as above, while in the Nagoya District Central Meteorological Observatory, no such a phenomenon was observed.

## Office Memorandum • UNITED STATES GOVERNMENT

TO : MATS A-2, ATTN: Capt. Hathaway

DATE: 8 February 1949

FROM : AACS A-2

AACS/A-2/CCR/mlb/2113

COMMENT NO. 1

SUBJECT: Sighting of "Flying Discs"

A strong possibility exists that the "flying disc" might have been a piece of cardboard, or light metallic substance carried aloft by the funneled air currents over Hickam.

The nearby cane fields give off a considerable amount of moisture, thereby creating a "dead space." The prevailing winds striking this area are directed upward over the field, and hence could carry inanimate objects up with them.

Then, too, the altitude given could be considerably off, inasmuch as the object sighted was thin. Judging heights of such objects is difficult enough, even if the object were 3 - 4 feet in thickness.

Suggest you check records of Air Weather Service for confirmation of wind peculiarities over Hickam.

APO 953, c/o PM, San Francisco, California

C-1/bc

AACS 350.09

8 January 1949

SUBJECT: Sighting of "Flying Disc"

THRU: Commanding Officer  
1808th AACS Wing  
APO 925, c/o PM  
San Francisco, California  
ATTN: A-2

TO: Commanding General  
Air Materiel Command  
Wright Patterson AFB  
Dayton, Ohio  
ATTN: MCIAXO-3

1. In compliance with directives received from higher headquarters, forwarded herewith is complete information as received from a witness who viewed an object presumed to be a "flying disc" over Hickam Field. This object was first seen by Capt. Paul R. Stoney, AO 36278, on 4 January 1949 at 1407 local time and went out of sight at approximately 1435 local time. The object was first sighted by Capt. Stoney when it was approximately 25 miles due east of Hickam. There were scattered clouds at 3500 feet (base) and the visibility at the time was approximately 20 miles plus. Capt. Stoney is the Assistant S-2 Officer of the 1810th AACS Group located at Hickam Field, T. H., and is also a twin-engine pilot. No photographs are available due to the fact that Capt. Stoney was not in possession of a camera at the time and had no idea that he would have sufficient time to procure one. In the words of Capt. Stoney, the object appeared to be a large round piece of flat white cardboard, oscillating continually. The object sighted was the only one seen and appeared to approximate the size of an AT-6. Capt. Stoney stated that the object seemed to be extremely white on the underside, while the topside portion of the object seemed to have a dark, non-reflecting surface. The speed of the object was approximated at 85 miles per hour. Capt. Stoney further stated that the object circled the area, making right circles and left circles at approximately

AACS 350.09

Subject: Sighting of "Flying Disc"

8 January 1949

3000 feet, continually gaining altitude and then suddenly departed, still climbing on a straight course of 25 degrees magnetic. It is the opinion of the witness that the object had limited maneuverability, and that no audible sound emanated from the object. There was no exhaust trail visible.

2. The witness was much impressed by the brilliance of the whiteness of the underside of the object and stated that prior to the disappearance of the object at a distance of 40 to 50 miles from Hickam Field, the object still seemed to give off a blinking whitish reflection and, according to the witness, this blinking seemed to go on and off with decided regularity.

3. Capt. Stoney reported the presence of a C-54 type aircraft in the vicinity of Hickam Field at the time of the initial sighting of the object, and he stated that he was almost convinced that this object was released from or by this C-54 aircraft.

4. Capt. Stoney reported that, at all times and during the departure of the object, the undulation of the object was extremely rhythmical and that this rhythmical cycle was completed approximately once every second.

5. When object ultimately departed on a straight course, it appeared to increase speed and also to increase the angle of climb so that the angle of climb approximated 25 degrees. Witness stated that it was extremely difficult to approximate the rate of speed during departure due to the distance involved and the intermittency of the reflection. Witness stated that it was his opinion that this object was under absolute control at all times and that definite gyrations were being executed. The turns were extremely wide and decisive.

6. The opinion of Capt. Stoney on this subject is considered to be worthy of consideration as this officer is an extremely cool and level-headed person, who is not given to the making of rash statements or using poor judgment.

7. In the event that further information is desired by your headquarters concerning the object as reported, this headquarters will be ready to cooperate in every way possible.

CONFIDENTIAL

\* STATEMENT \*

12 January 1949

At the request of Chief of Intelligence, the undersigned wishes to describe as accurately as possible his impressions of the brief appearance of an unknown illuminated object which appeared over Fairfield-Suisun AFB at 2015 PST on 3 December 1948. The object first shot into view about 2 miles north of the control tower, flying at a low altitude between 500 and 1000 feet, climbing on a low trajectory, with a speed estimated at something in excess of 400 miles per hour. Immediately after sighting, this observer rushed to the east side of the tower. By this time the object was estimated to have not more than 1500 feet of altitude and its speed had slowed for several seconds to perhaps two-hundred (200) miles per hour. The observer can recall that at this stage the object had a very slight undulating or bouncing motion. When its position oriented with a line between the tower and the air freight terminal, but a slight distance east of the terminal, the object took an almost vertical rise or climb and levelled off again at an estimated three thousand feet. At that time the other control tower operator on duty continued watching the object while this observer telephoned the AACS operations officer residing on the base in hopes he might be able to get a look at it. The other tower operator reported the object almost immediately afterwards started a fast climb toward the south-southeast and reached about twenty thousand feet, at which point he lost sight of it. The undersigned never saw the object again after going for the telephone.

Pertinent information is that the light was clearly seen with the naked eye, brilliant but by no means blinding. In size it was comparable to one of Fairfield-Suisun AFB's high-intensity runway lights. The observer is convinced it was not an aircraft navigation light. The night was clear, and the wind was indicating southwest at 10 miles per hour on tower instruments.

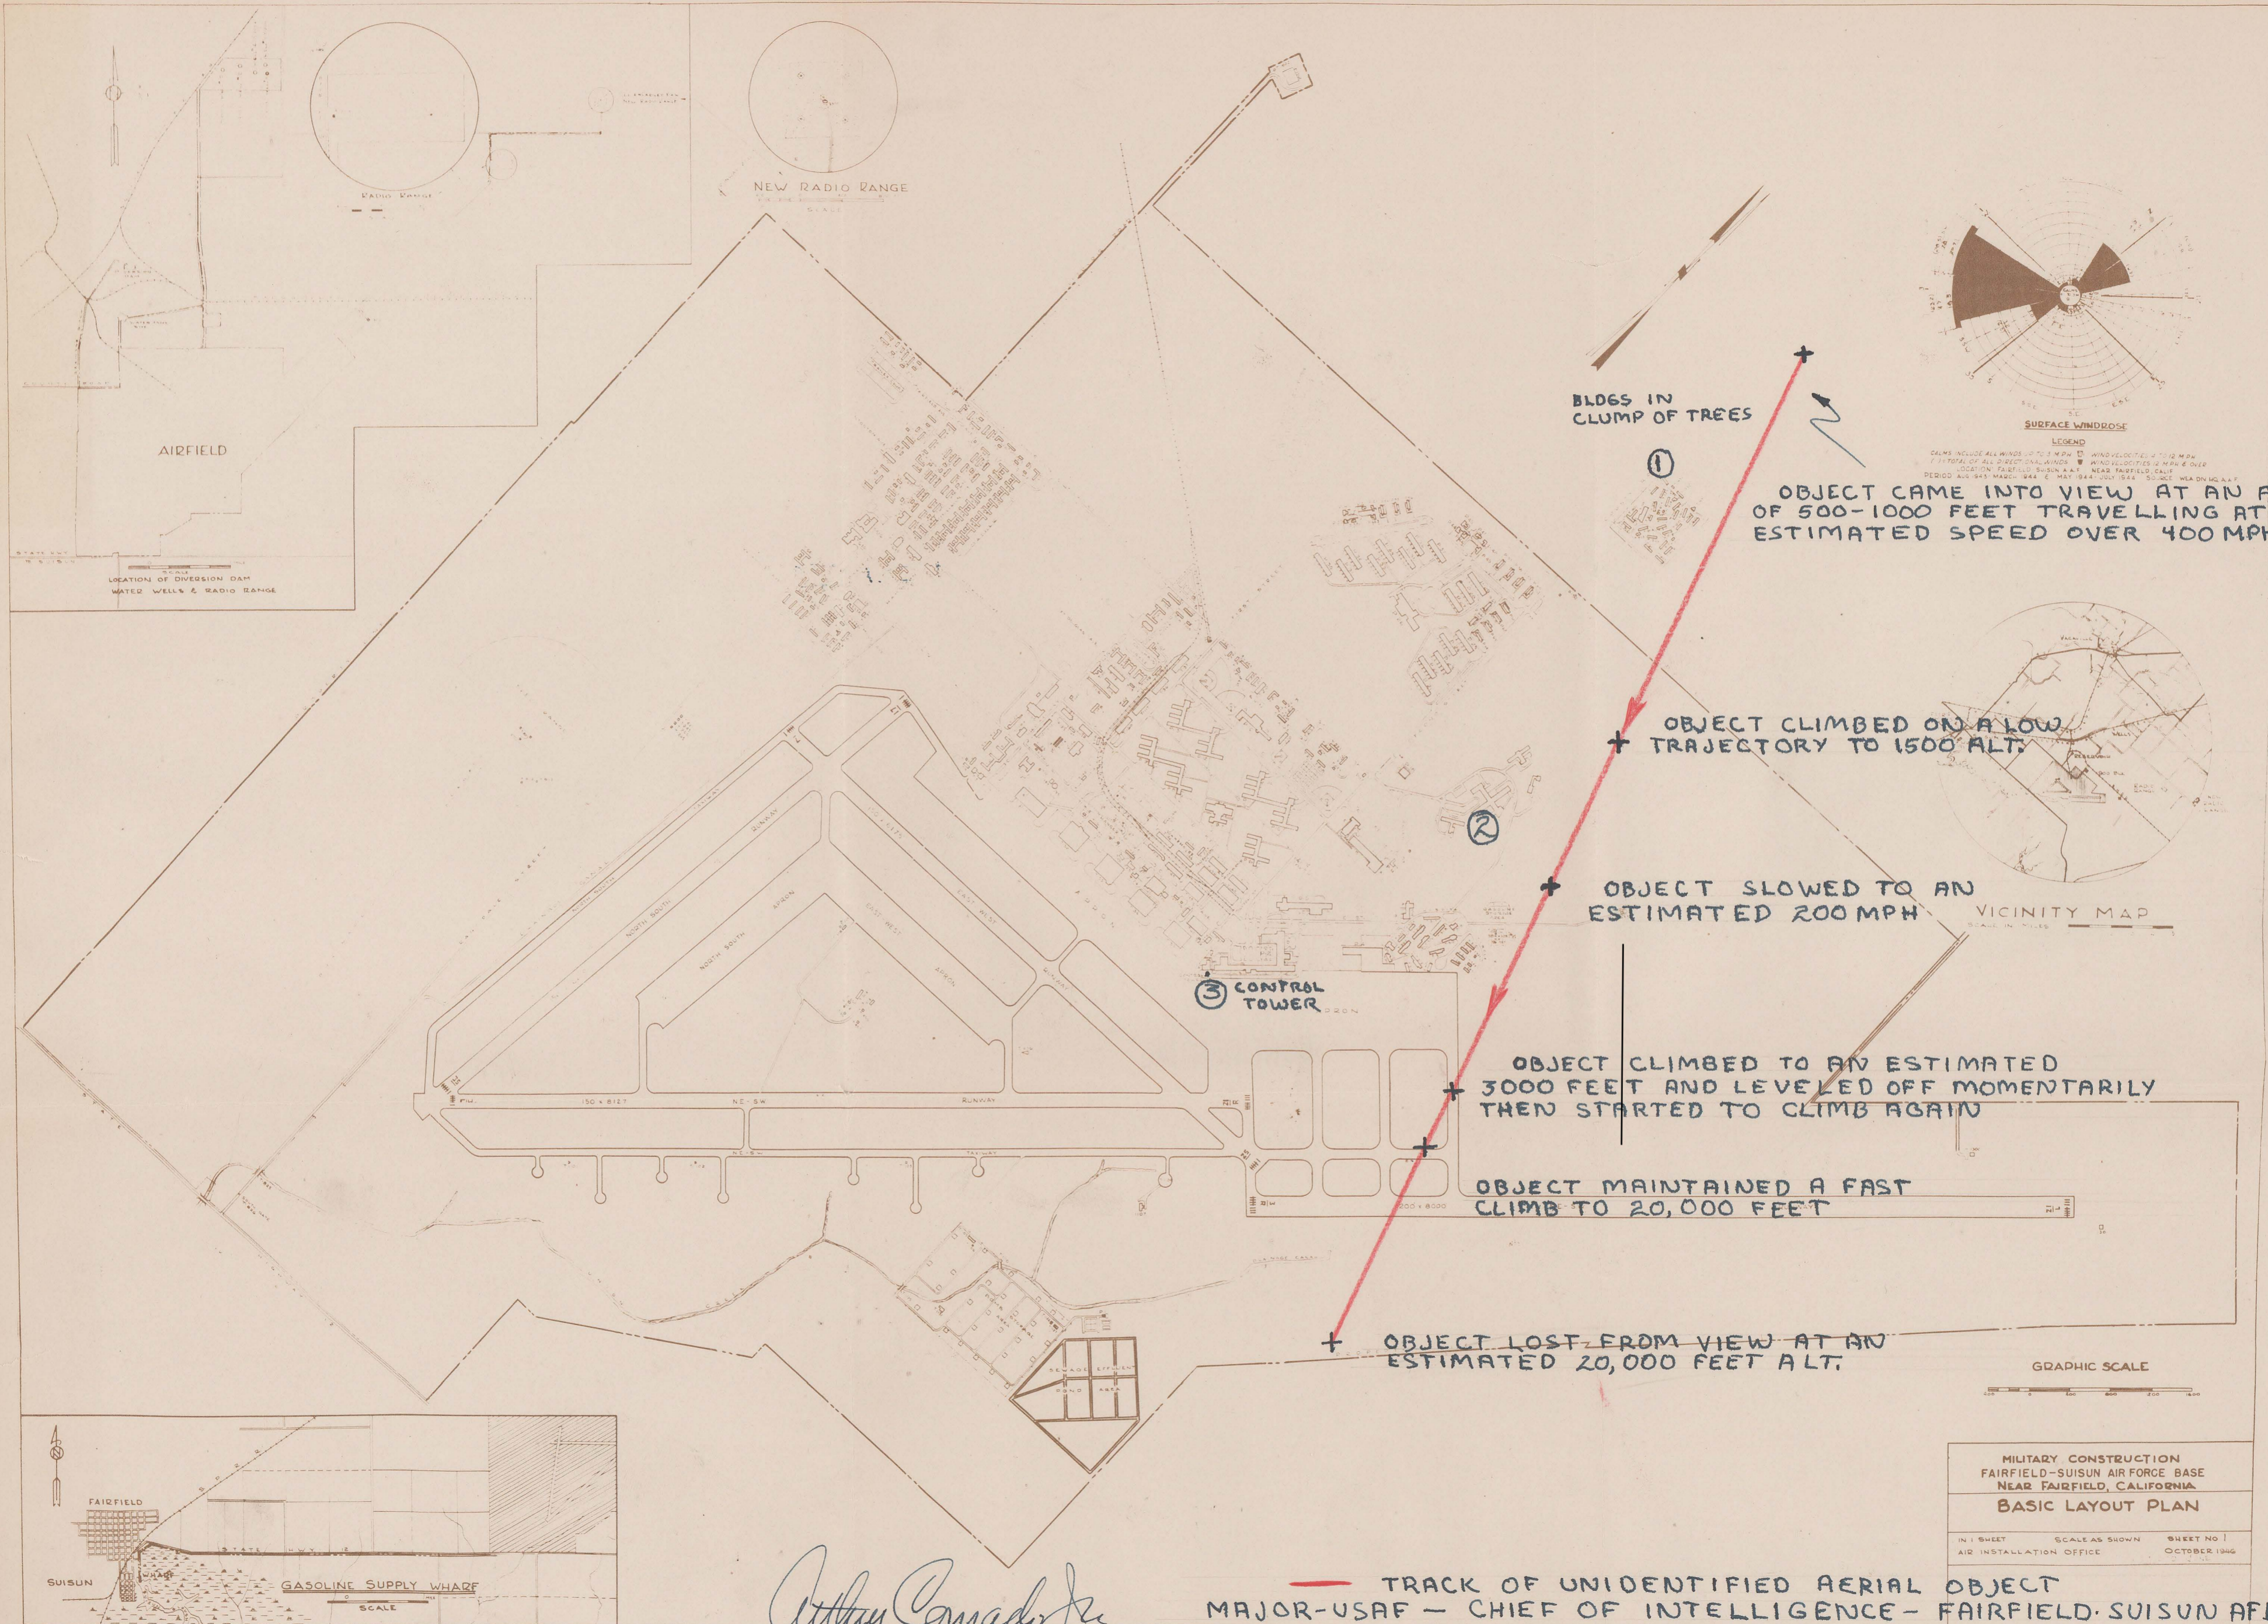

I certify and affirm that the information herein is true and accurate to the best of my knowledge and ability.

Objects)

PROJECT "SIGN"

1. Date of Sighting:

**3 December 1948**

2. Time of sighting  
(Zonal by 24 hr clock)

**2015 hours Pacific Standard Time**

3. Where sighted:

a. Ground:

- (1) City, town:

**Object was sighted by personnel in the Fairfield-Suisun AFB  
Control tower.**

- (2) Distance and direction from city or town  
road, intersections, etc.

**Fairfield-Suisun AFB Control tower is located in the center  
of the AF Base and 5.5 miles east of the town of Fairfield,  
California.**

- (3) From building (story), yard, etc..

**Personnel sighted the object while standing inside the  
control tower 50 feet above ground level.**

- (4) Map coordinates (if feasible) showing  
latitude and longitude:

**North latitude 38° 16'  
West Longitude 121° 56'**

b. Air

- (1) Type aircraft, speed, altitude, direction of flight:

**Not applicable**

- (2) Distance and direction from city or town  
or known landmark:

**Not applicable**

~~CONFIDENTIAL~~

Page 2

FBI Project "SIG" "

(3) Clock position of object from observer's aircraft:

**Not applicable**

(4) Latitude and longitude:

**Not applicable**

c. Sea:

(1) Latitude and longitude:

**Not applicable**

(2) Proximity to land:  
(Name city, country, etc)

**Not applicable**

4. Number of objects:

a. Formation type (if any)  
(sketch if possible)

**One object was sighted.**

5. Distance of object from observer:

a. Laterally or horizontally:

**The object was first sighted at a distance of two miles; it proceeded toward the observer and passed within 500-800 yards of the tower, then climbed out of sight.**

b. Angle of elevation from horizon:

**Approximately 20° when first sighted, then it climbed out of sight.**

c. Altitude:

**Altitude was 500 to 1000 feet when first sighted, then it climbed out of sight at approximately 20,000 feet.**

6. Time in sight:

**Approximately 25 seconds.**

Page 3

FBI Project "SIG"

7. Appearance of object:

a. Color:

**Object was a colorless white light.**

b. Shape (sketch if possible):

**Round light 30 inches in diameter.**

c. Apparent construction (translucent):

**Looked like a searchlight with the light intensity of a runway light.**

d. Size:

(1) Estimated Size:

**Approximately 30 inches diameter.**

(2) Size as it appeared from observer's view:  
(Compared to known object)

**About the size of a 30" diameter searchlight.**

8. Direction of flight:

**NNW to SSE**

9. Tactics or maneuvers:

a. Vertical ascent or descent, horizontal, oscillating, fluttering  
evasive, aggressive, erratic, etc.

**Came over horizon from altitude of 500 to 1000 feet and when opposite the control tower seemed to slow down then climbed to about 3,000 feet, seemed to hesitate again and then climbed almost vertically out of sight at an altitude estimated to be 20,000 feet. See description contained in statement in paragraph 8 of the General section below.**

Page 4

FEI Project "SIG"

10. Evidence of exhaust:

a. Color of smoke:

**No exhaust was observed.**

b. Length and width:

**None observed.**

c. Odor (if any):

**No odor was detected by the observers inside the control tower.**

d. Rate of evaporation:

**None.**

e. Does trail vary with sound?  
(spurts)

**No trail observed.**

11. Effect on clouds:

a. Opened path thru clouds:

**No clouds were present where the object climbed.**

b. Formed cloud or mists:

**No cloud or mists were formed.**

c. Reflected on cloud:

**No reflections were observed.**

d. Shown thru cloud:

**No clouds were between observer and object at any time.**

12. Lights:

a. Reflected or attached:

**The object itself resembled a light.**

b. Luminous:

**The object shone with the brightness of a high-intensity runway light.**

Page 5

EFI Project "SIGN"

- c. Blinked on and off in relation to speed:

**Object was a steady light.**

13. Support:

- a. Wings:

**No wings were observed on the object.**

- b. Aerodynamic lift of fuselage:

**No fuselage was observed.**

- c. Vertical jet:

**No jet was observed.**

- d. Rotating cylinder or cone:

**No cylinder or cone was observed.**

- e. Aerostatic lift (balloon or dirigible):

**No aerostatic lift condition was observed.**

14. Propulsion:

- a. Propeller or jet:

**No propeller or jet was observed.**

- b. Rotor:

**No rotor was observed.**

- c. Aerodynamic vanes (flapping or oscillating)  
(Katzmayer effect):

**No aerodynamic vanes were observed.**

- d. Visible exhaust or jet openings:

**No exhaust or jet openings were observed.**

15. Control and stability

- a. Fins:

**No fins were observed.**

Page 6  
EEI Project "SIGN"

b. Stabilizers

**No stabilizers of any kind were observed.**

16. Air Ducts:

a. Slots:

**No slots were observed.**

b. Duct openings:

**No duct openings were observed.**

17. Speed-MPH:

**Came over the horizon from NNW at approximately 400 MPH slowed to approximately 200 MPH and then climbed at 400-500 MPH out of sight.**

18. Sound:

a. Continuous whine or buzz:

**No sound of any kind was heard by the observer.**

b. Roar, whistle, whoosh:

**No sound was heard.**

c. Intermittent:

**No sound was heard.**

19. Was any radio antenna to be observed, i.e., (any projections or extensions that might presumably be construed as such):

**No radio antenna of any description was observed.**

20. Manner of disappearance:

a. Explode:

**The object did not explode.**

(1) Possibility of fragments:

**No fragments were observed or could be found from the object.**

(2) Other physical evidence:

**No other physical evidence of the object could be found.**

Page 7

FBI Project "SIGN"

b. Faded from view:

**The object climbed out of sight.**

c. Disappeared behind obstacle:

**The object climbed out of sight in a clear sky.**

Relative to the Observer

1. Names of observers:

**Joseph Don Delafayette  
Sgt AF 12106504  
Honorably discharged from the  
service 6 December 1948.**

**Bruce Earlin McFarland  
Pfc AF 16278687**

2. Address:

**DeLafayette  
R.D. 1, Ballston Spa  
New York**

**McFarland  
1901st AACS Squadron  
Fairfield-Suisun AFB, California**

3. Occupation:

**DeLafayette - Unknown**

**McFarland - Control tower operator**

4. Place of business:

a. Employer or employee:

**DeLafayette - Unknown**

**McFarland - USAF**

5. Hobbies:

a. Time engaged in hobby (experience)

Is observer amateur astronomer, pilot, engineer, etc.

**DeLafayette - Unknown**

**McFarland - Pfc McFarland, prior to military service, was for three years a radio announcer and was well trained as an announcer of sporting events. No other hobbies are engaged in by Pfc McFarland.**

Page 8

EFI Project "SIGM"

6. Ability to determine:

a. Color:

**Both observers are required by high physical requirements to know colors.**

b. Speed of moving objects:

**Observers are constantly required to estimate the speed of moving aircraft in the course of their normal duties.**

c. Size at distance:

**Observers are constantly required to estimate the size and distance of objects in the course of their normal duties.**

7. Reliability of observer:

a. Sources:

(1) Neighbors:

**Both observers are considered fully reliable, competent airmen by their fellow NCO's.**

(2) Police Dept:

**No police record on the observers.**

(3) FBI records:

**No FBI records on the observers.**

(4) Employer:

**AACS officer in charge of the observers consider them high type individuals fully qualified both mentally and physically for control tower duty; they are considered competent, reliable observers psychologically stable.**

8. Notes relative to observer on:

a. Sightings in general:

**Both observers are considered competent, reliable and psychologically stable.**

~~CONFIDENTIAL~~

Page 9

EEI Project "SIGM"

b. How attention was drawn to objects:

(1) Sound:

**No**

(2) Motion:

**Yes**

(3) Glint of light:

**Yes**

9. Witnesses:

a. Addresses:

**No other witnesses could be found. The object was in view too short a time to obtain the observations of other personnel.**

10. Comments of interrogator re intelligence and character of person interrogated:

**Both observers are considered competent, reliable and psychologically stable. Pfc McFarland has a General Classification Test Score of 143.**

Relative to Radar Sightings

**No radar sightings of the object were made or could be obtained.**

GENERAL

1. Teletype sequences of local weather conditions:

**3 December 1948 at 2030 Pacific Standard Time, Fairfield-Suisun Air Force Base, Ceiling 3000 feet scattered 15 miles visibility, 1014.6 millibars, temperature 44°, dewpoint 32° F, wind 10 MPH from the west, Altimeter setting 29.95 inches.**

2. Winds aloft report:

**Winds aloft sequence for 032315Z December 1948 follows: SUU 21 02312 2513 22809 3109 43213 3016 63017 3019 82920 2923 03022 23017 42823.**

~~CONFIDENTIAL~~

CONFIDENTIAL

Page 10

FEI Project "SIGN"

3. Local flight schedules of commercial, private and military aircraft flying in vicinity at the time:

**No flying was scheduled or observed in the vicinity of the Fairfield-Suisun Air Force Base at the time of the observation.**

4. Possible releases of testing devices in vicinity sent aloft by Ordnance, Navy, Air Force, Army, Weather Units, Research Organizations or any other:

**A winds-aloft balloon was released 35-45 minutes prior to the sighting and was lost from view 10 minutes after release.**

5. If object contacted earth, obtain soil samples within and without depression or spot where object landed (and then presumably departed) for purposes of making comparison of soils:

**Object made no apparent contact with the earth and no contacts could be found.**

6. If object came sufficiently near other aircraft or known objects, check surfaces with Geiger counters for possible radioactivity. Make comparisons with other unaffected aircraft, objects, etc.

**Object did not come sufficiently near known objects to obtain radioactivity readings.**

7. Obtain photographs (or original negatives) where available; if not, secure sketches of:

- a. Object:

**Object appeared to be a round light 30 inches in diameter.**

- b. Surrounding terrain where object was observed:

**Annotated photographs and diagrams of the Fairfield-Suisun Air Force Base are attached as enclosures 1 and 2 to this report.**

CONFIDENTIAL

CONFIDENTIAL

Page 11  
EEI Project "SIGM"

- c. Place where object contacted earth (if this happened):

**Object did not contact the earth.**

- d. Maneuvers:

**The object maneuvered as described in statement contained in enclosure #3 and indicated in enclosures #1 and #2 to this report.**

- e. Formation (if more than two):

**One object was sighted..**

8. Secure signed statement:

**Statement attached as enclosure #3 to this report.**

9. Obtain fragments or physical evidence where possible:

**No fragments or other physical evidences of the object were obtained.**

5 January 1949

SUBJECT: Reporting of Information on Flying Discs

TO: Commanding General  
Air Materiel Command  
Wright-Patterson Air Force Base  
Dayton, Ohio  
ATTN: TSDIN

1. In compliance with Group Letter 205-3, dated 22 September 1948, the following information is submitted.

- a. (1) Object was sighted two (2) miles East of Jackson, Mississippi at 1700G, 1 January 1949.
- b. Weather at the time: See inclosure number one (1).
- c. Names, occupations, and addresses:  
Thomas A. Rush  
Airport Manager, Dixie Airport  
402 Mitchell Ave.  
Jackson, Mississippi  
  
Mrs. Thomas A. Rush  
402 Mitchell Ave.  
Jackson, Mississippi  
  
Mrs. T. A. Deelittle  
Housewife  
3777 Kings Hwy  
Jackson, Mississippi
- d. Photographs of object: None
- e. Sketches of objects: See inclosure number two (2).
- f. Object sighted:
  1. Number: One (1).
  2. Shape: Cigar like. Not unlike sleeve target.
  3. Size: Approximately 60 feet long and 10 feet diameter at the front tapering to the rear.
  4. Color: Dark blue or black

RESTRICTED

RESTRICTED

Cont'd SURJ: Report of Information on Flying Discs

5. Speed: Approximately 200 MPH when first sighted, then accelerated to approximately 400 to 500 MPH.
6. Heading: West, turning to South to Southwest.
7. Maneuverability: Not noticed.
8. Altitude: 1500 to 1600 feet, then gradual climb.
9. Sound: Roar.
10. Exhaust trail: None.

g. General remarks: The persons who sighted the above described object were enroute from Gulfport, Miss. to Jackson, Miss. in a private aircraft and were making an approach for a landing at the Dixie Airport when the object was first sighted. After landing, Mr Rush called the control tower at Hawkins Field to find out if the object had landed there and if so to find out its identity. The control tower reported the incident to Base Headquarters.

1. The following report of an object observed by 1st Lt. James Toomey is submitted in compliance with Secret Letter dtd 20 Oct 48 from MATS Headquarters, subject: Reporting of Information on "Flying Discs".

a. Location and time of sighting - 117° 30' W Longitude  
56° 10' N Latitude  
1418Z 17 November 1948

b. Weather at the time - Weather at the time was overcast with tops at approximately 4500' MSL with a high deck of thin broken stratus clouds at approximately 12,000 ft.

c. Names and occupations and addresses of witnesses - S/Sgt Onno C. Blink, AF 20715676, Radio Operator on the crew and stationed at Edmonton, Alberta, Canada.

d. Photographs of objects, if available. No photographs available.

e.

f. Object sighted:

- (1) Number - One
- (2) Shape - Egg shaped with a tail
- (3) Size - Approximately 50' in height tapering to a point at the tail.
- (4) Color - Bright flaming orange
- (5) Speed - Unknown
- (6) Heading - South West

1. Any information pertaining to the sighting of so-called flying discs, which is secured by or comes to the attention of Air Force installations within the United States and Alaska, will be forwarded direct to the Commanding General, Air Materiel Command, Wright-Patterson Air Force Base, Dayton, Ohio, Attention: TSDIN.

2. Such reports will be sent direct, and not through ordinary channels, but copies of all such information may be supplied the Command Headquarters of the installation concerned.

3. In observing the above procedure for reporting information on flying disc sightings, every effort will be made to include the following items:

- a. Location and time of sighting
- b. Weather at the time
- c. Names, occupations and addresses of witnesses
- d. Photographs of objects, if available
- e. Sketches of object's configuration
- f. Object sighted:

SUBJECT: Unidentified Flying Objects

2 January 1949

TO: Commanding General, Air Materiel Command  
Wright-Patterson AF Base, Ohio  
ATTN: MCIAXO-3

1. Reference letter, Headquarters USAF, subject: "Reporting of Information on 'Flying Discs.'" dated 6 February 1948 and Flight Service Regulation 200-4 dated 2 November, subject: "Unidentified Flying Objects," the following information is submitted:

- a. Location and time of sighting: Two (2) miles east of Jackson, Mississippi at 17000, 1 January 1949.
- b. Weather at time: The 16300 weather sequence from Jackson, estimated 18,000 feet, broken clouds, visibility 15, temperature 53, dew point 35, surface wind south-southwest at 7 mph, altimeter setting 3003, remarks, estimated 35,000 feet thin broken.

The 17300 weather for Jackson was ceiling measured 16,000 feet, overcast, visibility fifteen(15) miles, temperature 52, dew point 29, wind south at one (1) mph, remarks, breaks in the overcast.

- c. Names, Occupations and addresses of witnesses:

Mr. Tom Rush, 402 Mitchell Avenue, Jackson, Mississippi  
Employed by Dixie Air Service at Jackson, Mississippi as  
a pilot. He is an ex-AAF pilot. Telephone Jackson- Miss-  
issippi 5-1064.

Mrs. Willette Rush, 402 Mitchell Avenue, Jackson, Mississippi,  
wife of the above, housewife and private pilot.

- d. Photographs, if available: None available.
- e. Sketches of objects configuration: To be forwarded.

Ltr fr Maxwell Flight Service Center, Maxwell AF Base, Ala dtd 2 Jan 49  
Subj: Unidentified Flying Objects

f. Object Sighted, description:

- (1) Number: One.
- (2) Shape: Cigar-shaped, with short stubby wings, resembling a rocket, also reported later as resembling a sleeve tow-target.
- (3) Size: Estimated sixty (60) feet long.
- (4) Color: Dark Blue or black.
- (5) Speed: Initially estimated as 200 mph, then increasing to 5-600 mph.
- (6) Heading: West when first sighted, then southwest when last sighted.
- (7) Maneuverability: Apparently very maneuverable.
- (8) Altitude: 1500 feet.
- (9) Sound: Similiar to a helicopter.
- (10) Exhaust trail: None visible.

g. General remarks:

- (1) When the object was first sighted and reported to Flight Service at Maxwell AF Base at 1735G by the Jackson Operations Office, an attempt was made to investigate the object by calling all military airfields in the area from which a jet or rocket flight may have originated, or at which the object may have been sighted.
- (2) The following stations were contacted:
  - (a) Eglin AF Base, Florida
  - (b) Pensacola NAS and Chevalier Field NAS, Florida
  - (c) Whiting NAS, Florida
  - (d) New Orleans NAS, Louisiana
  - (e) Memphis NAS, Tennessee
  - (f) New Orleans Air Route Traffic Control Center was also contacted.

Subj: Unidentified Flying Objects

(3) No information was available at any of these stations.

2. The object was sighted by the witnesses from a Stinson civilian aircraft, and no photographs were taken because no camera was available. At the time of sighting, the Stinson was 3 or 4 miles east of Jackson, Mississippi on the east leg of the Jackson radio range at approximately 1200 feet altitude.

3. At 1840C on 1 January 1949, New Orleans Air Route Traffic Control Center reported to Maxwell Flight Service Center that the Associated Press had advised them that the above mentioned object had been sighted 40 miles south of Jackson, Mississippi. This second report was evidently the same as the above because the reporting pilot was the same, i.e., Mr. Tom Rush. Maxwell Flight Service contacted Mr. Rush, who is preparing sketches of the object he reported. He also advised that he saw the object only once.

Wright-Patterson Air Force Base  
Dayton, Ohio  
ATTN: TEDIE

1. In compliance with 21023 Air Weather Group TWX 454 dated 19 November 1948 and letter, Headquarters, United States Air Force, subject as above, 6 February 1948, the following report is submitted:

- a. Chanute Air Force Base, Illinois, 090046Z.
- b. High scattered clouds, visibility ten miles.
- c. Sgt. James E. Doty and Sgt. Eugene E. Montag, Weather Observers, Det 16/11, 16th Weather Squadron, Chanute AFB, Illinois.
- d. Photographs of objects - none available.
- e. Sketches of objects - None available.
- f. Object sighted:
  - (1) One
  - (2) Round
  - (3) Undetermined size
  - (4) Bright white color
  - (5) Two tenths of distant sky within two to three seconds.
  - (6) Heading from north east toward south south west.
  - (7) Undetermined maneuverability.
  - (8) Undetermined altitude.
  - (9) No sound
  - (10) Exhaust trail undetermined.

g. General remarks:

Object sighted to north east moving to south south west that resembled a skyrocket or meteor but was moving upward fifteen degrees. Object was described to be about thirty five degrees above the horizon and traversed across thirty five degrees of the horizon within three seconds and disappeared.

STATEMENT

9 December 1948

I, James E. Doty, Sergeant, USAF, AF 17171564, Weather Observer, 16th Weather Squadron, Chanute Air Force Base, Chanute Field, Illinois, do hereby make the following statement to Captain Hugh T. Kelley, Assistant Base Weather Officer.

On 8 December 1948 at approximately 18:16 hours, I was walking with Sgt. Eugene S. Montag towards the Base Weather Station when I happened to look up at the sky and noticed what appeared to be either a sky rocket or meteor. I tapped Sgt. Montag on the arm and called his attention to it.

The object did not appear to be a star because it was three or four times as large as a star and it seemed to be closer to us than a star would be. It was heading from the north east toward the south south west and was moving upwards at about 15 or 20 degree angle. As it moved it seemed to get larger, and it was leaving a trail. In about two or three seconds it disappeared. The object was round, white and moved very fast.

We went into the Weather Station and reported this to the Duty Forecaster whose name is M Sgt. Robert W. Fillman.

STATEMENT

9 December 1948

I, Eugene S. Montag, AF 16208708, Sergeant, USAF, am a Weather Observer assigned to the 16th Weather Squadron, Chanute Air Force Base, Chanute Field, Illinois, and do hereby make the following statement to Capt. Rush T. Kelsy, Assistant Base Weather Officer, Chanute AFB:

On 8 December 1948 at approximately 1816 hours, I was walking with Sgt. James E. Doty, also of the 16th Weather Squadron, towards the Base Weather Station when I noticed what appeared to be a sky rocket or meteor. This object was heading upwards about a 15 degree angle, moving from the north east to the south south west. The object was white in color, very bright and moved about two to three tenths of the sky and then disappeared.

This object did not appear to me to be a falling star.

I immediately went to the Duty Forecaster at the Base Weather Station and reported seeing this.

SUBJ: Observation of an Object in the Atmosphere

- (7) Maneuverability - Appeared to be in a shallow dive.
- (8) Altitude - Approximately 18,000 feet.
- (9) Sound - None
- (10) Exhaust trail or not - Yes

g. Remarks: Object was sighted on the first leg of a flight from Edmonton, Alberta, Canada, to Kittigazuit, N. W. T. Canada while flying at 7,000 ft. MSL on top of an overcast. The object was momentarily sighted above a deck of broken status clouds. It seemed to be a bright flaming orange object and illuminated the sky momentarily behind it.
