Office Memorandum • UNITED STATES GOVERNMENT

TO : DIRECTOR, FBI

DATE: October 9, 1947

FROM : SAC, PORTLAND

SUBJECT: FLYING DISCS
SECURITY MATTER - X.

Reference is made to Portland teletype dated September 13, 1947.

Records of the Radio Dispatcher, Portland Police Department, reflect that first notice of unidentified objects in flight over the city on September 11, 1947 was received from officers in District 18, which is in the extreme north-east section of the city, at 5:21 P.M. The log further reflects that at 5:23 P.M. the radio requested District 14, which is further south, to attempt to locate and identify the objects and that at 5:24 P.M. a report was received from the car occupied by Chief of Police JENKINS, reporting that they had sighted some objects. District 14 at 5:27 P.M. reported seeing nothing unusual in the sky.

ROBERT D. ADAIR, 4325 S.E. Madison Ave., Portland, advised that he was one of the two officers on duty in District 18 on September 11. The car was in the vicinity of N.E. 25th Avenue and Saratoga Court when ADAIR and his fellow officer noticed a number of people looking upward and pointing. Upon looking at the sky ADAIR observed the very bright reflection of the sun on some object which was apparently made of silvery metal. The object was coming from the east and made a wide turn over the city and disappeared to the south. ADAIR estimated its speed at about 150 miles per hour and its altitude at about 5,000 feet. He watched it for a period of about two minutes and during that time it gradually disappeared in such a manner as to appear that the angle was slowly changing, so that the sun was no longer reflected into ADAIR's eyes. He says that the shape appeared to be round but that the glare was so bright that it could have hidden the true outline of the object. There was no oscillation visible - only steady flight. ADAIR believes it was an ordinary metal airplane reflecting light of the afternoon sun.

~~HANDLED BY STOP TIME DEFERRED RECORDING~~

J. R. CALDWELL, 7652 S.E. Lincoln St., Portland, Oregon was ADAIR's partner in District 18 on September 11. CALDWELL states that the object appeared to him to take the same course as that described by ADAIR. He pointed out that the speed, height, and size of the object were difficult to judge, because of the interdependence of the three factors. However, he believes that the object when first sighted was about three miles away and about two miles high. He believes it was traveling at a much greater speed than a conventional airplane and was a great deal larger. It appeared to him to be elliptical in shape, and inasmuch as it did not bank or tip he could not judge its thickness. It was of a very bright silver or aluminum substance.

TO: DIRECTOR, FBI

FROM: SA, NEW YORK

SUBJECT: [Illegible]

RE: [Illegible]

Reference is made to New York teletype dated September 1, 1947.

Records of the New York Inspector, New York Police Department, reflect that first notice of unidentified objects in flight over the city on September 11, 1947 was received from officers in District 14, which is in the extreme north-east section of the city, at 7:25 P.M. The first further reports that 7:25 P.M. the radio reported District 14, which in further course, as stated in reports and locally the objects are that at 7:25 P.M. a report was received from the east side of the city at 7:25 P.M. reporting that they had sighted some objects, identified as at 7:25 P.M. reported seeing unknown material in the sky.

Robert E. Smith, 435 E. 125th Street, New York 29, advised that he was one of the two officers on duty in District 14 on September 11. The sun was in the vicinity of 43rd Avenue and between 125th and 126th Streets. When looking at the sky, Smith observed the very bright reflection of the sun on some object which was apparently made of aluminum metal. The object was coming from the east and made a wide turn over the city and disappeared to the south. Smith estimated the speed at about 150 miles per hour and the altitude at about 2,000 feet. He watched it for a period of about two minutes and during that time it gradually disappeared in such a manner as to appear that the entire area slowly changed so that the sun was no longer reflected into Smith's eyes. He says that the entire appeared to be turned out but that there was no bright light in the sky. He had the true outline of the object. There was no reflection visible - only a steady light. Smith believes it was an extremely metal object reflecting light of the afternoon sun.

J. W. Callahan, 1032 E. 125th Street, New York 29, advised that the object appeared in District 14 on September 11. Callahan stated that the object appeared to him to take the same course as that described by Smith. He pointed out that the speed, height, and size of the object were difficult to judge, because of the interference of the sun's rays. However, he believes that the object was about 1,000 feet high and about 100 feet wide. He believes it was traveling at a high speed and that it was a conventional airplane and was a metal object. He appeared to him to be different in shape, and he could not judge its thickness.

PD 62-1531

Chief of Police LEON V. JENKINS advised that he was travelling south on N. Williams Avenue near Russell St., when he and Officer H. S. RANEY, his driver, received a call on the police radio requesting District 14 to attempt to observe an unknown object in the sky reported by officers in District 18. JENKINS observed what appeared to be a round silver object, about 10,000 feet high, travelling northeast to southwest. It was directly to JENKIN's left when observed first. He thought it was a weather balloon. Further observation convinced him that it could not be a balloon because of its speed which was extremely great. As JENKINS watched, it turned gradually until it was travelling due south, and as it did so, its shape seemed to change until it appeared to be egg-shaped. It disappeared in about 30 seconds.

Patrolman H. S. RANEY stated that when he first observed the object it was straight ahead of him and travelling straight away from his car. RANEY was driving south on N. Williams Avenue. To RANEY it appeared to be just a glare of sun on some object, and he was unable therefore to tell its shape. It appeared to be very high and travelling extremely fast. It was out of sight after he had travelled 4 or 5 city blocks at a speed of about 25 mph. RANEY stated that he has never seen an object at such an extreme height before and that if the sun had not reflected from it he could not have seen it at all. He believes it could possibly have been a reflection from a large airplane at great altitude.

ROBERT W. SHAYLOR, 4810 N. Fessenden St., Portland stated that he was on duty in District 14 with Officer DONALD W. COWLING on September 11, 1947 and received the call to watch for the object flying over the city. SHAYLOR and COWLING immediately scanned the sky from a vantage point in open territory where they could see the entire sky. They saw nothing in the sky at that time, SHAYLOR stating that they did not even see any airplanes.

A short article in "The Oregonian", Portland daily newspaper, for September 12, 1947, describes the object as seen by Chief of Police JENKINS and also states that "The Oregonian" received several calls from other persons reporting the object. FRED M. WHITE, Assistant City Editor, advised that the paper has no record of the identities of the people making the calls.

Office Memorandum • UNITED STATES GOVERNMENT

TO : Director, FBI

DATE: 10/18/47

FROM : SAC, Anchorage

SUBJECT: REPORT OF FLYING DISCS

This is to advise that we have been able to locate a flyer, JACK PECK, who is employed by the Al Jones Flying Company in Bethel, Alaska. It had been reported to Military Intelligence that Mr. PECK and his co-pilot VINCE DALY had observed some flying object near Bethel, Alaska, in July, 1947. Efforts previously to contact Mr. PECK were negative until the above instance.

He related that the occasion of seeing the flying object near Bethel was on a July day when the sky was completely clear of clouds, and it being during the early part, it is daylight the entire night. The time of his sighting this flying object was about 10 PM and the sun had just dropped beyond the horizon. Flying weather was extremely good and he, with Mr. DALY, was coming into the Bethel Airport with a DC-3. He observed the flying object immediately to his left and stated that it apparently was observed at approximately the same time by Mr. DALY and both of them manipulated the controls of the plane making efforts to miss the object inasmuch as they could not tell in which direction it was going. They made a forty-five degree turn in order to get out of the way of the object and then noted that it appeared to be going away from them. He described the object as appearing to be some flying wing and said that it appeared to be about the size of a C-54 without any fuselage. He could not see any propellor or any exhaust from jet propulsion or any vapor trails and could not estimate the size due to his failure to be able to estimate the distance he was away from the object. He was flying at 1,000 feet and stated that he tried to catch up with the object and increased his manifold pressure to approximately 42 inches and was traveling at the rate of 170 miles per hour.

He called on his radio to the Civil Aeronautics Administration station at Bethel, asking what aircraft was in the vicinity and they had no reports of any aircraft. The object he sighted was some five or ten miles from the airport before his arrival and stated that the path did not go directly across the airport. He, of course, could not tell whether the object was making any noise and stated that it was flying at a thousand foot altitude and estimated travel at 300 miles per hour. It was traveling in the direction from Bethel to Nome, which is in a northwesterly direction. He noted no radio interference and is unable to describe the color other than that it appeared dark but of definite shape and did not blend into the sky but had a definite, concise outline. Both he and Mr. DALY clearly observed the object at this time.

SUBJECT: FLYING DISCS
A. COURTNEY PARKER, INFORMANT

Reurlet dated 9/25/47.

An Agent of this office contacted Mr. A. COURTNEY PARKER at his residence in South Royalton, Vermont and he stated that all the information he has concerning the flying discs he saw, is set forth in the letter that he sent to the Bureau dated September 17, 1947.

Mr. PARKER advised that as far as he knows, no one else in South Royalton saw these flying discs, and that he believes he saw them inasmuch as he has unusually good eyesight and that he can see bees, etc. further than anyone else. He stated that possibly these flying discs were out of the range of normal vision. Mr. PARKER was asked to furnish any additional information that comes to his attention concerning these flying discs directly to the Air Forces since they now handle matters of this type.

No further action is being taken by this office.

This is just a wild guess. 2
It is not possible that there
was something of a new delayed
fire started starter object. (Please
do not laugh) You know about
all those little plane looking
fuzes, one time bombs to start
fuzes in ship, and is it
possible some new invention was
designed for this sabotage, because
that is what all the people I
meet think of those fuzes and
airplane bombs.

They are not
accidents.

We have had dry
spells be fore, but did the
whole country burn up at the

same time? 'May it would be
a good idea to ask the people
in the ruined crews if any
of them had seen a disc and
how long a go.

I know we have
the smartest men in the world in
our F. B. I. and I do not presume
to tell you people what to do, but
maybe there is some connection.

In any event I think you
people should start protecting our
country the same as you did in
War Time.

Because whatever you
people think, we are at war with
some one, Only they are hunting

our dad and me are taking a
sifting of, and our government
does not seem to know it.
But I am sure you will find
the guilty ones.

Yours for success for our
American who is friend of her
country,
Grand Ma McCaul

Dear Sir.

With all these forest fires in main and out west in our country I was wondering whether the flying discs had anything to do with it. Was that just a myth or did they exist. If so could not they have been incendiary falling to earth then with drought and heat from the sun ignite. Were not the discs seen flying over main Vt. and western states are the western states that have forest fires the same ones reported to have seen the flying discs.

I have great respect for your bureau or should I say our. In every way the F. B. I. has been excellent. I visited the Bureau while in Washington some years ago.

I do hope I haven't taken up to much time but couldn't stop thinking of it. All Americans must be alert but not overdo.

We have quite a lot of different foreigners settling up here with plenty of money. Like the back woods I guess. Keep to themselves too.

November 2, 1947

Dear Sir

In regards to the "flying saucer" mystery which recently received national publicity, I, as a citizen would like to ask a few questions. If you, as head of the FBI, would be so kind as to answer I would be greatly appreciative.

First, has the FBI been and is the FBI still investigating the "flying saucers"?

Second, were copies of the July 9th 1947 issue of the Arizona Republic, published in Phoenix, Arizona confiscated by the FBI?

Third, is the FBI investigating the "Shaver Mystery" in which an author named Richard S. Shaver claims there are people

RECORDED
EX-125
62-83894-136
NOV 14 1947
NOV 22 1947

living underground who have been there
for centuries?

Fourth, has a newsreel, which appeared
in a Los Angeles theatre showing Russian
scientists examining a crashed flying
saucer, been suppressed by the FBI?

Fifth, Does the FBI consider knowledge
of the "flying saucers" too dangerous for the
general public to know?

Though the above questions may seem
a trifle silly, I would appreciate an
answer to them, if at all possible.

Thanking you for your courtesy in reading
this and hoping for an answer, I am

Sincerely yours

Port Allegany, Pa.
November 18, 1947.

Federal Bureau of Investigation,
Pittsburgh, Pa.

Gentlemen:

Following the appearance in this town on November 6, 1947, of a Mr. Joe Lippincott, Director of the Eastern Area, Red Cross, Pittsburgh, Pa., as "speaker of the evening", at the annual local Red Cross dinner, I was told by Dr. H. E. Cromwell, local practicing dentist, that in a personal conversation, following the dinner, Mr. Lippincott told him that the "saucers" reported as seen in various parts of the country, were actually from Spain. He said that Mr. Lippincott said that this had been ascertained by the Government in Washington, but that it was not being made known. He said that Mr. Lippincott had been in Europe and inferred that he had been in Spain and knew conditions over there. Dr. Cromwell is a man active in the Methodist Church and the local Protestant Mens Club, and it is easy to see how far this report can be spread. The fact that the Federal Government indorses the Red Cross makes a statement of an official representative of that organization almost indisputable.

As a representative ~~the~~ of the Federal Government and as a citizen interested in truth and World peace and racial and religious harmony in our own country, I question the advisability of an accredited representative of the Red Cross giving out this information, even "off the record". I thought you might be able to check with Mr. Lippincott or his organization.

Yours very truly,

Mary C. Teater

In the January, 1948, copy of "Amazing Stories" magazine; published by Ziff-Davis Pub. Co. (one office in Washington, D.C.); my letter was printed under the heading of "Flying Saucer Witness" (page 167). Here is a copy of it:

Sirs:

I have just finished reading the October issue of "Amazing Stories", in which you ask for "flying saucer" information.

Here is what I know: On June 28, 1947, at 3:43 P.M. my brother saw the flying saucers - about seven to ten of them - which flew directly over our house. He said they went like "blue blazes" - didn't make any noise and were heading approximately South. (Rockfield, where my brother's farm is, is just 16 miles northwest of Milwaukee.). But what is really strange is that same afternoon the discs were seen over Illinois (they must have been the same ones). This information was given on June 29th - Sunday - over WGN - "The Latest News" at 8 to 8:15 A.M. with Charles Sebastian. He reported that the discs had been sighted over Illinois the preceding afternoon.

Perhaps the information is valueless to you. At any rate please keep this confidential. Our neighbors think we're slightly "queer" to have seen the discs. (I didn't see them but I believe my brother.)

I have been following the Shaver

2

stories and I hope you have many (3)
more of them.

Marion Beucher
Menomonee Falls, Wisc.

(Ed. note) The flying saucers are real, and you can be sure of that! Let your neighbors think what they will, in a few months you will be able to prove how good your brother's eyesight is! Thanks for your report, and we hope many more readers send them in. Rough drawings would also be helpful. - Ed.

The editor had asked for letters from readers who saw the flying discs, mentioned so much in the news. Several times the editor (Ray A. Palmer) has mentioned in "Amazing Stories" that he has been threatened.

In the same issue (Jan. 1948) on page 162, is a letter from W. C. Hefferlin, following:
Yes, We Remember!

Svc:

Enclosed is a newspaper clipping, just one of many items showing up of like nature. Thumb nail sketches.

Remember the article "Circle-Winged Plane" as printed by you in "Amazing Stories" magazine, September, 1946, page 157? You have desired facts and confirmation. Now, re-read that article, again, please.

The planes seen at Golit, Ill., Kansas

City, Oklahoma, Seattle, etc., were not the (4)
same group of planes but other groups of the
same type, all on a world-wide "mapping expedition".

They are only a few of the many belong-
ing to a world government consisting of all the
oppressed peoples and dominated nations of the
earth, of all colors, races, and creeds.

This government is directed and advised
by an organization headed by "The Ancient
Three, who were, who are, who will be." They,
who at one time over a year ago, sent a
message to you by way ~~of~~ of us. Their
headquarters is "Rainbow City", Antarctica.

Permission is given to print this letter,
if desired.

W. C. Keffertlin
Ray-Dix Mfg. Co.
Livingston, Mont.

(Ed. note) We print your letter because it is
interesting. We don't know if it is true, naturally.
We do know, however, that the "flying
saucers" are no mirage. As for Rainbow
City, if it's what you say it is, we'd sure like
to pay it a visit. That sort of thing, which is
the utopia all science-fiction writers have
dreamed about, is just not visible anywhere in
the civilized world. If it exists at the South pole,
near that warm spot Byrd found, and it
has what you intimate, we'll be waiting for
the saucers to come back and bring peace to this
nasty-minded old planet. Only we wonder how it

✓

could be done - peace doesn't come by force. Per- (5)
haps. the way it will ever be done is to wipe
the slate clean, and just start off as veritable cavemen,
shocked to sanity by utter destruction. In that
case, maybe the "last" war is our "last" hope? A
peculiar viewpoint, but it has amazing logic. We
never met the man who could learn how a kick
in the pants feels without getting a kick in the
pants. as for the saucers - maybe you're shoot-
ing in the dark - because your editor knows
what he's talking about there! But even if you are,
we'll forgive you, because your motives are so
obviously of the good kind. Thank you for your
letter. it wasn't really necessary. Our readers have
not forgotten your article - and how they wrote us about it! - Ed.

Please notice where Keffelerin says - "govern-
ment of ... all oppressed peoples ..." They want
all rights and privileges that there are, yet
want to deny them to others, especially the freedom
of free speech, as witness from "Rainbow City" telling
me to "keep quiet"! and why did they number
their letter to me "1" - are they intending to
write more?

as my letter is a warning letter with a
threat, and coming through the U. S. mail, I am
sending it to you personally so that it can
be investigated. Please keep this confidential,
since under the circumstances, I do not feel entire-
ly safe.

Thanking you,

Very truly yours,
(Miss) Marion ~~X~~ Beuscher
604 West Main St.
Menomonee Falls, Wisc.

RECORDED

Miss Marion Beuscher
604 West Main Street
Menomonee Falls, Wisconsin

Dear Miss Beuscher:

Your letter of January 5, 1948, has been received and I want to thank you for forwarding information to me relating to the subject you mentioned. The facts you related, however, do not reflect any violation of a Federal statute within the investigative jurisdiction of the FBI. The thoughts prompting your communication are indeed appreciated.

Sincerely yours,

John Edgar Hoover
Director

Dear Sirs:

I have done a lot of thinking about those flying discs ever since your operators called at our home. I have figured out a possible solution that I am passing on to you. If you can see the picture as I see it.

If self propelled bombs were made to travel 83 miles a few years ago, there isn't any reason to believe they could not be made to go 3000 miles a day.

RECORDED

62-83894-139

INDEXED

FEB 13 1948

EX-93

If a foreign country were planning to drop a lot of such bombs on our cities, they would want the exact range, and the only way they could get it would be to make some tests.

ack 2-5-48

Handwritten initials and scribbles

up and off a ways, its course looked like an ellipse to us.

The discs were seen in Texas probably dropped in the gulf. As their sight improved they no doubt dropped some in various places. The one that was seen down Tenn. way, was no doubt aimed at some lake close to Fort Knox. Maybe something went wrong with that one, is the reason it was so plainly visible. Owing to the fact that your operators called at our remote home at 8:00 P. M. on a Sunday evening and also cautioned us to keep mum. I know that the F. B. I. is doing what they care to get a line on these discs. This may help a little. A few nights ago there was a very bright ring around the moon, when I looked at it thro' the same glasses, I could barely see the ring. So this³ proves that what

If they were to drop a bomb here
 and let it explode, it would
 cause a lot of excitement, and
 if they dropped one that didn't
 explode and someone found it
 then there would be excitement.
 So to avoid this, they pick some
 point in Lake Erie, let their
 agents over here, know it what
 place and time to look for
 it. If the projectile plunged in
 the lake, the range finders
 wouldn't have any way to tell
^{just} where it dropped, so the projectile
 must have some sort of tracer.
 So at a certain distance from
 the earth some sort of tracer
 is released, probably something
 like a pin-wheel fire cracker.
 It must remain in the sky
 a while, to give the range finders
 a fix or what ever you call it.
 but in order to remain in
 the sky it must be in motion.
 So this tracer is made to fly
 in a circle. Because it was²

we saw was something definite.

I think this is serious business. So if this letter helps you in any way, I will be well paid.

Respectfully yours,
~~N. J. X MARSHALL~~

Director, FBI - Attention: Assistant Director D. M. LADD

Re: FLYING DISCS
Security Matter - X

Dear Sir:

I am transmitting herewith for the information of the Bureau copies of an enclosure dated February 4, 1948 received from Lieutenant Colonel DONALD SPRINGER, A-2, United States Air Force, Hamilton Air Force Base, California. This enclosure is a confidential letter addressed to the Commanding Generals of the First, Second, Fourth, Tenth, Eleventh, and Fourteenth Air Forces, Air Defense Command, from Headquarters, Air Defense Command, Mitchel Air Force Base, New York, by command of Lieutenant General STRATEMEYER. It concerns the investigation of flying discs by Air Force personnel.

Your attention is particularly called to Paragraph 2, which indicates that certain reports concerning the investigation of flying discs by Air Force Intelligence will be reported to the FBI office concerned. Your attention is further called to Paragraph 2-B, which indicates that "investigations will be coordinated with the FBI Office concerned....."

Inasmuch as these recent instructions of the Headquarters, Air Defense Command, Mitchell Air Force Base, New York, are contrary to the instructions contained in Bureau Bulletin No. 57, Series 1947, dated October 1, 1947, in which it is indicated that all future reports connected with flying discs should be referred to the Air Force and no investigative action taken by Bureau agents, the Bureau is requested to advise this office, as well as other interested Bureau offices, as to whether there has been a change in Bureau policy with reference to the handling of such matters or whether Bureau Bulletin No. 57 dated October 1, 1947 is still in effect.

Very truly yours,

Harry M. Kimball

Headquarters
Air Defense Command
Mitchel Air Force Base, New York

4 February 1948

D 333.5 (CIB)

SUBJECT: Investigation and Reporting of "Flying Disc" Incidents

TO: Commanding Generals, First, Second, Fourth, Tenth, Eleventh, and Fourteenth
Air Forces, Air Defense Command
ATTN: AC of S, A-2

1. The numbered air forces of this command are responsible for the prompt investigation and reporting of incidents relating to "flying discs" which occur within their respective areas. Numbered air force A-2s, after evaluating disc incidents, will determine the extent of investigation. Futile expenditure of military funds and manpower must be avoided.

2. "Flying discs" will be investigated as provided for in Counter Intelligence Incident Cases, taking cognizance of the USAF Operating Intelligence Echelon structure. Where it is evident that witnesses, who were together at the time of incident but who are widely separated at the time of investigation would corroborate each other's story, only one witness need be interrogated. If there is a reasonable indication that a reported incident is a hoax or the fabrication of a publicity seeking individual, no further investigative effort will be expended. However, a report of such circumstances will be submitted to the FBI office concerned.

a. CIC personnel attached to the numbered air forces of this command may be utilized to prosecute the investigation of subject incidents.

b. Investigations will be coordinated with the FBI Office concerned in accordance with instructions contained in letter, this headquarters, D 333.3 EX, subject, "Cooperation of FBI with AAF on Investigation of 'Flying Disc' Incidents," 3 September 1947.

3. Reports will be narrative in style and will cover only those facts pertinent to the subject. Where source credibility cannot be established, or when an incident lacks foundation, the report will merely state same. Two types of report will be submitted on all incidents.

a. Spot Reports (fragmentary reports) will be submitted on all incidents and will be followed by a Letter Report.

b. Letter Reports will be submitted to report the completed investigation of all "flying disc" incidents.

4. Reports will be submitted in duplicate promptly, usually by regular mail. However, Spot reports on incidents of substantial character, i. e., those in which the patent credibility of the witness is beyond challenge and whose technical

ENCLOSURE

FLYING DISCS
SECURITY MATTER - X

Reference is made to your letter in the captioned matter dated February 12, 1948.

You are advised that Bureau Bulletin No. 57 dated October 1, 1947, still applies with respect to flying discs. The Bureau is conducting no investigations concerning flying discs. We will, however, give the Air Forces any information which comes to our attention and will receive any information which the Air Forces volunteer.

The Headquarters of the Air Forces in Washington are being contacted by the Bureau in order to insure that there is no misunderstanding as to the Bureau's position in this matter.

Reference is made to a memorandum to you from Mr. J. P. Coyne in the above-captioned matter dated February 19, 1948. The memorandum indicated that the San Francisco Field Division had received a letter from the headquarters of the Air Defense Command, Mitchel Air Force Base, New York, dated February 4, 1948, entitled, "Investigation and Reporting of 'Flying Disc' Incidents." This communication indicated that investigations should be coordinated with the FBI.

The Agent in Charge of the San Francisco Field Division inquired as to a change in policy regarding the investigation of flying discs. A letter was forwarded to San Francisco advising them that there had been no change in the Bureau's policy. This matter has been discussed by Special Agent S. W. Reynolds of the Liaison Section with Lieutenant Colonel C. P. Martin of the Intelligence Division of the Air Force. Colonel Martin advised Mr. Reynolds that apparently the Air Defense Command at Mitchel Field was not aware of the fact that the Bureau was no longer conducting investigations regarding flying discs. He stated that he would take the necessary action and straighten out the Air Defense Command as to the present policy regarding incidents of flying discs.

March 14, 1948

Mr. Kenneth Wherry
United States Senate
Washington, D. C.

Dear Mr. Wherry:

On March 13 at 2:30, M.S.T. o'clock in the afternoon I witnessed a strange sight in the sky traveling at a very high rate of speed at a very high altitude.

I was first attracted to this sight by a noise of motor or whatever it was. It sounded to me like that of a train rumbling in the distance of from 10 to 12 miles on a still day.

At first glance it looked like it might be a vapor trail left by a high flying plane. But the white streak that was in the sky never changed its shape or did it change in the direction of travel.

It traveled much faster than any plane I have seen traveling in sky high enough to leave vapor trail.

As near as I can describe this sight was that it might appear to be a stream lined train traveling at a very high altitude at very high rate of speed.

This rocket or whatever it might have been was high enough to disappear from sight while it was yet very far above the horizon.

I am not writing this so that it might seem to be another disc, fan or whatever you might call them. I just saw this and it has been on my mind and I thought if there was anything that I could be of help to solve this thing I would write this to you and you can forward this to the proper Dept. if it is necessary. Thanking you kindly

Yours Truly

/s/ Kenneth L. Frasier

HANDLED BY
WTOP DEPT

P.S. ENCLOSURE 62-83894-143
This object was traveling from east to west. It looked like it might have traveled over Denver,

C
O
P
Y

KENNETH L. FRAZIER

Colo. or a little to the south.

I live almost due east about 180 mi. by air and I looked to the south a little to be able to get sight of object.

This object was also witnessed by my son who was with me at the time.

I saw the smoke cloud left by so called meteor which exploded over at Norton_Kans. This object was not a bright ball of fire like it was.

The silver streak in the sky traveled as if it were a long connected streak. This did not resemble a line of smoke left by a train traveling along it moved altogether as a unit. If it is not against any regulation and if possible would like to have answer to this object.

April 1, 1948

The Honorable J. Edgar Hoover
 Federal Bureau of Investigation
 United States Department of Justice
 Washington 25, D. C.

Dear Mr. Hoover:

Thank you very much for forwarding
 Mr. Kenneth L. Frasier's letter to the proper
 authorities. Your cooperation in this instance
 was deeply appreciated.

Cordially yours

Kenneth S. Wherry

ATTN: FBI Laboratory

SUBJECT: Project "SIGN"

Gentlemen:

Accompanying this letter is a small sample of soil. This soil was taken from a depression reputed to have been caused by a "flying saucer" described as being approximately two feet in diameter and one foot thick which supposedly settled gently to the ground, rebounded to a height of about twenty feet and then continued on its journey. Although the declivity was immediately covered by a large washtub a heavy rain subsequently filled the depression about one-third full of water before any sample of dirt could be taken.

In an effort to approach this incident objectively to determine every possible clue, it has been deemed advisable to have this soil sample analyzed and tested. Upon inquiry, your Dayton representative stated that the FBI Laboratory would accomplish the required tests.

It is the desire of this Headquarters to ascertain, in particular, if there are traces of unusual elements or alloys adhering to the surface of the particles, or if any abnormality in structure exists showing that the soil was subjected to intense heat, gases or radio-active substances, etc. Unfortunately, in this regard, no one thought to forward a sample of the soil surrounding the depression so no comparison of soils can be made at this time. Should the subsequent test show anything unusual some arrangement could be made to procure some of the surrounding soil so that a comparative analysis could be made. The accompanying sample has not been tested by any other agency, nor will it be.

Specimens: **Addresses**

Letter dated September 9, 1948

Microscopic (Petrographic-Geologic)

Q1 Sample of soil.

Results of Examination:

The sample of soil designated as specimen Q1 consisted of various sized pebbles, sand and dirt. This material was examined for the presence of unusual elements or alloys adhering to the surface of the particles, evidence of intense heat and radioactive substances.

Nothing unusual was noted on the pebbles or in the sand and dirt that would indicate a metallic object had rubbed or scraped against this sample. No abnormality was noted in the structure of the various pebbles and rocks, nor was there any indication of extreme heat or the presence of radioactive substances.

The specimen designated as Q1 will be returned to your office under separate cover by registered mail.

At 10:00 a.m. today, SAC Willis, Houston, called in and stated that Fuller Blackwell, a business man in Houston, Texas, had furnished certain pictures taken by a friend of his, Lonnie Noack of the Humboldt Oil Company, Houston, Texas, and had related that Noack had been flying with a friend in a private plane from California to Houston and that at a point about 30 miles east of Lone Pine, California, some object lying on the ground made a very strong reflection and they made a check to determine what would cause this bright reflection. They finally landed the plane and found an object which could be described as being 8' in diameter with wings about 4' long. The object is about 1' in thickness and in the center there appears to be some type of gyroscope. The wings apparently are fitted with some type of jet propulsion. An examination was made by Noack and his friend and they could find no identifying marks and took photographs of the object they observed.

SAC Willis stated he had informed Lieutenant Robert Fleming of the AAF, Ellington Field, and Captain Bush, the Army representative in Houston, of this object and that Noack would be interviewed that morning in the Houston Office with Lieutenant Fleming being present. Lieutenant Fleming wanted the statements of Noack taken down by a stenographer and he will furnish the stenographer for that purpose.

I instructed SAC Willis to furnish complete details of this matter by air mail special delivery, including a copy of the photograph. I further instructed that he furnish the same details to the proper field office because unquestionably the Bureau would want to run this thing out.

After talking with you, I phoned SAC Willis back and told him to insure the presence of a Bureau Agent at the time this object was examined by the Army Air Forces and that he should make proper arrangements with the office in California to see that an Agent was present. I also told him to advise me of the developments.

Reference is made to the teletype of December 28, 1948, from the Houston Office.

At 3:30 p.m., I called SAC Hood of the Los Angeles Office and instructed that he attempt to locate Mr. Person and Mr. and Mrs. Nathan Smith, secure photographs and film in their possession and also secure from them the location of the described flying disc. I also instructed that Mr. Hood send out sufficient Agents to find the disc and guard it until it could be properly handled by the appropriate Government authority. I also telephoned the Houston Office and told them to send in the photographs or film in their possession, together with the part which had been recovered from the machine by the Informant Noack.

At 5:00 p.m., SAC Hood called back and stated that all work on this matter should be immediately discontinued. They had managed to reach Mr. Nathan Smith and he stated that he knew all about this matter; that it was not a flying disc, but an object which had been identified as a tow kite, which has a disc center and wings. This kite is actually made in Los Angeles by the Olson and Rice Manufacturing Company. A call was made to Olson and Rice, who admitted making a kite along the lines described by Mr. Smith and they explained that they had tried to fly it and it had failed and they had abandoned it.

Mr. Hood stated he did not have full details at the time of his call, but he did have this report from the Agents. Therefore, I instructed that he call Mr. Willis of the Houston Office immediately in order that the film and the part available to the Houston Office will not be forwarded for Laboratory examination.

Soviet War Plans
guided minutes

There are being submitted herewith two photographs of reputedly "flying saucers" which were seen at Oak Ridge, Tennessee, sometime during July of 1947. All of the information contained in this letter was received from Mr. RATHMAN, Chief Investigator, Security Division, Atomic Energy Commission, and Colonel C. D. GASSER, Resident Engineer, Air Material Command, United States Army, who is the principal army technician at the Nuclear Energy for the Propulsion of Aircraft Research Center at Oak Ridge, Tennessee.

Mr. RATHMAN advised that the attached photographs were taken by W. R. PRESLEY in July of 1947. He stated that interview with PRESLEY revealed that he had been snapping photographs of his family in front of his residence at 218 Illinois Avenue, Oak Ridge, Tennessee, late in the afternoon, when he looked into the sky and observed the vapor trail as exhibited by the photograph numbered "1." PRESLEY stated that he took a snap of this trail, was winding the film to the next number, when he looked into the sky and observed the ball of fire as shown in photograph 2. Upon observing the unusual phenomena, he used his last film in taking photograph #2. PRESLEY made these photographs available to reporters of the Knoxville News-Sentinel and a story concerning them was run in that paper; however, as shown by the photostatic copy of the newspaper clipping, which is also being submitted herewith to the Bureau, the print was very indistinct; the news story did not contain any factual information; and it was regarded generally by the public at the time as a possible trick.

ENCLOSURE BEHIND FILM

Later, it was learned by Mr. RATHMAN and Colonel GASSER that PRESLEY had made several copies of this photograph and had distributed them among his acquaintances at Oak Ridge, Tennessee. Upon Colonel GASSER's finding that the photographs had received some distribution, he requested Mr. RATHMAN as Head of the Compliance and Investigations Division, to recover as many as possible of the photographs, advise the persons in whose possession they were found to say nothing to anyone concerning them, and to return the said photographs to him for transmission to the United States Air Force Intelligence Service. Mr. RATHMAN advises that he succeeded in rounding up twenty-four copies of these photographs, and that, according to the statements of PRESLEY, no more copies were made or distributed. RATHMAN further stated that GASSER had appeared extremely concerned over the matter and seemed to be quite emphatic that the matter should be given no more publicity than was absolutely necessary. RATHMAN also advised that he studied the negatives from which the reproductions were made, and they appeared to be authentic in that trick photography should have been apparent, but from the

DEPARTMENT OF JUSTICE

FEDERAL BUREAU OF INVESTIGATION

RECEIVED
GENERAL INVESTIGATIVE DIVISION
JAN 13 10 31 AM '49

There are being submitted herewith two photographs of a person, living
whose name was seen at Oak Ridge, Tennessee, sometime during July of 1947.
All of the information contained in this report was received from Mr. G. H. [Name]
KATHMAN, Chief Investigator, Security Division, Atomic Energy Commission, and
Colonel G. D. GASSER, Resident Inspector, Air Historical Command, United States
Army, who is the principal authority at the National Security Council for the re-
sults of the Research Center at Oak Ridge, Tennessee.

Mr. KATHMAN advised that the attached photographs were taken by W. R. [Name]
in July of 1947. He stated that [Name] was seen in front of his residence at 218
Illinois Avenue, Oak Ridge, Tennessee, late in the afternoon, when he looked
into the big and observed the person as exhibited by the photograph mounted
there. He stated that he took a copy of this print, was wishing the print to
be made, when he looked into the big and observed the print of [Name]
shown in photograph 2. Upon observing the unusual phenomenon, he used the
film in taking photograph 2. KATHMAN made these photographs available to re-
sults of the Research Center at Oak Ridge and a copy concerning them was
sent to the Security Division, Atomic Energy Commission, as a copy of the newspaper clipping
which was submitted herewith to the Bureau, the print was very faint
and it was not possible to determine any further information; and it was
General [Name] at the time as a possible lead.

As stated by Mr. KATHMAN and Colonel GASSER, the person
of this photograph and the person in the photograph of [Name] are
the same person. Upon Colonel GASSER's finding that the
photograph of [Name] was identical to the photograph of [Name] as
the Security Division, to recover as many as possible of
the photographs, advise the persons in whose possession they were found to
return the said photographs to him, and to return the said photographs to him
for transmission to the United States Air Force Intelligence Service, Mr. [Name]
advise that he succeeded in locating a copy of the photograph of [Name]
and that, according to the statement of KATHMAN, no more copies were made or
distributed. KATHMAN had advised that the matter should be given
over the matter and the Security Division should be given
no more copies of the photograph of [Name] and the Security Division should be given
no more copies of the photograph of [Name] and the Security Division should be given

negatives certainly did not appear to be the case. It was Mr. RATHMAN's observation that had the negative been "doped" with some sort of chemical, it would have removed the emulsion from the face of the film in such a way that the negative would have been thin at the point which is supposedly a ball of fire, whereas, in fact, both the vapor trail and the corona of fire are dark on the negative, indicating that it was an actual exposure. It was the opinion of Mr. RATHMAN that the photographs were, without doubt, authentic.

In accordance with Bureau instructions, no active investigation of this matter was made, but it was deemed advisable to interview Colonel GASSER prior to submitting the photographs to the Bureau.

Colonel GASSER predicated his remarks concerning the "flying saucers" or "mystery missiles" by stating that he knew nothing of an official nature concerning them, other than the fact that they were believed by air force intelligence officials to be man-made missiles, rather than some natural phenomena. It was his further belief that a great deal of information had been compiled concerning these missiles by air force intelligence, and that research on the matter was being extensively done at Wright Field, Dayton, Ohio. He also expressed the opinion that information at the disposal of the United States Army Air Force Intelligence had, in all probability, been made available to the Bureau at Washington, D. C.

[Colonel GASSER then continued with his own ideas as to what might be the nature of these discs, which ideas he had formulated through review of those known facts and theoretical conjectures of himself and other scientists concerning the nature of flying discs and methods of propulsion for such type of aerial mechanism. According to him, flying discs have long been a theoretical possibility and, in fact, a possibility which would indicate one of the best means by which to break through the barriers of the supersonic area. Scientists have, for many years, been attempting to develop this type of aircraft. Some experimentation has been done even in the United States, but insofar as is known in the United States at the present time, there have never been any practical developments. As a second factor of consideration, Colonel GASSER stated that insofar as is known to U. S. scientists at this time, there is no known chemical fuel which would make possible tremendous range of flight such as is ascribed to the reported "flying saucers." There is only one possible fuel which could be utilized which is in accord with present theory, and that is the utilization of atomic energy.] As further evidence of this possible means of propulsion, Colonel GASSER called attention to the vapor trail and gaseous corona described as a ball of fire, which he states might give some evidence to the fact that a radio-active field is present. He explained that the corona, or exhaust, has what appears to be layers of intensity which are circular rather than elongated and have no tendency to trail at the extremities, as would be the case if a normal type of exhaust from a combustion engine was being utilized in the propulsion of these aircraft. He continued that the vapor trail left by the missile appears to be one single line of uniform intensity which is extremely slow in dissipating. It was pointed out by him that in the case of a normal

Atomic Energy Missile

vapor trail being left by an aircraft moving at extremely high speeds or extremely high altitudes, the vapor trail usually will be from the wing tips and/or the exhaust of the engines, thus presenting several lines. But, in any event, even though only one line were visible, it would be rather quick to dissipate. This indicated to him that the vapor trail represents some atmospheric change along the path of the missile, which would not be the case were it any presently known type of aircraft.

the subject

He continued that information furnished by him should be treated with the utmost confidence, in that he was not speaking officially, but as a personal matter of cooperation. He stated that the matter was being given absolutely no dissemination by the air force or other military personnel, and that they had not deemed it advisable to advise him of all information pertaining to the missile. He continued, however, that in his conversation with representatives at Wright Field and in reading reports returned to this country by foreign agents, he had gathered together certain information which might be of assistance in determining whether or not these so-called missiles were authentic, usable and of danger to the United States. First, he pointed out that knowledge of such a possible aircraft is not by any means new, it having been known as early as four years ago that some type of flying disc was being experimented with by the Russians. In addition thereto, he stated that more recent reports have been received from representatives of the Central Intelligence Agency in Southern Europe and Southern Asia to the effect that the Russians were experimenting with some type of radical aircraft or guided missile which could be dispatched for great distances out over the sea, made to turn in flight and return to the base from which it was launched. This fact was extremely worthy of notice as experiments in this country have so far only developed to the point where we are concerned with delivering a missile to the required point of impact, and no consideration has been given to imparting to that missile the ability to return. Secondly, he stated that it is a known fact that the Russians are attempting to develop some type of nuclear energy, that they received a wealth of information concerning nuclear energy at the time of their occupation in Germany, and that they too have at their disposal the limited supply of the necessary fissionable materials. He stated that insofar as any opinion as to whether or not they have the ability and scientific knowledge to create such a ~~nuclear-propelled~~ missile is strictly a matter of conjecture, and that he would hesitate to make any definite statement. He pointed out, however, that the Russians have some very capable scientists in the field of atomic energy and that, in addition thereto, they took into their custody some of the most advanced and capable scientists of the German Nation.

He also stated that a peculiar fact concerning the missiles exists from reports he has received which is worthy of notice, and that is that from all appearances, they usually approach the United States from a northerly direction and have been reported as returning in a northerly direction. None have ever been known to crash, collide or disintegrate over American soil, but it would appear that they come to the United States, cruise around, and go back over the North Pole. He states that insofar as is known to him, there has never

been any piece of one recovered from any source whatever in order that analytical study of its nature could be made. Insofar as was known to him, the only actual material which would be of any value in determining its nature are telephoto photographs which are now in the possession of engineers at Wright Field, Dayton, Ohio. How detailed and how clear these photographs are, he was unable to state. He stated that one report has been received concerning a collision of these missiles with another type of aircraft. This report, according to him, took place a short time prior to the report of numerous discs over the United States, and the report emanated from Czechoslovakia. This report was that a Czechoslovakian transport had collided with some unidentified missile while in mid-air over the ocean, and that said missile and said transport had been completely disintegrated without recovery of parts or survivors from either. It was the belief of Colonel GASSER that this undescribed missile was perhaps the same type of thing as the flying saucer. Another factor of notice, according to Colonel GASSER, and as is portrayed by the photographs, it would appear that the missiles can be maintained at a certain altitude above the contour of the ground. This could be done by means of some type of radio altimeter or radio control. Naturally, the path of the missile is not in exact parallel to the contour, as its purported great speed would create considerable lag in its flight. Another factor which is worthy of note, according to Colonel GASSER, is that it is normally reported as being seen at tremendously high altitudes and always traveling in a straight line. He stated that he himself observed, on one occasion, a single vapor trail coming from some type of aircraft at unbelievably high altitudes, which vapor trail extended from horizon to horizon in a perfectly straight line. He observed the vapor trail while it was in the process of formation and states that it was completely unlike any vapor trail he had ever observed before in all of his experience with the air force. It was his judgment that whatever created the vapor trail was traveling at an unbelievably tremendous speed. This, together with reports that when close to the ground, the missile travels at speeds which make possible visual observation of its actions, would reflect that there is some ability to control the speed of these missiles as well as the altitude.

< Colonel GASSER concluded that this matter, while still purely a matter of guesswork, is nevertheless a source of great concern to the military establishment of this country. Great efforts have been expended by the service to determine just what the nature of these missiles might be and, upon so determining, decide whether or not an adequate defense can be established. He also stated that it has given impetus to the research being done by the air force in their own program of nuclear energy for the propulsion of aircraft to develop guided missiles. He also advised that insofar as was known to him, there was absolutely no connection between these missiles and the fact that they were observed close to Oak Ridge, Tennessee. He stated that this was perhaps, and probably, a matter of coincidence and they were seen in this area merely as they were seen in forty-six of the forty-eight states of the United States during the Month of July when so many reports were being received. >

This information is being submitted to the Bureau for whatever value it may be, and no further action in the matter is being contemplated by this office, unless advised to the contrary.

Office Memorandum • UNITED STATES GOVERNMENT

TO : Director, FBI

DATE: 12/28/48

FROM : SAC, Houston

SUBJECT: ~~FLYING DISC;~~
LONNIE EDWARD NOACK, Complainant

Robert B. Fleming
Graham W. Kitchel

Attention: Assistant Director D.M. Ladd

Remytel 12/28/48 in the above captioned matter.

For the Bureau's information, on 12/27/48 Mr. FULLER BLACKWELL, an attorney with offices 410 Kress Building, Houston, Texas, telephonically contacted the Houston Office to advise that he had a friend, LONNIE NOACK, who had some information on an object which might be a flying disc. Mr. BLACKWELL stated he was calling in response to Mr. NOACK's suggestion and as a means of determining what authorities would have an interest in this matter. He said Mr. NOACK was a machinist employed by the Humble Oil and Refining Company, Houston.

Mr. BLACKWELL, in calling, advised that the disc, or object, was approximately eight feet in diameter, had a tail and wings, and apparently was equipped for jet propulsion. He stated NOACK had observed this object at a desert location near Las Vegas, Nevada; further, that Mr. NOACK had taken some movie film of the disc and that this film was currently in his possession.

Immediately upon receipt of the above information, Mr. Robert B. Fleming, Special Agent, O.S.I., Ellington Field, Texas, was notified as was true of Captain Harold Bush, MID representative, also Houston. As a result of these referrals, arrangements were effected with Mr. NOACK to bring his film to the Houston Office for a showing 8 P.M., 12/27/48. This was done with Messrs. Bush, Fleming, Noack, and Special Agent Graham W. Kitchel and the writer observing. Arrangements were then made for Mr. NOACK to again appear at the Houston Office on the morning of 12/28/48 in order that his information might be reduced to writing. Mr. NOACK in making his initial appearance at the office surrendered his movie film which consisted of one 50 foot roll of 8 mm movie film. Approximately fifteen feet of this roll relates exclusively to the pictures of the flying disc.

Director
Re: Flying Disc
HO 12/28/48

While observing the object, Mr. NOACK noted an aluminum cylinder which had become detached from one of the wing tips and he brought this back with him as a souvenir. This cylinder conceivably could act as a rudder, a rocket housing, or fuel tank attachment. Mr. NOACK initialled the cylinder and surrendered it also.

There are attached hereto for the Bureau two copies of a signed statement taken from Mr. NOACK dated Houston, Texas, 12/28/48. Two copies of the statement are attached for the Los Angeles Office, and one informational copy is being designated for the Cincinnati Division. The original is being retained in the Houston file. One copy of the statement is attached to the copy of this letter for the FBI Laboratory. During the interview with Mr. NOACK, Mrs. ROSE C. ROTSEL, a stenographer for O.S.I., Ellington Field, recorded the statement for O.S.I. use.

Initial information obtained concerning this flying disc was furnished telephonically to Inspector Howard Fletcher at the Bureau, 9 A.M., 12/28/48. Mr. Fletcher requested the Bureau be given a summary of the information by teletype, with interested offices being similarly notified, and that the signed statement of NOACK be submitted AMSD. He further instructed that he did not want the Bureau "side tracked" in the handling of this matter, but that FBI representatives should assume an active interest in the investigation throughout, cooperating, of course, with O.S.I. representatives.

Mr. Fleming's headquarters are the District Commander, 5th O.S.I. District, Wright Field, Dayton, Ohio. On the morning of 12/28/48 Mr. Fleming sent a telegram to his District Commander giving a general summary of the original complaint. Mr. Fleming was unable to advise how the 5th O.S.I. District would handle their inquiry in this matter. He stated this could either be handled by Wright Field dispatching a special plane to California or by having their District Commander, 18D, O.S.I., San Bernardino, California handle it. He stated in any event it would be necessary for O.S.I. representatives to first confer with Mr. R.C. PERSON, named in this statement, as being the individual who initially discovered the flying disc and would know also its present whereabouts.

Director
Re: Flying Disc
HO 12/28/48

Mr. PERSON, as indicated, maintains a business at 4116 Avalon Boulevard, Los Angeles, California, telephone Adams 5281.

To insure the Bureau's participation in this matter, SAC R.B. Hood, of the Los Angeles Office, was contacted telephonically at approximately 11:30 A.M. (CST) 12/28/48 with the suggestion he maintain contact with Mr. PERSON.

Also in keeping with Bureau instructions, the roll of film received from Mr. NOACK, together with the aluminum portion of the fuselage, is being forwarded separately to the Bureau, attention FBI Laboratory.

ENCLOSURE

62-83894-154

1302

Houston, Texas
Dec. 28, 1948

I, LONNIE EDWARD NOACK, residing 2921 Chicago Street, Houston 17, Texas, make the following statement to Special Agent Robert B. Fleming and Christopher R. Bradley, representatives of the Office of Special Investigation, Ellington OSI Detachment, Ellington Field, Texas, and Special Agents Graham W. Kitchel and Galen N. Willis who I know to be Special Agents of the Federal Bureau of Investigation.

On Monday afternoon December 6, 1948, at about 6 P.M., Mr. R.C. PERSON, Mr. NATHAN SMITH, Mr. C.A. TOCE, Mr. ROBERT BROUSSARD and another man, name not recalled, and I had dinner at the Old Virginia Inn, Los Angeles, California. After dinner we went back to Mr. Smith's electrical manufacturing company which he owns and operates in Los Angeles, California. Mr. PERSON told us about seeing a flying disc and we made an appointment to leave early the next morning by car, with our cameras, to go to the location of the disc. Mr. PERSON was detained at some private air field so we did not leave until about 2 P.M. on December 7, 1948. We arrived at the scene of the flying disc and took pictures of the disc which was still lying around. Mr. SMITH took about 10 feet of 16 mm film and Mr. PERSON took five or six shots with a Speed Graphic Camera. He noticed that the first three shots were taken when the adapter on his lens was closed too much and I don't know if they turned out all right. Mr. SMITH suggested I hold the flying disc up and rotate it around and he would take my picture with my camera. After taking the pictures, we patched the fence of Mr. PERSON's property where people had been cutting the wire to get to a road. We left and then drove back and had dinner at Eaton's Inn and they took me back home to Hollywood, California.

I would like to recite that I left Houston, Texas 11:30 A.M. on Sunday, December 5, 1948, for California by plane and flew to Hollywood, California on a commercial plane on business matters. On arriving in Hollywood, I met Mr. PERSON in Hollywood on Monday, December 6, 1948, and at that time he told me about the flying disc he had located. He stated he had gone to Las Vegas by his personal plane and saw the disc from the air on his way back.

On December 7, 1948 we went out in Mr. NATHAN SMITH's car and picked up his wife and left his home in South Pasadena about 11 A.M. We drove out to an airport where his plane was about forty miles from Pasadena where he was having the plane repaired. He wanted to be sure the plane was on a truck before we left for the destination where the disc was. In making this trip, we proceeded out by a race track and passed one of the Kaiser steel works and the Virginia Dare Wine Orchard. I would say we went directly north or northeast from Pasadena, California. We drove through a town called Matonia (phonetic) and followed a road through some mountains and through a small desert. I would estimate the distance from Pasadena to where the disc was found to be about 150 miles. The terrain in which the disc was found could be described as flat, desert, and desolate.

I would like to explain that Mr. PERSON has private property (an airport which he purchased from the government) right by the location of the disc. Mr. PERSON thought the disc might have been launched from his airport, but whether that was it or not - we don't know. Mr. PERSON said he usually flew at an altitude of about 8,000 feet and, of course, he flew lower in some spaced. He did not mention his altitude at the time he first saw the disc. The disc was located practically just outside his property and we were going north, so it would be east of his property. He has about 900 acres.

When we arrived at Mr. PERSON's property, we saw the disc, or flying wing, and it was on the ground in a semi-vertical position, approximately a 45 degree angle, with the left wing imbedded in the ground. In looking at the ground, it appeared that the object had hit the earth with considerable force and had slid 300 to 400 feet. It was dented but was generally intact. I think the pictures I took with a Revere 8 mm camera quite well show the form, shape and size of the "wing." I am 5'7" tall and in standing next to the object when it was in an upright position, it was slightly higher than my height. I would say it was roughly seven feet in diameter, before crashing.

On each side of the object there were wings approximately four feet by twenty inches and three inches thick with an axle that protruded through the disc and into the wings. It was mounted on ball bearings which the disc rotated on.

The disc itself was approximately two feet thick in the center, tapering to a feather edge at the rim. On the outside of the disc, near the rim, there were funnel shaped cups bradded on and these were spaced all around on both sides, each cup being approximately twenty inches apart. The openings of these cups were to the rear. The disc itself was natural aluminum with no paint on it except of the type of aluminum which was 24 S.T. and it bore this stamp. The wings were painted a yellow-green camouflage color.

The wing has a leading edge similar to that of an airplane and tapers to the rear to a feather edge. The wing was ribbed throughout with aluminum ribs for substantial strength. Each wing had a similar rocket cartridge on each tip fastened by two bolts. I had one of the wings in my possession and have turned it over to the proper authorities. The cartridge on the one I had was apparently knocked off in the crash.

There were two strut bars attached approximately twenty inches from the disc leading to the rear with an elevator. Also, the two struts protruded toward the front with something attached, a weight or some tow system, which was during the crash anchored into the ground and bent and we could not exactly determine how it was weighted or controlled. I would say the elevator was approximately twenty-two inches long and about $5/8$ inch thick with a slight taper to the rear and probably ten inches wide. The struts extending from the trailing edge of the wing to the elevator were made of $5/8$ inch steel tubing. The disc, in being lifted, I would judge to weigh from 80 to 100 pounds.

With respect to the pictures taken, I took approximately 15 feet of colored 8 mm film.

The disc was built where they had the proper equipment to do the necessary work because they had to have a spot welder and building equipment to make the different angles. I might add that I am an instrument maker for the Humble Oil and Refining Company and have a generally good knowledge of machine and metal work. There was nothing on the object to indicate its origin, whether American or foreign make. It would appear, however, from the aluminum, workmanship, etc. that it probably was American made.

After we finished taking our pictures and discussing the object among ourselves, Mr. PERSON expressed an intention of obtaining a truck and hauling the object to his shop. I cannot say at this time whether he did this or not or where the object may be at this particular date. We finished our observation and picture taking at approximately 5:30 or 6 P.M. on December 7.

In response to Mr. Fleming's inquiry, there was no radio equipment noted on the object in any fashion or form.

We returned to Pasadena, California, that evening arriving in Hollywood about 9 or 9:30 P.M. I took some more pictures that night along Hollywood Boulevard on the unfinished roll of film and then went over the Chinese Theatre and took a picture of the signature of George Raft and finished the roll. I bought another roll of film, and took them to the Eastman Kodak Company the following Monday which would be December 13, 1948. As I recall, this Eastman shop was on Los Palmas Street in Los Angeles, California. They informed me they would develop the film and that it would be ready on Thursday. I left California on Wednesday so they mailed the film to me at my business address, Humble Oil Building, Room 159, Houston, Texas. I received these films on December 23, 1948.

After my return from California I mentioned to several of my business and social acquaintances that I had seen the object, a disc or saucer or whatever you might call it, and told them that I had taken pictures and would be glad to show them when the pictures arrived. As stated, I received the film on December 23 and at 1:30 P.M. on the same date I showed the film in the projection room at Humble Oil to the following: D.W. BLAIR; J. HATTAWAY; B.A. PETERSON; JAMES S. OLIVIER; WILLIAM RIED, JR.; A.E. MELETON; WAYNE CRAWFORD; D.A. BATTLE and two other men whose names I do not recall. All of these men work in the instrument shop with me at Humble Oil & Refining Company. I also showed the film to my brother-in-law, E. KULAK, of Pasadena, Texas, at home on the following night.

On Christmas Day I met some friends and one of the girls was with a young boy who was interested in photography. I do not know his name but he works at Southern Pacific. I told him I had some pictures of the flying disc but I did not show him the pictures but explained the disc. I think this boy is the person who had his friend at the newspaper contact me.

I got home about 10:30 A.M. and FRANK REED, of the City Desk at the "Houston Post" called me and wanted to know about the disc. I told him I could not give him any information on it. He begged me for the story, but I told him I would let him know and that I had friends I had to contact before I could give him any information.

I then got in touch with Mr. Blackwood, my lawyer, the following morning and asked him if he knew anyone in the FBI. He stated all the FBI personnel he knew were no longer stationed here. I then contacted the FBI and turned the material over to them.

Although I can't describe where this object is located, I believe I could go back to it and I am sure Mr. PERSON and Mr. SMITH could go back to it.

Mr. NATHAN SMITH's business address is Nathan Smith Electrical Company, 105 South Pasadena Avenue, South Pasadena, California. Mr. R. C. PERSON is president of the Vasco Electrical Manufacturing Company, 4116 Avalon Boulevard, Los Angeles, California.

For record purposes, in taking the pictures above referred to, I did so using exposure of 16 frames per second at a diaphragm opening of f6.3. I used Cine-Kodak Kodachrome film.

ATTENTION The above statement, made voluntarily and for the retention of proper authorities, is made to my best knowledge and belief.

RE: FLYING DISC;
LONNIE EDWARD NOACK, Complainant

SAC, Houston

January 25, 1949

Director, FBI

FLYING DISCS
LONNIE EDWARD NOACK, Complainant

4

Reference is made to Los Angeles teletype dated 12/29/48 and to Houston teletype dated 12/28/48, and the subsequent transmittal of an 8mm movie film taken by Mr. LONNIE NOACK, along with several parts of the supposed flying disc to the laboratory for examination.

Since prior to receipt of the above items by the laboratory the information was obtained which identified the supposed flying disc as a tow target and later a toy kite, no examination was conducted here.

Accordingly, these items are being returned to you via registered mail.

I thought you might be interested in the following information concerning "Flying Discs" which has been furnished to the Bureau on a confidential basis by Colonel C. D. Gasser, Resident Engineer, Air Material Command, U. S. Army, who is the principal army technician at the Nuclear Energy for the Propulsion of Aircraft Research Center at Oak Ridge, Tennessee.

Colonel Gasser stated that he knew nothing of an official nature concerning "Flying Discs" other than the fact that they are believed by Air Force Intelligence officials to be man-made missiles, rather than some natural phenomena. It was his further belief that a great deal of information has been compiled concerning these missiles by air force intelligence, and that research on the matter was being extensively done at Wright Field, Dayton, Ohio.

Colonel Gasser then continued with his own ideas as to what might be the nature of these discs which ideas he had formulated through review of those known facts and theoretical conjectures of himself and other scientists concerning the nature of flying discs and methods of propulsion for such type of aerial mechanism. According to him, flying discs have long been a theoretical possibility, and, in fact, a possibility which would indicate one of the best means by which to break through the barriers of the supersonic area. He stated that scientists have, for many years, been attempting to develop this type of aircraft. Some experimentation has been done even in the United States, but insofar as is known in the United States at the present time, there have never been any practical developments. As a second factor of consideration, Colonel Gasser stated that insofar as is known to U. S. scientists at this time, there is no known chemical fuel which would make possible tremendous range of flight such as is ascribed to the reported "flying discs." According to Gasser, there is only one possible fuel which could be utilized which is in accord with present theory, and that is the utilization of atomic energy.

He stated that this subject matter was being given absolutely no dissemination by the air force or other military personnel, and that they had not deemed it advisable to advise him of all information pertaining to this type missile. He continued, however, that in his conversation with representatives at Wright Field and in reading reports returned to this country by foreign agents, he had gathered together certain information which might be of assistance in determining whether or not these so-called missiles were authentic, usable and of danger to the United States.

unlimited supply?

He pointed out that knowledge of such a possible aircraft is not by any means new and that it was known as early as four years ago that some type of flying disc was being experimented with by the Russians. In addition he said that more recent reports have been received from representatives of the Central Intelligence Agency in Southern Europe and Southern Asia to the effect that the Russians were experimenting with some type of radical aircraft or guided missile which could be dispatched for great distances out over the sea, made to turn in flight and return to the base from which it was launched. He related that this information was extremely worthy of notice as experiments in this country have so far only developed to the point where we are concerned with delivering a missile to the required point of impact, and no consideration has been given to imparting to that missile the ability to return. He also advised that it is a known fact that the Russians are attempting to develop some type of nuclear energy, that they received a wealth of information concerning nuclear energy at the time of their occupation in Germany, and that they have at their disposal a limited supply of fissionable materials. He pointed out that the Russians have some very capable scientists in the field of atomic energy and that, in addition thereto, they took into their custody some of the most advanced and capable scientists of the German Nation.

Colonel Gasser stated that a peculiar fact concerning these missiles is found in reports he has received, that from all appearances the missiles usually approach the United States from a northerly direction and have been reported as returning in a northerly direction. He advised that none have ever been known to crash, collide or disintegrate over American soil, but it would appear that they come to the United States, cruise around, and go back over the North Pole. He stated that insofar as is known to him there has never been any part of a missile of this type recovered from any source whatever in order that an analytical study of its nature could be made. He stated that one report has been received concerning a collision of these missiles with another type of aircraft. This report, according to him, emanated from Czechoslovakia and took place a short time prior to the report of numerous discs over the United States. According to Colonel Gasser a Czechoslovakian transport had reportedly collided with some unidentified missile while in mid-air over the ocean, and that the missile and transport were completely disintegrated without recovery of parts or survivors from either.

Colonel Gasser concluded that this matter, while still purely a matter of guesswork, is nevertheless a source of great concern to the military establishment of this country. He advised that great efforts have been expended by the military service to determine the nature of these missiles and upon so determining, decide whether or not an adequate defense can be established. He stated that it has given impetus to the research being done by the air force in their own program of nuclear energy for the propulsion of aircraft to develop guided missiles.

SUBJECT: "FLYING SAUCERS" OBSERVED OVER OAK RIDGE AREA
INTERNAL SECURITY - X

DATE: February 18, 1949

declassified
2048
9/9/77

Reference is made to Knoxville letter to the Director dated January 10, 1949, entitled as above.

There is being forwarded for the Bureau's information a copy of a letter from Colonel C. D. GASSER, USAF, AMC Engineering Field Officer, Oak Ridge, Tennessee, to Mr. G. J. RATHMAN, Security Division, U. S. Atomic Energy Commission, Oak Ridge. This letter is self explanatory and reveals that the photographs forwarded with referenced letter are the result of accident or purposeful hoax and are not actually photographs of a "flying saucer".

Colonel GASSER personally advised that while the photographs are not real, his statements made concerning the existence of flying saucers and the opinions expressed by him nevertheless stand as previously stated.

Mr. G. J. Rathman
Chief, Investigation Section
Security Division
U. S. Atomic Energy Commission
P. O. Box E
Oak Ridge, Tennessee

Dear Mr. Rathman

This is in response to your letter dated 16 December 1948, subject "Photographs", with inclosures, addressed to Major D. J. Grant at this site, concerning photographs taken during the month of July 1947 by Mr. William Presley of 218 Illinois Avenue, Oak Ridge, Tennessee, of an unidentified object that appeared to be flying over Oak Ridge.

Since receipt by Major Grant of the above material, this office has taken steps to secure an evaluation of same by the Air Force office of the Chief, Technical Intelligence Division, Intelligence Department, Air Materiel Command, at Wright-Patterson Air Force Base, Dayton, Ohio. As a result, the following information has been revealed:

"When the negative, containing the sphere, is examined by strong incident light, it is noted that the emulsion is raised at that point above the normal level of the remaining emulsion. This indicates that either a drop of warm water or a drop of developer struck the film at this point and rolled down this negative and the succeeding negative.

"To further substantiate this, it will be noted that when the two (2) negatives are placed side by side with the edges of the film aligned, the so-called "trail" is continuous, that is the two sections match, indicating the drop rolled on from one negative to the next.

"Still further proof is shown on the fogged edge of the negative containing only the trail. This is proven by the fact that the trail extends beyond the normal format

AEC, dated 10 February 1949, Re Photographs

of the negative. In other words, there is a trail of that section of the negative which was not exposed in the camera. This effect shows up in one negative and not in the other because the negative in question is fogged; therefore, this irregularity was developed.

"Still further proof of these defects lies in the number of unevenly developed sections of the negative."

In view of the above, it is recommended that this entire matter be declassified and that Mr. Presley be advised of the nature of the images, if and when the negatives are returned to him by your office.

For your information, this office is taking the liberty of furnishing a copy of this communication to Mr. C. C. McSwain, Special Agent, FBI, because of official interest evidenced by his office in the matter.

Your cooperation in furnishing photographs and negatives, together with information contained in your letter of 16 December 1948 to Major Grant, is sincerely appreciated.

Very truly yours,

C. D. GASSER
Colonel, USAF
AMC Engineering Field Officer

At recent Weekly Intelligence Conferences of G-2, ONI, OSI, and F.B.I., in the Fourth Army Area, Officers of G-2, Fourth Army have discussed the matter of "Unidentified Aircraft" or "Unidentified Aerial Phenomena" otherwise known as "Flying Discs", "Flying Saucers", and "Balls of Fire". This matter is considered top secret by Intelligence Officers of both the Army and the Air Forces.

It is well known that there have been during the past two years reports from the various parts of the country of the sighting of unidentified aerial objects which have been called in newspaper parlance "flying discs" and "flying saucers". The first such sightings were reported from Sweden, and it was thought that the objects, the nature of which was unknown, might have originated in Russia.

In July 1948 an unidentified aircraft was "seen" by an Eastern Airlines Pilot and Co-Pilot and one or more passengers of the Eastern Airlines Plane over Montgomery, Alabama. This aircraft was reported to be of an unconventional type without wings and resembled generally a "rocket ship" of the type depicted in comic strips. It was reported to have had windows; to have been larger than the Eastern Airlines plane, and to have been traveling at an estimated speed of 2700 miles an hour. It appeared out of a thunder-head ahead of the Eastern Airlines plane and immediately disappeared in another cloud narrowly missing a collision with the Eastern Airlines plane. No sound or air disturbance was noted in connection with this appearance.

ORIGINAL FILED IN

65-58300-61

During the past two months various sightings of unexplained phenomena have been reported in the vicinity of the A.E.C. Installation at Los Alamos, New Mexico, where these phenomena now appear to be concentrated. During December 1948 on the 5th, 6th, 7th, 8th, 11th, 13, 14th, 20th and 28th sightings of unexplained phenomena were made near Los Alamos by Special Agents of the Office of Special Investigation; Airline Pilots; Military Pilots, Los Alamos Security Inspectors, and private citizens. On January 6, 1949, another similar object was sighted in the same area.

Dr. LINCOLN L. P.Z, a Meteorologist of some note, has been generally in charge of the observations near Los Alamos, attempting to learn characteristics of the unexplained phenomena.

Up to this time little concrete information has been obtained.

FILED ON ORIGINAL

DIRECTOR, FBI

1/31/49

There have been day time sightings which are tentatively considered to possibly resemble the exhaust of some type of jet propelled object. Night-time sightings have taken the form of lights usually described as brilliant green, similar to a green traffic signal or green neon light. Some reports indicated that the light began and ended with a red or orange flash. Other reports have given the color as red, white, blu-white, and yellowish green. Trailing lights sometimes observed are said to be red. The spectrum analysis of one light indicates that it may be a copper compound of the type known to be used in rocket experiments and which completely disintegrates upon explosion, leaving no debris. It is noted that no debris has ever been known to be located anywhere resulting from the unexplained phenomena.

Recent observations have indicated that the unidentified phenomena travel at a rate of speed estimated at a minimum of three miles per second and a maximum of twelve miles per second, or a mean calculated speed of seven and one-half miles a second, or 27,000 miles an hour. Their reported course indicates that they travel on an East - West line with probability that they approach from the Northern Quadrant, which would be the last stage of the great circle route if they originated in Russia. When observed they seem to be in level flight at a height of six to ten miles and thus traveling on a tangent to the earth's surface. They occasionally dip at the end of the path and on two occasions a definite vertical change in path was indicated. These phenomena have not been known to have been sighted, however, at any intermediate point between Russia and Los Alamos, but only at the end of the flight toward the apparent "target", namely, Los Alamos.

In every case but one the shape of the objects has been reported as round in a point of light with a definite area to the light's source. One report gives a diamond shape; another indicates that trailing lights are elongated. The size is usually compared to one-fourth the diameter of the full moon, and they have also been compared in size to a basketball with trailing lights the size of a baseball.

On no occasion has sound been associated directly with the phenomena, but unexplained sounds have been reported from Los Alamos. On two occasions reports have been received of the sighting of multiple units.

Some nine scientific reasons are stated to exist which indicated that the phenomena observed are not due to meteorites. The only conclusions reached thus far are that they are either hitherto unobserved natural phenomena or that they are man made. No scientific experiments are known to exist in this country which could give rise to such phenomena.

DIRECTOR, FBI

1/31/49

Mrs. MADELINE GWYNNE MERCHANT was the subject of a letter from the Atlanta office to the Bureau dated August 10, 1948, entitled, "MADELINE GWYNNE MERCHANT; INFORMATION CONCERNING."

She has written many letters to Military Authorities concerning her theories regarding Atomic Energy. She has generally been considered unreliable and possibly mentally unbalanced. She, however, has submitted to Military authorities the only theory thus far known that has any credibility at all, namely, that the lights are manifestations of cosmic rays which are directed toward a specific point. She further theorizes that such rays may interfere with the ignition of motors and may account for various unexplained air crashes.

The above is submitted for the confidential information of the Bureau and offices to which copies of this letter are directed so that these offices may evaluate any such reports they may have received or may receive in the future.

It is noted that the Fourth Army has the responsibility of protecting vital installations at Los Alamos, New Mexico, Sandia Base, New Mexico, and Camp Hood, Texas. Any information developed should be expeditiously transmitted to G-2, Fourth Army.

It is further noted that G-2 and O.S.I. are actively engaged in investigating this matter. No investigation is being conducted by this office.

PURPOSE

The approval of the Executive Conference is requested for the attached SAC letter furnishing to the field the type of information desired by the Intelligence Division of the Air Force in connection with the captioned matter.

BACKGROUND

You will recall that by Bureau Bulletin #57, Series 1947, dated October 1, 1947, the field was advised that effective as of that date the Bureau had discontinued its investigative activities in connection with flying discs. The field was advised that all future reports concerning this matter received in the field should be referred to the Air Forces.

Colonel C. D. Gasser, Resident Engineer, Air Materiel Command, Nuclear Energy for the Propulsion of Aircraft Research, Oak Ridge, Tennessee, has recently and confidentially advised the Bureau that flying discs are believed by the Air Force to be man-made missiles rather than some natural phenomenon and that as much as four years ago it was learned that some type of flying discs were being experimented upon by the Russians. It was further determined from Colonel Gasser that most all of the flying discs seen by persons in the United States approached this country from a northerly direction and returned in the same direction, indicating the strong possibility that they are coming from Russia.

The Department of the Air Force has furnished to the Bureau a sufficient number of copies of a memorandum dated February 15, 1949 captioned "Unconventional Aircraft" which can be furnished to our field offices.

RECOMMENDATION

It is recommended that the attached SAC letter and enclosure be forwarded to the field to advise them of the type of questions to be asked of persons who voluntarily submit information relative to "flying discs." Although no active investigation will be conducted by the Bureau, it is believed that the captioned matter is of sufficient importance to the internal security of the country that our field offices should secure as much information as possible from complainants in order to assist the

Department of the Air Force.

o Flying Discs

Re San Antonio letter to the Director dated January 31, 1949, which outlined discussion had at recent weekly Intelligence Conferences of G-2, ONI, OSI and FBI in the Fourth Army Area concerning "Unidentified Aircraft" or "Unidentified Aerial Phenomena" otherwise known as "flying discs", "Flying saucers" and "balls of fire". It is repeated that this matter is considered secret by Intelligence Officers of both the Army and the Air Force.

G-2, 4th Army, has now advised that the above matter is now termed "Unconventional Aircraft" and investigations concerning such matters have been given the name "Project Grudge".

G-2, 4th Army, advised on February 16, 1949, a conference was held at Los Alamos, New Mexico, to consider the so-called "Green fire ball phenomena" which began about December 5, 1948. It was brought out this question has been classified "secret" and that investigation is now the primary responsibility of the U.S. Air Force, Air Materiel Command, T-2.

Dr. LINCOLN LA PAZ of the University of New Mexico, discussed one sighting which he himself had made which was termed the "Starvation peak incident" and described the following characteristics which indicated that the phenomenon could not be classified as a normal meteorite fall.

1. There was an initial bright light (no period of intensity increase) and constant intensity during the duration of the phenomenon.
2. Yellow green color about 5200 Angstroms.
3. Essentially horizontal path.
4. Trajectory traversed at constant angular velocity.
5. Duration about two seconds.
6. No accompanying noise.

ORIGINAL COPY FILED IN 65-58300-65

DIRECTOR, FBI

March 22, 1949

It was brought out that since December 5, 1948 there have been more than ten incidents analagous to the "green fireball" above described and some twenty others with minor deviations from the above. It is also pointed out that the only sitings which had occurred seemed to have been confined to the Los Alamos, Las Vegas, and West Texas triangle.

G-2 also advised that as of November 1, 1948, information had been received from higher Military authorities that the Air Force had advised that such sitings occur periodically and that another period of sitings was then imminent. Further, on February 14, 1949, higher Military authorities advised that it was believed that ultimately it would be found that the phenomena in question have a natural explanation.

It is further noted that about 7:30 p.m., March 6, 1949, what was at first thought to be a flare was seen approximately one-half mile north of Killeen Base in the area of the Vital Installation at Camp Hood, Texas, and a second flare was noticed at 1:45 a.m., March 7, 1949, approximately three miles from Killeen Base. It has since been concluded that the flares seen near Killeen are probably similar to the phenomena previously noted in the Los Alamos, Sandia Base Area although these are the first sitings of such phenomena near Camp Hood.

There appears to be reason to believe that the above-mentioned phenomena may be connected with secret experiments being conducted by some U.S. Government Agency as it is believed that the United States is farther advanced in guided missile development than any foreign power.

Although the primary responsibility for investigating such matters is now with the U.S. A.F. Air Materiel Command, G-2, 4th Army is still interested in being advised of any further sitings of such phenomena which might be observed.

REPORT MADE AT LOS ANGELES	DATE WHEN MADE 3/30/49	PERIOD FOR WHICH MADE 12/28,29;1/7/49	REPORT MADE BY W. NATHAN PROVINSE DPZ
TITLE FLYING DISCS; LONNIE EDWARD NOACK, complainant; Houston, Texas, December 27, 1948			CHARACTER OF CASE INTERNAL SECURITY M

SYNOPSIS OF FACTS:

Object described by complainant as possible flying disc determined to be a model tow target or kite which had been abandoned after unsuccessful tests. Portions of target positively identified by HENRY T. RICE, L.A. manufacturer and erstwhile financial backer as being part of the model target or kite.

RUC

REFERENCE:

Teletype from Houston to Director dated 12/28/48.
Teletype from Los Angeles to Director dated 12/28/48.
Teletype from Los Angeles to Director dated 12/29/48.

DETAILS:

This investigation is predicated upon the receipt of referenced teletype from the Houston Office advising that LONNIE EDWARD NOACK had located an object in the desert near Helendale, California, resembling a flying disc. This object, described as a flying disc, had been located by NOACK, R. C. PERSON and Mr. and Mrs. NATHAN SMITH of South Pasadena, California, approximately one hundred and fifty miles northeast of Pasadena or about twenty miles from Lone Pine, California.

Special Agent EDWARD OLSEN determined that R. C. PERSON, Vasco Manufacturing Company, was traveling in Arizona and not available for interview.

L. A. 105-445

Mr. N. SMITH, SMITH MANUFACTURING COMPANY, 105 Pasadena Avenue, South Pasadena, California, who was with NOACK at the time the object was discovered, advised Special Agent EDWARD OLSEN on December 28, 1948, that he was present at the time the object was located on his, SMITH's, landing field near Helendale, California. SMITH advised that they had taken some pieces off the object and that subsequently, upon returning to Los Angeles, he had learned that the object was actually a model kite or tow target which had been built by the ~~OHLSON AND RICE MANUFACTURING COMPANY~~ of Los Angeles. *Callif* Mr. SMITH stated that he had talked to both OHLSON and RICE and that they had admitted to him having experimented with the object over his, SMITH's, airfield. Mr. SMITH made available three of the parts of the target which he had secured while at the airfield.

The information furnished by Mr. SMITH was verified by Special Agent EDWARD OLSEN in an interview with Mr. HENRY T. ~~RICE~~, OHLSON AND RICE MANUFACTURING COMPANY, 3340 Emery Street, Los Angeles. The parts made available by Mr. SMITH were exhibited to Mr. RICE, and he advised that the model tow target or kite had been taken to the airfield for flight tests by himself and CLAUDE LEROY ~~WOLFORD~~, 5454 Chesley Avenue, Los Angeles 43, California. Mr. RICE stated that WOLFORD is the inventor of the object and OHLSON AND RICE had originally agreed to finance him to develop the tow target or kite as a toy. Mr. RICE explained that they were primarily interested in developing the contraption as a toy kite to be sold in a much smaller model; however, the inventor, against their wishes, had developed a much larger model which he had hoped to sell as a tow target to be used behind airplanes. Mr. RICE stated that since he had gone that far they felt that they should give the project a test and thereupon they took it out to the desert as a precautionary measure. Mr. RICE stated that the flight test was a failure; the model crashed soon after it was airborne and was thereafter abandoned on the field.

In the absence of her husband, Mrs. CLAUDE LEROY WOLFORD, 5454 Chesley Avenue, was interviewed and exhibited the three parts of the kite made available by Mr. SMITH. She readily identified the three items as part of a kite her husband had built for the RICE MANUFACTURING COMPANY. She advised that she also accompanied her husband to the desert at the time the tests were made. She explained that the kite had crashed and that the manufacturing company did not want to put any more cash in it so it was abandoned on the desert.

The three parts of the kite were returned to NATHAN SMITH on January 7, 1949. The Sub-District Office, I. G. (USAF), 1206 Santee Street, Terminal Annex, Los Angeles, California, was apprised of the information contained herein immediately upon its receipt.

 RE: FLYING DISCS

Your attention is directed to Bureau Bulletin #57, Series 1947, dated October 1, 1947, relating to the discontinuance of investigation by this Bureau in matters concerning flying discs.

For your confidential information, a reliable and confidential source has advised the Bureau that flying discs are believed to be man-made missiles rather than natural phenomenon. It has also been determined that for approximately the past four years the USSR has been engaged in experimentation on an unknown type of flying disc.

The Department of the Air Force has furnished to the Bureau the attached memorandum classified "restricted" dated February 15, 1949, entitled "Unconventional Aircraft." This memorandum is being furnished to you in order that all agents assigned to your office can be informed of the type of information desired by the Air Force in this matter.

As set forth in Bureau Bulletin #57, referred to above, no investigation should be conducted by your office relative to flying discs, however, the attached memorandum should be referred to in securing data from persons who desire to voluntarily furnish information to your office relating to flying discs.

Very truly yours,

John Edgar Hoover

Office Memorandum • UNITED STATES GOVERNMENT

TO : DIRECTOR, FBI

DATE: 4-22-49

FROM *egf* SAC, LITTLE ROCK

SUBJECT: UNKNOWN SUBJECTS;
WADE H. HARRISON - INFORMANT
0 FLYING DISCS
FORT SMITH, ARKANSAS (4-16-49)

WADE H. HARRISON, residence address Route 1, Box 293, Fort Smith, Arkansas, is employed as a Special Delivery messenger by the Fort Smith Post Office Department.

HARRISON stated that at 5:25 p.m., Saturday, April 16, 1949, while delivering special delivery mail in Fort Smith, he stopped his automobile at a signal light located at the intersection of North Eleventh Street and Grand Avenue. He glanced up at the stop light and observed a brilliant object moving in a southeastern direction. He presumed the object was approximately 2 miles high. He got out of his automobile and pointed up with the suggestion that other automobile drivers, stopped for the signal light, could see the object. He does not know who any of the other people are or what they saw. He was obliged to move on after the light changed and the drivers began honking their horns. He watched the object until it was obscured by the line of trees in that section. He estimated he watched it travel some 3 or 4 miles before he lost sight of it. He stated the weather was clear, visibility was good, and there were no clouds near the object. The object made no noise perceptible to HARRISON. However, he commented that he was stopped at an intersection where the traffic was heavy and there was considerable noise. He first thought possibly he had seen some type of a reflector on an airplane, but could not locate or hear a plane anywhere.

HARRISON drove to the 1400 Block of North "C" Street, where he observed an Army officer, wearing the insignia of a major or lieutenant colonel, standing back of the officer's automobile. He stopped and asked the officer if he had observed the flying object. The officer, name unknown to the informant, answered negatively and then remarked, "I am glad other people are also reporting seeing flying objects." The officer then related that the day previous, Friday, April 15, 1949, while the officer was traveling out of Oklahoma City toward Fort Smith, his wife observed a flying object in the sky very similar to that described by HARRISON. The officer stated he saw the object too, but furnished no more information.

LET TO DIRECTOR
FLYING DISCS

4-22-49

HARRISON described the object as appearing some 3 or 4 inches in diameter from the distance he saw it. It was very bright and reflected a light in a manner similar to a mirror. He reported the incident to the local press at Fort Smith and inquired if anyone had made a similar report. He received a negative reply. In this connection, please find attached an article from the front page of the Southwest-Times Record newspaper published at Fort Smith, Arkansas, Sunday, April 17, 1949.

The interview with HARRISON developed he is 52 years of age. He has had considerable college training and attended the seminary at Westminster, Maryland 2½ years. He stated that his eyesight is very good for a man of his age and that he has worn reading glasses only for the past few years. He was positive he had observed the object as related above. He was unable of course to state just what the object was or furnish any additional information concerning it. No information was available at Fort Smith indicating the object had fallen in that section or that it was observed by others. The Little Rock Office is making no further inquiries concerning the subject matter.

The offices of OSI and MID have been notified of the information set out above.

Local Man Reports Seeing What He Believes Was "Flying Disc"

Wade Harrison, Fort Smith post office employe, reported Saturday he had observed what he believed was a "flying disc."
Harrison saw what he believed was a "flying disc" as he was driving east on Grand avenue at Eleventh street. He said the object was small and was moving southeastward at a rapid rate of speed. He said the object resembled a tiny mirror.
There were no other reports of "flying discs" in the area Saturday.

From: John Edgar Hoover, Director, Federal Bureau of Investigation
Re: FLYING DISCS

mem

A reliable and confidential source has recently advised this Bureau that during the first part of April, 1949, Mr. C. A. Atkins, 4312 Los Feliz, Hollywood 27, California, had informed him that three employees of the Department of Recreation in Parks in the city of Los Angeles, California, had noticed objects in the sky which appeared to be flying discs.

The above information is being furnished to you for whatever action you desire and no investigation is being conducted relative thereto by this Bureau.

My Dear Winchell.

To Answer

With reference to 0 flying Disc's or other flying objects, thought you would be interested in the following. It in a measure substantiates your statements.

Friday of last week, three of our department employees were working in Griffith Park (the nations largest park) when one of them, De Jarnett by name noticed an object sailing through the sky and took a good look to try and distinguish it from planes that frequently fly over.

About the same time two of his men working about a half mile away saw the object. They checked with each other and arrived at the same conclusion. It was a Disc and they ran to a telephone to report the incident. In the meantime DeJarnett started to the location where his men were working to check and see if they had seen the object.

They had both seen it which proves beyond a question of a doubt that something of the Disc type was in the air and when the third man stated he also saw it, I am satisfied you are very much right in your statements and I am inclined to call a person a liar that says (there are no disc's).

TO : Director, FBI

DATE: April 4, 1949

FROM : SAC, San Antonio

AIR MAIL
SPECIAL DELIVERY

SUBJECT: PROTECTION OF VITAL INSTALLATIONS
(Bureau file 65-48300)

Reference is made to San Antonio letter to the Bureau dated March 22, 1949 which submitted information related by military authorities concerning unconventional aircraft.

The Office of the Assistant Chief of Staff, G-2, 4th Army, has advised that at 11:50 P.M. March 31, 1949 a lighted object about the size of a basketball, reddish white in color, followed by a fire trail, was observed southwest of Killeen Base, adjacent to Camp Hood, Texas. The observation was made by 1st Lt. FREDERICK W. DAVIS, who was in charge of a platoon, Company C, 12th Armored Infantry Battalion, which is assigned as a part of an alert force (called force Abel) from Camp Hood, whose function is to protect the installation at Killeen Base.

Lt. DAVIS advised that the object was at an altitude estimated at 6,000 ft., was traveling parallel to the ground and passed directly over him at a rapid rate of speed. It was in view 10 to 15 seconds and suddenly disappeared high in the sky without having descended. No sound or odor was detected. The night was clear and visibility good. The object passed almost directly over the air strip at Killeen Base.

When Lt. DAVIS attempted to advise his headquarters by telephone immediately after the sighting, he heard static or electrical interference on the telephone line which he stated might be possible radio interference.

G-2 has advised that other lights of unknown origin were observed on March 6, 7, 8 and 17, 1949, by military personnel of the alert force stationed approximately 1000 yards east of the fences which surround Killeen Base.

The object sighted on March 31, 1949 was reported as being of a different nature from the lights seen earlier in the month.

It is noted that Mr. WALTER WINCHELL, on his Sunday evening broadcast, April 3, 1949, stated that "flying discs" seen in this country definitely emanated from Russia.

On April 4, 1949, G-2, 4th Army, contacted this office, inquiring as to whether we had any information that would substantiate or discredit the statements made by WALTER WINCHELL.

Letter to Director
SA-100-7545

April 4, 1949

In view of the interest and concern of 4th Army military authorities who have the duty of protecting the vital installations at Los Alamos, N. M., Sandia Base, N. M. in the El Paso Division, and the Camp Hood area in the San Antonio Division, it is suggested that the Bureau may desire to arrange to have Mr. WINCHELL interviewed concerning the source of his information that "flying discs" emanate from Russia.

It would be appreciated if the Bureau can supply any information that can be transmitted to military authorities which would clarify this matter.

Dear Mr. Davis:

Your letter of April 27, 1949, has been received, and I want to thank you for sending me the newspaper clipping which you enclosed together with your observations concerning the designs you submitted to the federal government in 1942. Although I would like to be of service, checks of the type you desire are not within the scope of this Bureau's activities. It was very thoughtful of you to contact me in that regard.

Sincerely yours,

John Edgar Hoover

Flying Saucers

Having read the enclosed clipping you will find with this letter ~~prop~~ prompts me to send it to you and ask you to check The National Inventors Council files on the 2 types of engines & the flying saucer design that I submitted to Mr. Elmer Roosevelt in 1942, which Henry Wallace was Secretary of Commerce, who was in charge of The National Inventors Council.

~~EX-43~~ I mean just this. See how easy it would have been for Wallace to have conveyed these designs to Russia and with held them from our own Engineering Dept. You can make the biggest find here of your life, if you look. I will appreciate a reply.

New Data, Ideas About Flying Saucers

And Death of Pilot Who Chased One

By United Press

DAYTON, Ohio, April 27.—The only airman who ever got near a flying saucer crashed and died before he could describe it, the Dayton Journal-Herald said today.

The newspaper printed a lengthy dispatch on the mysterious flying discs, based, it said, on hitherto unpublished reports assembled at the Wright-Patterson Air Force base. The Air Force investigation has proved that the flying saucers "are not a joke." Neither "are they a cause for alarm to the population," the newspaper said.

The closest any airman came to the mystery discs was on Jan. 7, 1948, when one was sighted over Fort Knox, Ky., the dispatch said. Four fighter planes were sent aloft to intercept it, but only Capt. Thomas F. Mantell was able to get close.

"I'm closing in to take a good look," the newspaper quoted him as reporting by radio. "It looks metallic and of tremendous size. It's going up now as fast as I am. That's 360 miles an hour. I'm going up after it. At 20,000 feet, if I'm no closer, I'll abandon chase."

Mantell's plane crashed a few minutes later and he was killed.

The paper said a report now on file at Wright-Patterson Air Force Base lists 240 domestic and 30 foreign accounts of flying discs as having been investigated. Of these, 30 per cent seem to have been weather balloons and the like and 30 per cent more are perhaps explainable conventionally—leaving 40 per cent unexplained.

The Air Force recently said there was no evidence that the discs were guided missiles fired from some other country, but that

on the other hand it was not impossible that they were. Later the Air Force announced it was not making any further comments on the discs.

The Dayton paper says the report on which its story is based said "evaluation teams" stated:

"We can't prove or disprove the existence of some of the remaining unidentified objects as real aircraft of unconventional design.

Flying Saucers

Dear Sir:-

Take this for what you think its worth, But I keep thinking I may be able to throw a light on the so called, Flying Saucers, I do not know how true this is, but as our own Army says it has nothing to do concerning these Saucers appearing in the Skies, I aim to tell you what a certain woman told me of a supposed secret aircraft hide out and factory that is in or under mountains near Mexico City Mexico.. This young woman is married to a Mexican radio musician there, who seems to be one of a special few who were allowed to visit this place in the mountains. She said that these aircraft was made of some metallic material that could not be recognized in the air only as an almost invisible form. That the passengers or pilot rather, could see out, but lookers on could not see inside. That close up they (the craft) looks a sort of glass. And that they were preparing them for special reason against the U.S.

that there were thousands of them. They were supposed to be the rocket type.

Now Mr. Hoover this was told me in 1944 or 43. at the time I wrote it all down and never thought any more of it until lately. and maybe I am foolish, but I thought maybe this had something to do with the flying saucers, if true.

I am a true American and love my country and if I can do any service for my country I am glad of it.

The flying saucer could be more dangerous than we think.

Respectfully yours.

Office Memorandum • UNITED STATES GOVERNMENT

TO : Director, FBI

DATE: May 13, 1949

FROM : SAC, Los Angeles

SUBJECT: "FLYING DISK" REPORT
INFORMATION CONCERNING

On May 5, 1949 Mr. MEL HODELL, a reporter for the Sun-Star newspaper, Merced, California, advised Special Agent MARLIN W. JOHNSON, that his paper had been contacted by Lt. Col. STANLEY JACOBS, Intelligence Officer, Castle Air Force Base, Merced, California, relative to any reports that the newspaper might have received concerning "flying disks" in the Merced vicinity.

Mr. HODELL stated a close friend of his, one WILLIAM H. PARROTT, 12-A Langdon Villa, Merced, had advised him that he had observed a strange object, and as he is in the Air Corps Reserve, he reported same to the Intelligence Officer at Castle Field.

On the same date Mr. GEORGE BREMER, Detachment Commander, Office of Special Investigations, Castle Air Force Base, Merced, California, advised SA MARLIN W. JOHNSON that he had heard that an individual had reported seeing a "flying disk" to the Intelligence Office at the Base but that the Intelligence Officer had not furnished the information to him. Mr. BREMER later on the same date contacted SA JOHNSON and exhibited a letter written by STANLEY F. JACOBS, Lt. Col., USAF, Adjutant (Intelligence Officer) to Commanding General, Air Material Command, Wright-Patterson AFB, Wright Field, Ohio. This letter contained a statement given by Mr. WILLIAM H. PARROTT which read as follows: "I had occasion to step from my home, located approximately one mile west of the town of Merced, on the night of April 4, 1949, at approximately 2220. My attention was diverted to a clicking noise of considerable intensity. I stopped on the sidewalk about 20 feet from the front steps and recognized the source of this clicking to be in the sky in an area about 40 degrees from the surface of the earth in an easterly direction. The sky condition was 20000 thin broken with 12 miles visibility and surface winds were reported as north nine M.P.H. at Castle Air Force weather station. My home is approximately seven miles south of Castle Air Force Base and in an area somewhat sheltered from surface winds, and no appreciable surface wind was apparent at the time the aural observation was made. After about ten seconds of looking into the area described previously as being the source of this sound, an object was observed blanking out stars in describing a flight path in a west or northwesterly direction. Only one object was apparent, its shape can be described as only a solid mass. Its size can be estimated as four or five feet in diameter in keeping with an estimated altitude of considerably less than 1000 (one thousand) feet. Color was shown by the reflection of ground lights on only two occasions, and appeared to be

EX-39

dull surfaced, light colored metal. The only ground lights of intensity were a row of street lights behind me one half block which leads me to believe the under surface of this object to be curved in shape.

"This object when first sighted, was moving very slowly in a west or northwesterly direction. I would estimate that I had it in my range of vision for 35 seconds, after having heard it about ten seconds before locating it. It passed on beyond the house and maneuvered through an arc of turn to the left of about ninety degrees. The clicking sound was continuous throughout this turn, however, it became louder as it returned on its new heading of south or southwest. On its return the clicking sound became louder, but I was unable to see it at this time. The clicking stopped when it was at its greatest intensity and appeared to come from a position directly over head. I was unable to see the object after the sound stopped.

"This clicking sound, retained the same pitch and speed throughout the entire course observed, but intensity varied. There was not whistle or roar, but only the clicking noise which might be compared to beaters of a home mixer that were not properly meshed. No lights or flame were observed during the entire course with exception of the previous described reflections twice. No exhaust trail was distinguishable.

"My dog was with me and directed her attention in the general direction of this object's flight throughout its course. She had been romping with me on coming out of the house but without spoken word stopped and directed her attention on to the previously described area. The clicking sound might not have been unusual to the dog, but there is a possibility of sounds on wave lengths discernable only to the dog, being emitted."

It is to be noted that Mr. PARROTT is a member of the Active USAF Reserve with rank of Major. He attained rating of pilot in August 1941 and has approximately 2200 hours flying time. During his active duty period in WW2 he stated that he had considerable night flying experience in connection with his military assignment. The Intelligence Officer in the above mentioned letter made the following statement, "An attempt to locate other witnesses in the area or through the local newspaper proved unsuccessful".

Mr. BREMER advised that he is planning to clear with his headquarters office and will probably conduct an investigation.

The above is being furnished for the information of the Bureau.

BACKGROUND:

Walter Winchell forwarded to the Director a Western Union telegram he had received from Robert Ripley which stated that he, Ripley, had the only authentic Japanese flying saucer ever recovered in this country. Mr. Winchell noted on the telegram, "To J. Edgar Hoover - True?"

DETAILS:

This matter was discussed by Special Agent Reynolds with the Intelligence Division of the Army, who advised that they had no information concerning any Japanese flying saucer ever having been recovered in the United States.

This matter was discussed with Colonel William E. Carpenter, OSI-USAF, who advised on April 27, 1949 that he had interested himself in the flying saucers and related subjects and that in so far as could be determined by him through his sources in the Air Force, which are excellent, there is no authentic information available concerning the phenomenon of the flying saucers. He advised he would check with the authorities at Wright Field to determine if any information is available concerning the recovery of a Japanese flying saucer.

Colonel Carpenter has now advised that there is no information available in any arm of the Air Force to the effect that any flying saucers of any kind have been recovered in the United States. Colonel Carpenter stated delay had been encountered in determining this fact inasmuch as inquiries had been directed through individuals known to him and trusted by him and not through the usual channels from which he possibly would receive a stock answer.

The details of this case were not discussed by either Special Agents Reynolds or Sanders with the Army or Air Force and they are not aware of the telegram sent by Mr. Ripley to Mr. Winchell.

RECOMMENDATION:

The foregoing is for your information and any disposition being desirable.

DATE: May 26, 1949

TO: MR. FLETCHER

FROM: V. P. HARRIS

SUBJECT: JAPANESE PILOTS

REFERENCE:

Letter Winchell forwarded to the Director a certain Union telegram he had received from Robert Wiley which stated that he, Wiley, had the only authentic Japanese flying saucer ever recovered in this country. Mr. Winchell noted on the telegram, "To J. Edgar Hoover - True?"

DETAILS:

This matter was discussed by Special Agent Reynolds with the Intelligence Division of the Army, who advised that they had no information concerning any Japanese flying saucer having been recovered in the United States.

This matter was discussed with Colonel William J. Carpenter, D-I-241, who advised on April 27, 1949 that he had interested himself in the flying saucers and related subjects and that in so far as could be determined by him through his sources in the Air Force, which are excellent, there is no authentic information available concerning the phenomenon of the flying saucers. He advised he would check with the authorities at Wright Field to determine if any information is available concerning the recovery of a Japanese flying saucer.

Colonel Carpenter has now advised that there is no information available in any part of the Air Force to the effect that any flying saucer or any object has been recovered in the United States. Colonel Carpenter stated that he had encountered in determining this fact numerous reports and had checked through individuals known to him and trusted by him and not through the usual channels from which the possibility would receive a check answer.

The details of this case were not checked by either Colonel Carpenter or other officers with the Army or Air Force and the Director was not aware of the telegram and reply to Mr. Winchell.

Mrs. Frank Gardner
2310 W. Garvey
El Monte, California

Dear Mrs. Gardner:

I wish to acknowledge your letter dated April 29, 1949, and to express my appreciation for your thoughtfulness in writing to me.

In view of the contents of your letter, I have taken the liberty of sending a copy to the United States Air Force.

In the future, if you have information which may be of interest to this Bureau, you may find it more convenient to communicate with Mr. R. B. Hood, Special Agent in Charge of our Los Angeles Office, 900 Security Building, Los Angeles 13, California.

Sincerely yours,

John Edgar Hoover
Director

cc Los Angeles with copies of incoming.

The correspondent communicated with the Bureau on one previous occasion enclosing a clipping from a Spanish language newspaper in Texas. She was apparently dissatisfied with the manner in which the Latin Americans were being treated in Texas. A cordial letter of acknowledgement was sent to her. (100-33339)

On the afternoon of May 20, 1949, Miss Kaye Lochrie, 4900 N. Harding Avenue, Chicago 25, Illinois, was referred to my office from the Director's Office.

Miss Lochrie stated she was going to be in Washington for a few days and that she was staying at the Ambassador Hotel. She stated that Roy Palmer, Managing Editor of the Jeff Davis Publishing Company in Chicago, had some information regarding flying discs. Miss Lochrie said that Palmer's theory was to the effect that when people died their souls entered a space on this earth which is, of course, invisible to human eyes. He said that in this soul world there are good and bad people and that they have become involved in a war. According to Miss Lochrie, Palmer's theory is that the flying discs which have been seen are the explosives being used in the warfare between the good and bad souls.

Miss Lochrie stated that the real purpose of her visit to the Bureau was to get her own name cleared. She said that the FBI has been conducting investigation regarding her and that she wanted to know the results of the investigation. I asked her what kind of an investigation the FBI had been making regarding her and she stated she was under suspicion of espionage activities. I informed her that I could not furnish her with any information which is contained in the Bureau's files inasmuch as our files have been designated as confidential by the Attorney General.

Miss Lochrie accepted this explanation and stated regarding her present activities that she had been in the Wacs as a private and had received an honorable discharge in 1945. She said at the present time she is working as a model in Chicago.

She impressed me as being somewhat mentally unbalanced.

A check of the files failed to reveal that we have conducted any investigation relative to this individual.

Office Memorandum • UNITED STATES GOVERNMENT

TO : Director, FBI

FROM : SAC, New Orleans

SUBJECT: FLYING DISCS

DATE: June 2, 1949

Re SAC Letter 38, dated March 25, 1949 entitled as above.

The Bureau is advised that through the Office of Naval Intelligence, New Orleans, Louisiana, this office has been advised that within the past ten days three sightings of flying discs have been reported in the City of New Orleans. The information seems to be that the single discs were in straight flight and traveling in a general direction of North, in late afternoon, about the size of an observation plane, but the shape of a saucer. The Navy stated that two witnesses have advised that the object was traveling end over end; that weather conditions were good; that sightings were made outdoors by persons who did not wear glasses; that the dates were May 18, 19 and 23, 1949. The Navy states that it was possible these objects were weather balloons, but that these are used from only one airport, released over an hour before the times of sighting and would generally be out of sight in a few minutes.

The above is being furnished the Bureau for future reference since the Navy has informed that all three instances were investigated by the Army Intelligence.

Ha
J.M. 3-

Walter Winchell
New York, New York

Dear Sir:

Under attached cover you will find a sample of our item. Should you do no more than take our FLYIN' SAUCER out, carefully read the instructions, and fly it; I will have accomplished a portion of my expectations.

For the past few weeks I have listened with more than an indifferent attitude, to your various Sunday evening broadcasts and comments concerning Flying Saucers. From the start, much as many another individual who has tried to get ahead by his own initiative, I have visualized what the right type of publicity would do for my interests.

To state my actions in any other manner, would belittle your intelligence, and the weeks of forethought and sincerity in which this is submitted.

Your comment this evening, concerning the Gyroscopic Theories, sparkplugged my actions.

Along with the phases of merchandising mentioned in the attached articles, I should like to mention that one troop of Boy Scouts in Los Angeles are purchasing and enthusiastically include them as a major portion of their recreation program.

By these facts, it is apparent that our FLYIN' SAUCER is worthy of every effort we are able to summons in making it another American pastime of Yo-Yo proportions.

Trusting that we are justified of your consideration from a newsworthy standpoint, I remain

Very Sincerely Yours,
Warren R. Francioni

The Amazing -FLYIN-Saucer

GREAT FUN FOR THE WHOLE FAMILY!

FLYIN-Saucer performs in an amazing way as you develop your skill in flying it. A novel way to play catch. You will think of many games to play. Adaptable to almost any game.

HOW TO FLY

Launch your FLYIN-Saucer straight ahead with a snap of your wrist making it spin as fast as possible. DON'T THROW TOO HARD. . . . It's the spinning that gives it lift. Begin by flying about 10 feet. When windy, throw across the wind. You will quickly learn how to bank to the left or right.

FLYIN-Saucer

(A Gyroscopic Airfoil)

PRECISELY ENGINEERED • AERODYNAMICALLY CORRECT
MADE TOUGH TO RESIST ROUGH HANDLING

FLIGHT INSTRUCTIONS

FLYIN' SAUCERS have flight characteristics very similar to airplanes. The SAUCER IS launched in identically the same manner as sailing your hat onto a hook--by spinning and forward motion.

In order to fly in a straight line, the SAUCER must leave the hand in a level position. To curve the SAUCER, it must leave the hand banked or tilted in direction of desired curve--for example: for left curve--the left side of the SAUCER must be tilted down.

FOR BEST RESULTS -- The spinning of the SAUCER is most important and most difficult to master. Because the spin creates a gyroscopic action which controls the attitude of the SAUCER in flight, a smooth, fast spinning delivery should be developed. Do not hold the SAUCER too tight.

Analyze your mistakes and make corrections by tilting or banking SAUCER. The correction must be applied to the SAUCER as it leaves the hand.

SAIL 'EM BACK AND FORTH - PLAY CATCH !

Begin by flying your saucer about 10 feet. The distance you are able to fly it will quickly increase with practice.

MAKE 'EM TURN !

By releasing the SAUCER in a tilted manner, you can make it turn to the left or right. Bank it the way you want it to turn. It is advisable to learn to fly straight before starting to make turns.

MAKE 'EM COME BACK !

After learning to fly straight and make turns, you'll be able to make your SAUCER return to you by sailing it into the breeze at a sharp angle. The harder a wind blows, the flatter an angle you can fly it to make it return. Spin SAUCER as much as possible.

MAKE 'EM SKIP !

Right-handers launch SAUCER so that left side strikes hard surface. Right side for left-handers.

THE GAME OF HECKLE

THE GAME OF HECKLE provides a means of utilizing the unique manner in which the FLYIN' SAUCER can be guided. Rules and regulations are provided, forming the basis for skill and competition

PLAYERS -- Four -- with two on each team.

OBJECT -- To fly SAUCER around HECKLERS into your partner's circle.

ALL CIRCLES ARE 6 FEET IN DIAMETER .. CENTER SPACE MAY VARY WITH ABILITY.

All players must remain in their circle until SAUCER is airborne.

The game begins with the Flier (A) attempting to sail the SAUCER around the HECKLERS in the circles (B) and (C) so that his partner in the Receiver's circle (D) can catch it.

Flier (A) must remain in his circle when serving the SAUCER.

HECKLER (B) must remain in his circle at all times while his team is defensive. He may attempt to stop the flight of the SAUCER, or distract the Flier in any manner. Should he step or fall out of his circle, his team forfeits 1 point and the offensive team retains serve.

HECKLER (C) remains in his circle until SAUCER is airborne. He may then leave his circle to heckle the Receiver (D) in any manner so long as he doesn't interfere with flight of SAUCER or touch the Receiver, or step into the Receiver's circle. Hecklers forfeit 2 points for each infraction.

Receiver (D) attempts to catch the SAUCER in his circle. Should he do so, then his team receives 2 points. Should it be necessary for the Receiver to leave his circle to catch the SAUCER, then his team scores but 1 point. Should he drop or miss the SAUCER, no points are scored, and the teams change positions. (A) changes with (B) and (C) changes with (D).

(C) is now the Flier, and (B) the Receiver. HECKLER (D) must remain in his circle, and the HECKLER (A) becomes the roving HECKLER.

Teams change positions when the Receiver fails to catch the SAUCER.

In the event that no Referee is available, disputes will be settled by mutual agreement, or the flip of a coin.

First team to score 25 points wins the game.

KEEP 'EM FLYIN'

Flying Saucers Come from Southern California

DO YOU HAVE spots before your eyes? Do vari-colored discs flutter and sail in the air in front of you? Do you see flying saucers in the skies?

If you do, don't call the doctor nor jump on the wagon. And don't worry. Other persons are seeing flying saucers too—seeing them fly through the air—and seeing them on the sales counters of the stores. You can even pick them up and feel them, and, preferably, buy them to play with.

It all started many years ago—long before the recent flurry of flying saucers—when a little boy named Freddie used to play with his mother's pie tins. If he threw them with just the right twist of the wrist, they spun and turned in fascinating curves.

Freddie grew up into a man called Fred Morrison, who always remembered what fun he had had playing with the pie tins. As a grown-up, he applied his knowledge of aerodynamics to the problem of developing a disc which could be thrown and tossed and its flight controlled by the thrower.

He evolved a metal model that sailed through the air in a most satisfactory manner. The curved disc was 9 in. in diameter and a scant 2 in. deep, with radiating arch-shaped fins and a heavy outside rim. A snap of the wrist when throwing gives a centrifugal motion to the disc which in turn gives guidance in flight. The radial fins create a vacuum on top of the whirling disc, and stability from beneath is provided by the heavy rim.

The metal model sailed through the air beautifully—but also, being metal, it sailed through windows and hedges and other obstacles, somewhat after the manner of a miniature cyclone. A material other than metal seemed a wise idea if the disc—or flying saucer—were to become a commercial product.

A lightweight, slightly flexible plastics looked like the answer, and Morrison brought his metal model to Southern California Plastic Co., Glendale, Calif., to see what might be done in plastics. Stanley J. Gray and Edward L. Kennedy, president and secretary of the firm, took the metal disc out on the lawn to "demonstrate" its possibilities and were soon breathlessly convinced that a great deal of fun could be had by young and old alike.

A plastics model of the disc was carved from a solid block of material, and then a mold made in the shop of Southern California. Engraving of the mold was done by United Engravers, Los Angeles.

Then came the problem of the right material. A search was made throughout the range of thermoplastic molding compounds to find the proper material that combined flexibility, impact strength, and stability while in motion. (The discs achieve considerable speed—and strain—when in flight.) Cellulose acetate provided the best combination of properties to do the job. Acetate discs will not break glass windows, nor shatter when falling from a great height, nor scar the finish on automobiles, nor injure the players.

That's a real Flyin' Saucer this young man has just thrown into the air—molded of tough and lightweight cellulose acetate by Southern California Plastic Co., Glendale. Designed in accordance with aerodynamic principles, the Flyin' Saucer spins through the air with the greatest of ease. Note the radial fins on the disc in the boy's left hand.

An interesting part of the story is that producing the acetate "Flyin' Saucer" is only part of the story. It is a product with a wide market (how many yo-yos were sold in the US last year, do you suppose?); but it must be demonstrated to be sold. Everyone who sees a Flyin' Saucer in action is enthusiastic. Anyone who sees one lying on a sales counter is likely to pass by.

That presents a merchandising problem that has the sales staff of Southern California Plastic hard at work, thinking up ways and means for demonstrations, action publicity, visual promotional stunts. With a record of steady-selling staple consumer items now on the market, Southern California has no intention of letting the Flyin' Saucers sit on the sales counters. Carefully-controlled distribution, related to on-the-spot demonstrations or promotional campaigns, has been the rule so far. National markets will not be tackled until all the promotional kinks have been unraveled.

'Sky Devil-Ship' Scares Pilots; Air Chief Wishes He Had One

EAL FLIERS DESCRIBE WINGLESS AIRCRAFT
Copilot John Whitted and Capt. C. S. Chiles (right).

Plane Makers Dubious About Alabama 'Thing'

By WILLIAM KEY

What was that Thing that scared the daylights out of two Atlanta Eastern Air Line pilots in the spooky hours Saturday morning?

Is there some stratospheric Loch Ness fire-breathing monster on the Milky Way run between Atlanta and New Orleans?

The pilots, Capt. C. S. Chiles, of Atlanta, and Co-Pilot J. B. Whitted, of Hapeville, would like to know. The Army Strategic Air Command would like to know. Big airplane manufacturers also are curious, but slightly dubious.

Pilots Chiles and Whitted told their thrilling story upon arriving at municipal airport here Saturday on the Houston-Atlanta, Boston run. Here is what they say they saw, near Montgomery:

A gigantic plane without wings, black against the night sky, streaking through the heavens at 5,000 feet altitude with a fiery comet's tail 25 to 50 feet in length. It had a 100-foot fuselage about four times the circumference of a B-29's, and two rows of brilliantly lighted square windows. Creepiest of all, it was a veritable Flying Dutchman of the Skies. Nary a living soul was seen aboard!

Continuous Light

The pilots admitted they had goose pimples riding pick-a-back on goose pimples. What's more, they said one of their 20 passengers—C. L. McKelvie, of Columbus, Ohio—was awake and saw the same thing.

Reporters nailed Mr. McKelvie at Kennett Square, Pa. How about it, they asked him—had he seen what the Atlanta pilots said he saw?

Well, now, said Mr. McKelvie—not exactly. He said he saw “no form of ship” whatever. He saw a “continuous light speed past” his window.

“But,” added Mr. McK., “I’m not very well versed in aeronautics, and certainly I wasn’t looking for any Buck Rogers space ship.”

Out at Santa Monica, Cal., the famous Gen. George C. Kenney, chief of the Strategic Air Command, was bearded in his den. His eyes twinkled. No, he said, cautiously, it wasn’t one of his planes. The Army as yet hasn’t got anything like the Thing seen over Montgomery.

Not Boeing Plane

“I wish we did,” the general said wistfully. “I sure would have liked to see that Thing.”

So said William M. Allen, president of the Boeing Aircraft Co., up at Seattle. “I’m pretty sure it wasn’t one of our planes,” said Mr. Allen, modestly.

Almost identical statements issued by the Army Air Forces at Washington and the United States Weather Bureau at Montgomery tended to throw some light on this fantasy. Both sources suggested that the Atlanta pilots had flown past an air radar weather observation balloon. Those things, they explained, are 10 feet in diameter and have square, tinfoil boxes fastened to them. The boxes reflect light and “give strange illusions” as they twist and turn. Maxwell Field said they send ‘em up at six-hour intervals.

And Maxwell Field is at Montgomery.

'Flying Floor Lamp' Again Sighted Here

By CHARLES POU

That "flying floor lamp" is at it again!

An illuminated cantaloupe rolled over the city!

And a newspaperman saw "great balls of fire!"

What's more, two Richmond Va., schoolteachers say they saw the same "flame-spurting" sky monster which was spotted by Eastern Air Lines pilots near Montgomery.

Like Red Floor Lamp

"I saw Halley's comet—and it was nothing like what I saw last night," declared Mrs. W. R. Delk, of 914 Hemphill ave., N. W. Breathlessly, Mrs. Delk continued: "The front end of it looked like a flying floor lamp—a fiery-red floor lamp. Then it trailed off in little square sections.

"Oh, Halley's comet was nothing like that."

And Mrs. Delk was joined by at least 15 other Atlantians who saw a Thing which banked and rolled and breathed fire over the city Monday night between 8 p. m. and 9:45 p. m.

In the downtown section, Mr. and Mrs. Richard P. Sellers were minding their own business when a "reddish-white ball of fire about the size of a cantaloupe with a tail on it" darted over buildings.

Mrs. A. C. Kirby, of Carey Park, has never seen a purple cow but

she did see "a great ball of fire with a great long purple tail on it." That was about 9:40 p. m.

'Bluish Streak of Light'

An attendant at the naval air station thought he was watching a falling star, until it started climbing and banked away from Atlanta. To him, it looked like a "bluish streak of light."

And now about the newspaperman. John Battle, city editor of the Augusta Chronicle, hung up the telephone after a dozen calls about weird goings-on in the Augusta skies.

He looked out the window.
He summoned his staff.
"Great balls of fire!"

62-83 894-145

'LIKE BIG FLOOR LAMP FLYING 'ALONG'

Everybody's Seeing 'Things' Whizzing Through Night Sky

By CHARLES POU

Is that Thing no more than a wayward floor lamp?

Mrs. Noah Atkinson, of Brookhaven, saw it. And what did that Thing look like?

"A great big floor lamp, all lit up. Oh, it was beautiful!"

And C. M. Bowles, an Exposition Mills painter who lives near the Municipal airport, Sunday night saw a "huge, brilliantly lighted object" streaking over Atlanta skies at maybe 30,000 feet. Mr. Bowles thinks the Thing was straight from Moscow.

Two air line pilots first were startled by the newest astronomical "what-is-it" near Montgomery early Saturday. To them, it was "a wingless craft, spurting flame like a Buck Rogers rocket ship." Elsewhere, all over the country, that Thing was variously identified as:

1. An aluminum covered balloon.
2. A ball of fire.
3. An unusually bright light.
4. A red and blue flame that

burst in mid-air.

5. A flash of cherry red fire.

6. A meteor.

Mrs. Atkinson kept her Flying Floorlamp secret three weeks. But she knew she wasn't seeing things when she saw the Thing.

She and her husband, who also saw it, kept mum. The story really sounded a little silly until the two air line pilots saw their Thing gamboling and fire-breathing through air-line skies early Saturday morning.

After that, she decided her tale could be told:

"My husband and I were sitting on our front porch the night of July 5, and at a quarter to 9 o'clock we saw this Thing. Our front porch doesn't have a screen, and we were sitting near the edge where we could see good.

"I saw it first. It was not high up—about 200 feet, I guess, but it looked like it was right above the treetops. 'Looka there', I yelled to my husband, and he saw it too.

"It looked like the top part

of a floor lamp, and it was the prettiest thing I ever saw. It came and passed so quick—I guess it must have been 500 miles an hour or faster."

And how about the two air-line pilots, C. S. Chiles and John B. Whitted, of Atlanta?

Well, they took off today, armed with a camera. And they hope to bring back a picture of that Thing.

Beach Throngs Crane At 'Silver Cylinder'

ASBURY PARK, N. J., July 26. (AP)—Boardwalk throngs at this resort city craned their necks Monday at a "silver cylinder" they reported flying high overhead.

They described it as "way up in the air," and like a blimp "only blunt at both ends."

Officials, recalling "flying saucers," asked Fort Monmouth personnel to see if they could identify it.

Publisher,
Atlanta Journal,
Atlanta, Georgia.

Dear Sir:

On July 25, 1948, I mailed a letter enclosing .35 cents in coin and an airmail self-addressed envelop to your circulation department, asking for tear sheets of the Atlanta Journal containing the stories on a "strange" or "mysterious" aircraft seen near Montgomery, Alabama, July 24, 1948, by two pilots, Cap't C. S. Chiles and John B. Whitted, of the Eastern Air Lines.

These have not arrived. I asked for two copies each of the stories.

Enclosed is an additional .35 cents, and another stamped self-addressed envelop. Will you kindly see that your circulation department complies with this simple request?

I assure you that my interest in the above stories is prompted by interest in the defense of our country, and you are hereby given my fullest permission to turn this letter requesting the copies of the stories over to the FBI, should you wish.

Thanking you very kindly, I am,

Sincerely,

/s/ Mrs. Madeline Gwynne Merchant
Mrs. Madeline Gwynne Merchant

cc/Agent-In-Charge
Federal Bureau of Investigation
Atlanta, Georgia

The incident was, I believe, an important one. And though I have already made reports to Maj. Sidney Newburger of Los Alamos and to General Handy, I would appreciate the fuller newspaper stories appearing in the press there. Thanking you kindly, I am,

Sincerely,

/s/ Mrs. Madeline Gwynne Merchant

Atlanta, Georgia.

Dear Sir:

Enclosed is a carbon of a letter requesting tear sheets of the unusual aircraft seen near Montgomery, Alabama, July 24, 1948, stories concerning which were carried by AP and UP, originating in Atlanta.

It may have been oversight by someone in the circulation dep't of the Atlanta Journal, or it may have been "alarm" that a woman would be requesting this type of information, even though it was published, and thereby open information.

Even though I cannot identify myself to the Atlanta Journal publisher or staff, I can to you. I have worked independently on the problem of aerial missiles, of which I believe this was an example, with all my data going directly to officials and members of the security office of the Atomic Energy Comm., Los Alamos Atomic Project, Los Alamos, N.M., and to high members of the War Department, including Gen. Thomas T. Handy, Fourth U. S. Army Commander, Ft. Sam Houston, Tex., head of this U. S. Army district.

cannot and should not try to do that again, let us not with the excessive zeal of the new convert be blindly intolerant of those who do not immediately have the courage of all our own most recently acquired convictions.

How to get

Ex-Army Air Force Fliers Invent Novel, New Game

'Flying Saucers' Catch Fancy of Day on Beach Visitors and Residents

By JACK TROY
Times-Union Staff Writer

DAYTONA BEACH, Feb. 14—The ingenuity of two former Army Air Force fliers from California is "paying off" at this Florida Beach resort where, nowadays, the air is full of "flying saucers."

When Major Warren Francioni and Lieut. Fred Morrison of San Louis Obispo completed their war experiences in the China-Burma-India and the Italian theatres of operation, they returned home and joined forces in a novel industry.

Morrison had always been intrigued by the idea of sailing pie pans on the beach, and so he and Francioni put their heads and talents together and came up with a plastic version with fins. They then had invented a new game, a novel way of playing catch with flying saucers, a gyroscopic airfoil aerodynamically correct, precisely engineered and a pleasant way to take exercise.

Grid Coach Uses It

The football coach at Hemet, Calif. High School was intrigued with the idea of using the saucers to condition his players, teach them balance and to reach out to make catches of the discs which, by certain methods of spinning, boomerang and also sail away from the intended receiver. A player has to be on his toes to catch them, especially if the wind is blowing.

It may be just coincidence, Francioni and Morrison said today, but the Hemet coach last season turned out his first championship team. The boys were on their toes.

Although they had their discs made in Glendale and had planned on extensive West Coast promotion, snow flakes unexpectedly fell and so they headed for Daytona Beach, where, according to the tourists, "summer spends the winter."

No snow flakes fall here; only flying saucers, which are so durable that they are not injured by cars passing over them.

Morrison was shot down in his fifty-eighth mission in Italy but escaped serious injury. The two ex-Army officers refer to themselves as the world's champion Flying Saucer pilots, and certainly their novel invention—conceived in California and promoted in Florida—has caught on with beach lovers.

They were smart enough, of course, to patent the Flying Saucer idea in order to capitalize on ready-made publicity born of repeated Saucer scares around the country.

In throwing the old pie or cake tins there always was the danger of cutting one's hands. But with the new plastic fin saucers, the only danger is getting bopped in the nose. And only the less agile allow that to happen once in a while.

Promotion Main Problem

Francioni and Morris feel that coaches might find their sailing gadgets just as handy in training a squad as did the coach of Hemet. And they are hopeful that they may, in time to come, expand their wares from coast to coast.

At the present time Daytona Beach is the only resort that has seen the saucers. The boys are contemplating attending a few fairs and getting their product before larger masses of the public.

"Promotion is our only problem," Morrison declared. "Production is no item. All who've tried our interesting little gadget seem to have fun sailing it, and they also find that they are using muscles long neglected."

SUBJECT: FLYING DISCS SIGHTED AT RADFORD, VIRGINIA
MAY 12, 1949

R3-

G.I.R.-8

There are enclosed ~~two~~ clippings concerning what has been described as a flying disc sighted at Radford, Virginia on May 12, 1949. The Bureau may desire to refer this to the Department of the Air Force. This office has no information other than that appearing in the news items which appear to cover the best information available. The matter was not reported directly to this office and, therefore, no investigation or inquiries are being made and none of the individuals who allegedly saw the thing have been interviewed.

Nobleboro, Maine

Dear Mrs. Beston:

Your letter postmarked May 16, 1949, has been received and I want to thank you for sending me information concerning the matter you mentioned. It was indeed very thoughtful of you to report that data to this organization.

Sincerely yours,

John Edgar Hoover
Director

G I. R. - 8

NOTE: Correspondent saw a small object in the sky near the end of the day which took various shapes and through glasses appeared like a double bloom trailing something below it. She believes it might be a flying disk. In view of her nebulous information and as it was very possibly a weather balloon no further action is deemed necessary.

These Flying Discs Are at It Again, Virginians Report

Zounds! Here we go again! Interplanetary space-ship? Visitor from Mars? A new Russian rocket ship? Airgoing submarine? Just take your choice, your guess is every bit as good as the next one according to reports from various sections of Virginia and Tennessee on last night's strange phenomenon.

What it was, where it came from and where it was going, no one knows, but even Civil Aeronautics Administration officials were puzzled and had no answer.

Whatever the thing was, it resembled a long cigar, with a bright red nose and trailing smoke. Reports coinciding with that description came from localities along an almost direct line through Tennessee and Virginia and seemed sufficient to convince even the most skeptical that what the callers said they had seen was no figment of imagination.

The descriptions generally indicated the object came over the southwest horizon and resembled a streak of fire. There seemed to be red lights or a powerful red glow in the nose of the object. Far back at the tail there was fire and smoke.

The first report came from Roanoke about 8 o'clock when J. S. Mays and W. F. Mullins, both of that city, said they noticed the object.

"It looked like a streak of fire," said Mays, "and appeared to be going almost straight up and was stepping on it."

Suddenly, he said, it appeared to level off and head eastward, resembling "a snake wiggling on water."

Other reports followed from Kingsport, Tenn., Bristol, Pulaski, Christiansburg and points west of Roanoke.

William C. Flanik, chief aircraft communicator, CAA, at Preston Glenn airport, said none of the Lynchburg tower men had sighted any unusual objects in the sky.

Did You See It? Well, What Was It?

By WELLS CALDWELL

The strange object seen traveling across the heavens just after sundown last night has caused widespread speculation here in Radford as well as in other sections of Southwestern Virginia and Eastern Tennessee.

Exactly what the mysterious traveler was, no one here seems to know, and the number of conflicting reports have only added to the confusion.

This much seems to be certain: the object appeared over the Southwest horizon shortly before 8 p. m. and was moving eastward. Also, it was black, or at least part of it was.

A Radford man, living in the east end section, asked that his name not be used, but give this version:

"I was working in the yard when I glanced up and saw a long black thing flying across the sky. It came from the direction of Pulaski. It looked a great deal like a rounded stick of wood which was burning in

front. The object was trailed by either vapor or smoke and faded from view when it seemed to be directly overhead."

Mrs. Alfred Tolley, of 1702 Seventh Street, west, reported her 12-year-old son, Albert, was playing next door and noticed the object. She said her son had been studying comets in school and called her attention to the phenomenon, thinking that it was either a comet or a meteor.

"The strange looking object", she said "was long and black with a light on the front end. It seemed to follow the air route from the direction of Pulaski, later turning and heading toward Blacksburg. There was a light on the front end and great long streaks of fire. We saw it for about 10 minutes."

Miss Joe Stewart, of the Radford College biology department, said she saw the object and assumed it was the exhaust from an airplane. She added that she was "in no way alarmed."

Fred W. Hurt, of Fourth and

Harvey Streets, gave this version: "At the first appearance it looked like a comet. I recall Halley's comet and it resembled that. There was, at first, a bright spot ahead of the stream of fire, but the trail didn't look so bright when the object reached its zenith.

"It appeared to be moving slowly at first and later very fast, which indicates that it was quite a distance away when I first saw it. The object seemed to follow a straight path, however it veered a little once — in sort of an arc — and then straightened out again. I heard no noise."

Mrs. James D. Heinline, of 60 Jackson Street, Monroe Terrace, said she and her husband watched it with some neighbors.

"It looked like a long black cigar which was on fire", she stated. "We heard a faint sound, which might have been a small motor. At times it looked like an airplane way, way off. I thought at first it might be a comet or a meteor, but it seemed

to be traveling too slowly for that. It appeared in the southwest and traveled toward the east. There was a kind of reddish looking smoke about it."

Miss Dody Jones, of Harvey Street, reported watching the phenomenon with a group of children in the neighborhood. She said it looked like "what I think a comet would look like."

"It was a red flare", she continued, "which was light on the front. It moved slowly from the Southwest and traveled what seemed to be straight up. It curved toward the east and the fire streaks trailing it got longer as they began to fade out."

L. B. Graybeal, of Christiansburg, a former Air Force pilot, estimated the altitude of the object at 6,000 feet. He said there was a light from the object as it passed over and a "roaring sound."

Other reports have been received from as far West as Kingsport, Tenn., and as far East as Bedford.

ENCLOSURE

Remember Flying Saucers? Well Looks Like Flying Seegars Now

Flying saucers are passe. Now people in Bristol are seeing "long, cigar-shaped object" flashing across the sky.

But Bristolians were not the only spectators of the strange craft yesterday evening.

The flaming object was reported sighted at Kingsport, Christiansburg and Roanoke and three at Pulaski.

Rex Rainey, 1805 State Street, reported that he saw a "whitish, glistening mass, long and cylindrical like a big cigar," flying from east to west about 7:15 yesterday. He said he sighted the "cigar" flying very rapidly over Virginia Heights and got out his binoculars to look at it.

An unidentified caller informed the Herald Courier last night that she had sighted something that "looked like white smoke with a blue flame that traveled to the north and east" about the same time. "It didn't look like an airplane," she said, "only like white smoke. It was just a streak and almost out of sight it was so high."

Another local woman reported that she had seen a "silver streak that looked like it was about 100 feet long" flash across the sky shortly after seven o'clock. She estimated the speed at about 200 miles per hour.

A traffic controlman at Tri-Cities Airport, who asked that his name be withheld, said that the strange craft had not been seen at the airport although they had had inquiries on the "cigar-streak."

He said he had checked with the Atlanta Air Route traffic control center after receiving inquiries but they reported no knowledge of any jet aircraft in this vicinity.

He speculated that the streaks may have been caused by a jet-propelled plane or planes. "The objects were reported flying at an altitude of 30,000 feet," he said. "If a jet plane were flying that high, it would be moving so fast the vapor trail would be about all a person on the ground could see."

The controlman said that the

Pulaski radio reported two seen there. One about 4 p. m., and the other an hour later. He said that Pulaski also had a pilot's report of the "streak" traveling northeast at an altitude of about 30,000 feet.

Reports on the "flaming object" were received at Christiansburg and Roanoke but airports in those vicinities reported no information on the strange craft.

to glance at the zenith which
was clear and was surprised
to see a small object bright
in the sunset. It might have
been half of the smallest
of clouds but its shape was
angular, more like a piece
of torn paper. This shape
changed as the object floated
north easterly before the wind;
sometimes it appeared to
have a bite taken out of it,
Several times it reminded
me of a hand. I called
my husband and sister and
later on house keeper and a
friend of hers.

As the object grew smaller
it seemed to be on fire, an

at their ends so that the vehicle presented the appearance of an aimless marionette, constantly whirling. To me, with the glasses, the middle appeared sometimes bean shaped but that may well be a defect in my eyesight, as the object was then very distant.

At last it disappeared from sight entirely. As we had no guess at its altitude we could not guess its size although I would hazard the statement that it seemed set about the usual altitude of passing planes and seemed to fade away much as a plane would, but far more slowly. We must have seen it for ten

effect we supposed of the sunset;
it seemed to keep the same
altitude but became small and
dark, a line, perpendicular to
the earth, always revolving
but never losing its perpendicular
position. With binoculars it
appeared in shape like
a double balloon, trailing
something below it. The lower
balloon "or body" seemed a little
larger. My sister whose eyesight
is remarkably good, said that
both balloons appeared to her
pear-shaped and the trailing
object below seemed separated
into two "legs" with heavier "feet"

FEDERAL BUREAU OF INVESTIGATION

Form No. 1

THIS CASE ORIGINATED AT **PHILADELPHIA, PENNSYLVANIA**

FILE NO. **62-2542 VFH**

REPORT MADE AT PHILADELPHIA, PA.	DATE WHEN MADE 6-15-49	PERIOD FOR WHICH MADE 5-20-49	REPORT MADE BY JAMES L. KIRKLAND
TITLE UNKNOWN SUBJECT; FIRE, SCRANTON, PENNSYLVANIA, UNKNOWN DATE GEORGE KINGTON, COMPLAINANT			CHARACTER OF CASE MISCELLANEOUS INFORMATION CONCERNING

SYNOPSIS OF FACTS:

FREDERIC MARQUARDT submitted ash residue to Fire Marshal's Office, Philadelphia, Pa., which made chemical analysis. MARQUARDT of opinion that fire may have been caused by military flare or "flying saucer".

Flying Saucer

sh. to clear

LW 2

- C -

DETAILS:

This investigation is predicated upon a letter received from the office of the Fire Marshal, Philadelphia, Pennsylvania, dated May 19, 1949, advising that ashes had been received from one **F. MARQUARDT**, purportedly from a fire which had continued to burn for twelve hours. A chemical analysis of the ashes had been requested. The Fire Marshal's Office noted that MARQUARDT had at one time worked for the Atomic Energy Commission.

*f.c. to AFI
6-30-49
FHM*

Captain **MICHAEL HANNAN**, Fire Marshal's Office, advised that there had been received through the mail on April 21, 1949, an ash sample with a request for analysis. In the letter of transmittal, MARQUARDT had pointed out that the fire had continued to burn twelve hours after water had first been applied. The original letter of transmittal was examined and reflected that an object had entered the roof of the building, caused an explosion, and threw people out of bed.

Captain HANNAN said he attempted to locate MARQUARDT at his residence, 127 South 16th Street, but had been unsuccessful. He added that at the time the building manager had commented that MARQUARDT had been employed by the Atomic Energy Commission. MARQUARDT was then requested by letter to appear at the Fire Marshal's Office.

RECORDED - 120
 FBI PHILADELPHIA

Acting Chief GEORGE KINGTON advised that he had interviewed MARQUARDT at the time he came to the office since Captain HANNAN was absent at the time. He said that he then learned for the first time that the fire in question had taken place near Scranton, Pennsylvania, and had occurred about six months previously. This caused the Marshal's Office to withdraw from the case on a question of jurisdiction and MARQUARDT was advised that any further action on his part should be referred to the State Police authorities.

At the same time, KINGTON furnished MARQUARDT with the results of the analysis which had been made of the ash submitted, and which analysis had been made by Dr. EDWARD BURKE, City Chemist, Chemical Laboratory, Room 875, City Hall. This report reflected that the ash contained Magnesium, Aluminum, Iron, and Calcium in the form of silicates, sulphur and carbonates.

FREDERIC MARQUARDT was interviewed at his place of business, the H. A. KULJIAN COMPANY, Broad Street and Girard Avenue, Philadelphia, Pennsylvania. At this time he advised that he had received the sample of ash from a friend, ~~WOODY SHAEFFER~~, Lake Ariel, R. D., Wayne County, Pennsylvania, through the mail. He said that Lake Ariel is about one mile south of South Canaan, near Scranton, Pennsylvania. He stated that SHAEFFER's house had burned about six months ago, that the fire had occurred at night during a storm and that a large object had struck the roof and ignited the house which had burned to the ground in less than an hour.

He said that he had not been present during the fire but that these details had been furnished by letter from SHAEFFER at the time a sample of the ash was forwarded for analysis. He said that he was of the personal opinion that the ash might be a part of a military flare or a "flying saucer".

He pointed out that he has been advised by associates in the engineering field that one of the characteristics of some types of flares is the fact that they burn for a considerable period. He stated that the mass of the ash residue had remained ignited for a period of twelve hours. He also stated that he did not think there had been an explosion but that a loud noise had probably been caused by the vacuum created as the missile or object struck the roof. He added that there remains a quantity of the ash, amounting to one bushel, at SHAEFFER's premises at Lake Ariel.

PH 62-2542

MARQUARDT advised that he had been employed by the Atomic Energy Commission at Oak Ridge until 1943. He was entirely rational. He discounted the theory that a portion of a meteor had struck the house on the basis of the chemical analysis made by the City Chemical Laboratory.

MARQUARDT advised that at the suggestion of the City authorities, he had written to SHAEFFER and suggested that any further inquiries be directed to the State Police.

The file of the Philadelphia Office reflect that the records of Immigration and Naturalization Service were negative to an inquiry concerning FREDERIC S. MARQUARDT, OEM (Bureau File 77-30297). The files of this office likewise reflect that MARQUARDT by letter received August 14, 1947, requested of this office the identity of a powder or dust used to catch thieves.

Inasmuch as there is no violation indicated within the Bureau's jurisdiction, there is no further investigation being conducted in this matter. However, the ash residue obtained from the Fire Marshal's Office is being forwarded to the Bureau Laboratory for any interest or study the Laboratory may desire to conduct relative to flares or in connection with the possibility of the presence of "flying saucers".

Office Memorandum • UNITED STATES GOVERNMENT

TO : DIRECTOR, FBI

FROM : SAC, NEW ORLEANS

SUBJECT: FLYING DISCS AND SAUCERS
MISCELLANEOUS INFORMATION CONCERNING

DATE: July 21, 1949

For the Bureau's information, several citizens in the community of Alexandria, Louisiana, have recently reportedly seen flying discs. The Alexandria, Louisiana daily paper has carried numerous articles concerning this.

At a recent meeting of the Young Mens Business Club in Alexandria, a member suggested that since Alexandria, Louisiana is known as a convention city, the club should try promoting a convention of flying saucer seers. This particular comment appeared in the Alexandria paper and was picked up by the AP lines.

Mr. A. M. DeANGELO, a member of the Young Mens Business Club, advised Special Agent WALTER E. MOEHLE that since the AP release, they have received a large number of requests regarding the convention of flying saucer seers from many parts of the United States. Mr. DeANGELO states that the interest of the people is evidenced by their inquiries about convention particulars, stating they are flying saucer seers and want to attend such a convention.

This gentleman further advised that in view of the volume of inquiries coming in, it appears that the YMBC will have to hire an employee to handle all the correspondence. It might be noted that he advised a representative of the Air Force from Barksdale Field, Louisiana, has inquired as to plans of a flying saucer convention, stating that they are interested in furnishing an observer if such a convention were held.

This information is being furnished the Bureau, as it is possible such an enterprise may cause people to falsify that they have seen flying discs or flying saucers. Such falsifications might be made so that they might attend such a convention or become official delegates thereto.

This particular comment appeared in the Alexandria paper and was picked up by the AP lines.

Mr. A. M. DEAMERIO, a member of the Young Men's Business Club, advised Special Agent WALTER E. MOHR that since the AP release, they have received a large number of requests regarding the convention of flying saucer seers from many parts of the United States. Mr. DEAMERIO states that the interest of the people is evidenced by their inquiries about convention particulars, stating they are flying saucer seers and want to attend such a convention.

This gentleman further advised that in view of the volume of inquiries coming in, it appears that the YMBC will have to hire an employee to handle all the correspondence. It might be noted that he advised a representative of the Air Force from Barksdale Field, Louisiana, has inquired as to plans of a flying saucer convention, stating that they are interested in furnishing an observer if such a convention were held.

This information is being furnished the Bureau, as it is possible such an enterprise may cause people to believe that they have seen flying discs or flying saucers. Such fabrications might be made so that they might attend such a convention or become official delegates thereto.

Purpose

Your approval is requested in order that the attached letter and memorandum can be forwarded to the Phoenix Office, authorizing that office to furnish the attached memorandum to Mr. Lynn C. Aldrich, OSI representative, Phoenix, Arizona.

Background

In July 1947, William Albert Rhodes was jointly interviewed by Special Agent J. Bailey Brower (Bureau Agent) and George Fugate, Jr., A-2 representative from Hamilton Field, California. The purpose of the interview was to secure from Mr. Rhodes information and photographs of a flying disc, which had been sighted and photographed by Rhodes.

The complete results of the interview and subsequent events are contained in the attached memorandum submitted by the Phoenix Office.

Mr. Lynn C. Aldrich, OSI representative at Phoenix, Arizona, has requested the Phoenix Office to furnish him complete facts relating to this interview, which are to be subsequently forwarded to the OSI Office at San Francisco. According to Aldrich, Mr. Fugate, referred to above, has been questioned concerning this matter by his superiors and he has advised them that his recollection is "hazy" on the matter. According to Aldrich, Mr. Rhodes has apparently now requested the Air Force to return the photographs, which were previously obtained from him.

Recommendation

It is recommended that the Phoenix Office be advised that the memorandum attached may be forwarded by them to Mr. Aldrich, OSI representative, Phoenix, Arizona.

PLACING FILE

Purpose

Your approval is requested in order that the attached letter and memorandum can be forwarded to the Phoenix Office, and that the copy to be placed in the attached memorandum to Mr. L. H. Wilson, FBI representative, Phoenix, Arizona.

Background

In July 1951, William Albert Bridges was jointly interviewed by Special Agent J. Bailey (Phoenix Agent) and George F. ... The purpose of the interview was to secure from Mr. Bridges information and photographs of a flying disc, which had been sighted and photographed by Bridges.

The complete results of the interview and subsequent events are contained in the attached memorandum submitted by the Phoenix Office.

Mr. L. H. Wilson, FBI representative at Phoenix, Arizona, has requested the Phoenix Office to furnish him complete results relating to this interview, which are to be subsequently forwarded to the FBI Office at San Francisco. According to Mr. Bridges, referred to above, has been questioned concerning this matter by his superior and he has advised that the results are being withheld. According to Mr. Bridges, he has been specifically requested to return to return the photographs, which were previously obtained from him.

Recommendation

It is recommended that the Phoenix Office be advised that the memorandum attached may be forwarded by them to Mr. L. H. Wilson, FBI representative, Phoenix, Arizona.

RE: FLYING DISCS

Dear Sir:

Refer Phoenix letter to Bureau, dated September 9, 1947, captioned, REPORTS OF FLYING DISCS, for the attention of Assistant Director D. M. LADD, setting forth the result of an interview conducted by GEORGE FUGATE, JR., then a representative of the Air Force Intelligence, from Hamilton Field, California, and Special Agent J. BAILEY BROWER with one WILLIAM ALBERT RHODES, 4333 N. 14th Street, Phoenix, Arizona, concerning his observation and photographing of an object which was considered by the Air Force of significance from a security standpoint.

On June 7, 1949, Mr. LYNN C. ALDRICH, OSI representative, Phoenix, Arizona, called at this office, advising that he had been requested by his superiors in San Francisco to obtain detailed information concerning this interview since RHODES apparently has requested the Air Force to return the photographs.

FUGATE, when questioned by his superiors concerning the matter, stated his recollection was "hazy" on the matter. OSI is anxious to secure the substance of information in the Phoenix file concerning this matter. Mr. ALDRICH was furnished the substance of the interview, as set forth in letter of reference and he has now requested that he be furnished with a blind memorandum setting forth this information in detail in order that he may make it available to the OSI at San Francisco.

A memorandum setting forth this information has been prepared by this office and is attached hereto. The Bureau is requested to advise if such memorandum should be made available to OSI.

Very truly yours

W. A. MURPHY

RE: WYING DISC

Dear Sir:

Refer Phoenix letter to Bureau, dated September 9, 1947, captioned, REPORTS OF WYING DISC, for the attention of Assistant Director U. M. LADD, setting forth the result of an interview conducted by GEORGE FUGATE, JR., then a representative of the Air Force Intelligence, from Hamilton Field, California, and Special Agent J. MILLY BROWN with one WILLIAM ALBERT RHOUGH, 4315 W. Linn Street, Phoenix, Arizona, concerning his observation and photography of an object which was considered by the Air Force of significance from a security standpoint.

On June 7, 1949, Mr. LYNN U. ALBRICH, OSI representative, Phoenix, Arizona, called at this office, advising that he had been requested by his superior in San Francisco to obtain detailed information concerning this interview since RHOUGH was assigned to the Air Force to return the photographs.

FUGATE, when questioned by his superior concerning this matter, stated his recollection was "fuzzy" on the matter. OSI is anxious to secure the substance of information in the Phoenix file concerning this matter. Mr. ALBRICH was furnished the substance of the interview as set forth in letter of reference and he has now requested that he be furnished with a blind memorandum setting forth this information in detail in order that he may make it available to the OSI at San Francisco.

A memorandum setting forth this information has been prepared by this office and is attached hereto. The Bureau is requested to advise if such memorandum should be made available to OSI.

Very truly yours,

MP

You will recall that Mr. Ernest Cuneo advised the Bureau of a letter which Walter Winchell had received from an individual in Los Angeles indicating that he had seen a flying saucer leave the ground within his view and in which letter he theorized that this might have been a landing from another planet.

The Los Angeles Office was requested to locate and interview the writer of this letter, Peter Camerlon Jones, 164 West 37th Street, Los Angeles 7, California.

The Los Angeles Office has now advised that the present owner and former manager at this address have no knowledge of any Peter Camerlon Jones and that other investigation to locate Jones was unproductive. It would appear, therefore, that this may have been a prank.

You may desire to advise Mr. Cuneo that there is no such person at the address given inasmuch as he indicated that Mr. Winchell intended to do a column on this letter.

DML:FA

This was handled by letter to Cuneo
